¹The 2024 Federal Secondary Annual SO₂ Design Values were calculated based on the 3-year average of the annual mean of daily mean concentrations (2022, 2023, 2024). The Federal Secondary Annual SO₂ Standard is 10 ppb and was made effective on January 27, 2025. All Federal Secondary Annual SO₂ Design Values in California are below the standard of 10 ppb.

²The U.S. EPA accepts negative concentration values down to the negative of the Method Detection Limit (MDL).

³Data have not yet been certified.

*Does not meet the U.S. EPA's data completeness criteria.

**Design value is considered invalid because 2024 data have not yet been certified.

***No monitoring data are available for the following air basins: Lake County, Lake Tahoe, Mojave Desert, Mountain Counties, North Central Coast, and Northeast Plateau.
