Dear Bryan,

Thank you for sending over status updates on your shore power vessels. We are glad to see that the Polar Enterprise, Polar Adventure and Polar Endeavour have successfully commissioned shore power at T-121.

I want to confirm our approval to extend the prospective eligibility request for the Polar Discovery and the Polar Resolution. Until the Polar Discovery is commissioned for shore power, her visits are eligible to use the remediation fund until March 31, 2026. Until the Polar Resolution is commissioned for shore power, her visits are eligible to use the remediation fund until December 31, 2026. After these vessels successfully commissions shore power, they are no longer eligible for remediation under this extension. If there are any changes to these timelines, please let us know as soon as possible to determine next steps.

Best Regards,

Jonathan Foster (he/him)
