

Subject: Update on the Status of the 2018 Aerosol Coating and Aerosol Adhesive Products Survey

The California Air Resources Board (CARB) is holding a webinar, on November 4, 2026, at 10:00 AM PST, to provide an update on the status of the [2018 Aerosol Coating and Aerosol Adhesive Products Survey \(2018 Survey\)](#). The 2018 Survey was launched on October 18, 2019, and the reporting deadline was March 1, 2020. The [2018 Aerosol Coating and Aerosol Adhesive Products Survey Preliminary Data Summary](#) was released on June 9, 2022. Comments on the preliminary data summary were due on June 30, 2022.

At the November 4, 2026, webinar, CARB staff will: 1. Discuss the background and results of the 2018 Survey. 2. Identify the next steps. 3. Answer questions and solicit input from stakeholders. This webinar will be conducted via Zoom:

Date: November 4, 2026

Time: 10:00 a.m. - 12:00 p.m. PST

Call-In #: +1 408-961-3929

Passcode: 243812

[Register](#)

Background

The 2018 Survey represents part of CARB's ongoing effort to evaluate the feasibility of further reducing volatile organic compound (VOC), toxic air contaminant (TAC), and greenhouse gas (GHG) emissions from aerosol coating and aerosol adhesive products, and to update the emissions inventory of aerosol coating and aerosol adhesive products. The survey data provides useful information about how products were reformulated to meet new VOC and reactivity limits that became effective in 2017. The data gathered in this survey may be used to help California meet its federally mandated commitments for VOC reductions under the Clean Air Act.

Completion of the 2018 Survey was mandatory under California State Law (title 17, California Code of Regulation, sections 94513 and 94524(c)). Each company, firm, or establishment ("Responsible Party") listed on the label of an aerosol coating or aerosol adhesive product that was sold or supplied for use in California during calendar year 2018 was required to complete this survey.

[CARB's Consumer Products Program](#) is a key part of overall efforts to reduce the amount of smog-forming VOCs, TACs, and GHGs that are emitted from use of chemically formulated consumer products in California. [CARB's Consumer Products Regulations](#) have resulted in emission reductions of nearly 50 percent since 1990.

If you have any questions about the upcoming webinar or have general questions regarding the Consumer Products Program, please email csmrprod@arb.ca.gov.
