Agenda Item #0793

My family has used an air purifier with ozone for 5 years. We have had zero negative effects and many, many positive Results. We would NEVER want to be without our purifier.

We had such tremendous results in our home with pet odors and particle removal. Our kids have always been healthy, which we credit the purifier. We have had a purifier in our children's classrooms for 5 years also. Teachers and parents are so grateful because the classrooms are so much fresher and cleaner than before. The attendance rate is higher in our kids classes.

My brother's son^{Erik} had such severe asthma that they would be up all night giving breathing treatments. Their son believed he was dying because he couldn't catch his breath. He asked why he couldn't run to 1st base like the other kids and had low self-esteem. They tried the same purifier. The breathing treatments and medication is no longer needed. Erik has since been ALL STARS FOR BASEBALL, is a great football player, and has high self esteem. This machine was life-changing for them, and they will never be without it.
