

Drive Forward Truck Forum: Infrastructure Workgroup Meeting Agenda

November 2, 2026

Panel Discussion: *Developing a Charging Infrastructure Project Concept – a Deep Dive*

This meeting will include a deep dive into the initial stages of a fleet charging infrastructure project. Fleet representatives experienced in charging infrastructure installations will participate in a guided panel discussion covering:

- A. Detailed evaluation of charging infrastructure needs
- B. Getting the most from your initial utility consultation
- C. Site assessment and planning for charger placement
- D. Acquisition planning – chargers, vehicles, site work and timing
- E. “Greenbook for Fleets” effort underway to improve availability of zero-emission vehicles that meet public fleet operational needs

Questions for the panel may be submitted using this [link](#) until 12:00 PM Friday, October 30, 2026.

More information and meeting materials for this workshop are available on the Zero-Emission Infrastructure Page,
