Subject: Please develop a strong plan to reduce PM2.5 air pollution in San Joaquin Valley

Dear Mary D. Nichols,

As a resident of the San Joaquin Valley and one of the 1.3 million members and supporters of the National Parks Conservation Association, I urge you to take strong, swift action to significantly reduce fine particulate matter (PM2.5) air pollution by regulating all sources of emissions across the San Joaquin Valley.

Not only am I concerned about the risks that PM2.5 air pollution poses to my health and my community -- I am also worried about the harm it causes Yosemite, Sequoia and Kings Canyon National Parks. California's national parks are already some of the most polluted in the country and deserve the cleanest air possible.

Clean air is vital to the health and well-being of parks and people, yet the 2018 draft PM2.5 rule does not go far enough to adequately protect either. I urge you to regulate sources of PM2.5 emissions across the valley and leave no reduction strategy off the table. This includes emissions from industrial biomass facilities, agricultural and residential burning, commercial charbroiler equipment, oil and gas operations, and tailpipe emissions from mobile sources and stationary diesel equipment.

It is my expectation that you will improve and finalize this plan in a timely fashion, and that you will continue to work toward attaining clean air standards for the San Joaquin Valley by the soonest date possible.

I vote for clean air!

Thank you for considering my views.

Sincerely,
Miss Maria Agnes Rocha

It is my expectation that you will improve and finalize this plan in a timely fashion, and that you will continue to work toward attaining clean air standards for the San Joaquin Valley by the soonest date possible.

We shouldn't have to live in a Valley where there are days that the air quality is good-moderate. There shouldn't be a day by day "air qualities forecast" we should have clean air all the time. And if that doesn't cry for help than everyone in charge of these decisions need to think about the long lasting negative impacts of poor air quality.

Take a walk in our shoes.
Take a walk through the Valley.
Take a moment.
Rethink.
Reevaluate.
Respond with positive actions that will leave a long lasting and thriving impact.

Thank you for considering my views.
Sincerely,
Ms. Arianna Ramirez

Subject: Please develop a strong plan to reduce PM2.5 air pollution in San Joaquin Valley

Dear Mary D. Nichols,

As a resident of the San Joaquin Valley, in Bakersfield and we are a huge hub of the agriculture that provides food not just to ourselves to the others throughout the U.S. and beyond, but it comes at the expense of our breathing and it is well known fact between allergies that everyone get at certain defoliation times, almond tree shaking harvest, etc. I am one of the 1.3 million members and supporters of the National Parks Conservation Association, amount many other anti pollution and clean air causes that I MUST support. I urge you to take strong, swift action to significantly reduce fine particulate matter (PM2.5) air pollution by regulating all sources of emissions across the San Joaquin Valley.

Not only am I concerned about the risks that PM2.5 air pollution poses to my health and my community -- I am also worried about the harm it causes Yosemite, Sequoia and Kings Canyon National Parks. California's national parks are already some of the most polluted in the country and deserve the cleanest air possible.

Clean air is vital to the health and well-being of parks and people, yet the 2018 draft PM2.5 rule does not go far enough to adequately protect either. I urge you to regulate sources of PM2.5 emissions across the valley and leave no reduction strategy off the table. Subject: Please develop a strong plan to reduce PM2.5 air pollution in San Joaquin Valley

Dear Ms. Nichols and Mr. Sheikh,

We [the attached petitioners] urge the San Joaquin Valley Air Pollution Control District (SJVAPCD) and California Air Resources Board (CARB) to fulfill their legally mandated duty to protect public health and reduce harmful fine particle (PM2.5) pollution.

For residents living within or next to the most polluted air basin in the United States, they are regularly breathing unhealthy air. This same pollution harms our beloved Sierra Nevada national parks including Yosemite, Sequoia and Kings Canyon—obscuring views, compromising visitors' health, and making them some of the dirtiest parks in the nation.

1. Deliver clean air now: Overdue plans and programs to reduce air pollution to healthy levels should be finalized and implemented immediately. Further delaying the deadline to comply with any PM2.5 standard is unacceptable.
2. Clean up all sources: The Air District must not pick and choose which air pollution sources are cleaned up and which ones get a pass. Require all PM2.5 polluters to limit excess emissions, including sources like ammonia from dairy and livestock operations, fossil fuel emissions from oil and gas operations, and smoke from residential, agricultural, and biomass wood burning.

We need immediate action to protect people and national parks from dangerous fine particle pollution.

CALIFORNIA CLEAN AIR FOR PARKS PETITION:

We urge the San Joaquin Valley Air Pollution Control District (SJVAPCD) and California Air Resources Board (CARB) to fulfill their legally mandated duty to protect public health and reduce harmful fine particle (PM_{2.5}) pollution.

As residents living within or next to the most polluted air basin in the United States, **we are regularly breathing unhealthy air.** This same pollution harms our beloved Sierra Nevada national parks including Yosemite, Sequoia and Kings Canyon—obscuring views, compromising visitors' health, and making them **some of the dirtiest parks in the nation.**

1. Deliver clean air now: Overdue plans and programs to reduce air pollution to healthy levels should be finalized and implemented immediately. Further delaying the deadline to comply with any PM_{2.5} standard is unacceptable.

2. Clean up all sources: The Air District must not pick and choose which air pollution sources are cleaned up and which ones get a pass. Require all PM_{2.5} polluters to limit excess emissions, including sources like ammonia from dairy and livestock operations, fossil fuel emissions from oil and gas operations, and smoke from residential, agricultural, and biomass wood burning.

We need immediate action to protect people and national parks from dangerous fine particle pollution.
