2023 Consumer Products Survey Final Data Release

The California Air Resources Board (CARB) is pleased to announce that the Final 2023 Consumer & Commercial Products Survey Data (Final 2023 Survey Data) and supplemental materials are now available at: [2023 Consumer and Commercial Products Survey | California Air Resources Board](#). This announcement is for informational purposes only – no action or other response is requested.

These materials provide a detailed summary of consumer product sales, emissions, volatile organic compound content, chemical speciation, reactivity, and other information for 37 categories of consumer products sold or supplied for use in California during calendar year 2023. In total, more than 600 product manufacturers and formulators participated in this effort, providing product sales and chemical formulation information to over 46,200 products sold in California. The Final 2023 Survey Data reflect revisions in response to feedback based on the Draft 2023 Survey Data released on April 30, 2026.

CARB appreciates the collaboration of the many consumer product manufacturers, formulators, and other stakeholders who have submitted their consumer product sales, formulation, and other data that helped us review and refine the resulting survey data.

Please contact Mr. Austin Henry at austin.henry@arb.ca.gov or Mr. Moslem Hossein Mardi, Manager, Implementation Section at moslem.hosseini-mardi@arb.ca.gov regarding any questions, or additional feedback, you may have regarding the Final 2023 Survey Data.

Upcoming Program Activities

The CARB Consumer Products Program will be holding a webinar on November 4, 2026, at 10:00 AM PST, to provide an update on the status of the 2018 Aerosol Coating and Aerosol Adhesive Products Survey. Participation instructions can be found at our [2018 Aerosol Coating and Aerosol Adhesive Products Survey Webinar Notice](#).

The CARB Consumer Products Program expects to announce further engagement opportunities with stakeholders in early 2027.

Background

The 2023 Consumer Products Survey supports CARB's efforts to reduce volatile organic compound (VOC), toxic air contaminant (TAC), and greenhouse gas (GHG) emissions from consumer products and improve California's emissions inventory. The survey was mandatory under Title 17, California Code of Regulations, section 94513, for companies identified as the "Responsible Party" on products sold or supplied for use in California during 2023. The data collected are also used to support future regulatory actions in fulfillment of commitments for VOC reductions in California's State Implementation Plan under the Clean Air Act.
