

## Low Carbon Fuel Standard (LCFS)

### 2026 Verification Accreditation Training Announcement

The California Air Resources Board (CARB) will hold the LCFS verifier accreditation in-person training from **April 13 to April 17, 2026 in the Los Angeles area, CA**. CARB is accepting applications for accreditation of LCFS verification bodies and individual verifiers. More information, including a detailed training schedule will soon be posted on the LCFS Verification website: <https://ww2.arb.ca.gov/lcfs-verification>. Please note that **CARB will not offer LCFS verifier accreditation training in 2027 and 2028**, so plan accordingly.

The training includes six courses. Lead verifier candidates applying under section 95502(c)(3)(A)-(E) of the LCFS regulation may opt out of Course 1 and are not required to take the general verification accreditation exam pursuant to LCFS Regulation section 95502(c)(3)(G). However, Course 1 is highly recommended to reinforce essential LCFS verification principles. Non-lead verifier applicants who do not currently meet the requirements for lead verifier applicants should consider completing all six courses to be eligible to upgrade to lead verifier at a later time after the experience requirements have been met.

Verification bodies must submit an Application for Verification Body Accreditation to CARB, along with any Individual Verifier applications. Verification bodies may choose to submit the templates required in section 95501(b)(1)(B) of the LCFS regulation after verifier accreditation training to finalize their accreditation package. Individuals planning to provide LCFS verification services who are not affiliated with a current verification body or verification body applicant must submit individual accreditation applications to CARB via email at [LCFSverify@arb.ca.gov](mailto:LCFSverify@arb.ca.gov).

Prior to payment and registration for the training, submitted applications must first be prescreened for eligibility and approved by CARB. Therefore, it is advised to submit applications early enough to ensure adequate processing time, typically a few weeks. After approval, eligible applicants will be notified when they may enroll in the verifier accreditation training. The enrollment period for the training will close on **March 16, 2026**.

#### LCFS Verifier Accreditation Training Fees:

- \$1,400.00 for Courses 2 through 6 (Fast track option)
- \$1,600.00 for Courses 1 through 6 (Fast track eligible applicants with a \$150 discount)
- \$1,750.00 for Courses 1 through 6 (Non-fast track option)
- Register and pay by February 23, 2026 at 11:59 PM (Pacific Time) for an early-bird \$50 discount

Please indicate in the application email to [LCFSverify@arb.ca.gov](mailto:LCFSverify@arb.ca.gov) whether the verifier candidate intends to take Course 1, covering general verification and the accreditation exam.

As mentioned earlier, fast track learners are not required to attend Course 1, but we encourage them to consider attending Course 1 at a discounted rate (\$150 off the Course 1 price). Fast track learners can pay \$1,400 for Courses 2 through 6, or attend Courses 1 through 6 for \$1,600 (\$150 discount compared to the cost for non-fast-track learners who are required to take all 6 courses).

Application forms are available on the LCFS Verification website. Steps to submit an application:

- Download the individual verifier application form here:  
<https://ww2.arb.ca.gov/resources/documents/isdpmb-117-application-accreditation-verifiers-low-carbon-fuel-standard-lcfs>
- Download the verification body application form here:  
<https://ww2.arb.ca.gov/resources/documents/isdpmb-118-application-accreditation-verification-bodies-low-carbon-fuel>
- Email the completed application form and supporting documents to [LCFSverify@arb.ca.gov](mailto:LCFSverify@arb.ca.gov)
- Await receipt and eligibility screening confirmation
- Receive registration link for payment (eligible discounts will be applied)
