Subject: Feedback on Proposed Amendments

Comment:

My name is Brent Garcia and I'm the owner and CEO of Brewer Crane & Rigging - a crane company based in San Diego. As a small company we have already struggled keeping up with some of the requirements of prior diesel emissions regulations. I offer the following comments on your newest proposed amendments to help ensure the regulations are practical, reasonable, and don't put more small businesses out of business.

1. Phase out of Tier 3 should be extended to 1/1/2026 at minimum for fleets. Tier 3 still represents the majority of the available equipment repower options.
 2. Tier 4 Interim should not be banned from purchase at all. The current NOx fleet average is based upon fleets meeting a final fleet average equivalent to Tier 4 Interim, so this should not be eliminated as a purchase option at all. If a phase out of purchased equipment is to be used for equipment certified to this level, it must be no earlier than 2030. The ban on this equipment in 2024 will bring havoc to the ability for the owners of this equipment to sell their Tier 4 Interim, excepting out of state at a much reduced asset value. This again creates issues with bonding and financial stability for fleets to purchase Tier 4 Final equipment.
 4. A mandate to use renewable R99 or R100 diesel by the end of next year is infeasible. Not only will this drive up the cost of the fuel when everybody with off-road equipment will be seeking to purchase this fuel, but many of our clients are in contracts that last more than a year making such a change costly, if not infeasible. Further, we cannot agree with the rosy picture staff states on the availability of this fuel for all, including that which is already mandated for marine in the Harbor Craft regulation. Many of our clients have multiple sites across the state that will need time for the adjustment. We believe CARB should instead be offering some sort of incentive for early use of this fuel, and then set the deadline for 1/1/2028.
- Thank you for your consideration.

Comment 22 for In-Use Off-Road Diesel-Fueled Fleets Regulation (offroaddiesel2022) - 45 Day.

First Name: Hero
Last Name: Phong
Email Address: hero.phong@dot.ca.gov
Affiliation: Caltrans

Subject: Snow vehicles and snow locations
Comment:

Regarding 2449.1(f) Renewable Diesel Requirements on page 84, are (dedicated and non-dedicated) snow removal vehicles required to use Renewable Diesel? Also, are non-snow removal diesel vehicles required to use Renewable Diesel at high elevations in the winter? We have had major troubles in the past with Renewable Diesel gelling in the winter at the higher elevations during January 2017 (Caltrans Districts affected include 2,3,9, and 10). Multiple storage tanks and snow vehicles were rendered inoperable as a result. Another thing to keep in mind is that a diesel vehicle can fill up with renewable diesel at a low elevation location and then drive up to a freezing location. In this scenario, a driver can be left stranded in an area with low cell reception or the vehicle may even become inoperable on the roadway during a blizzard with low visibility.

Regarding 2449(d)(9)(B) Compliance After the Final Target Date on page 30, it states:

(B) Beginning January 1, 2024, for large and medium fleets, and on January 1, 2028, for small fleets, fleets must meet the Tier phase-out requirements in section 2449.1(c). Vehicles exempt from BACT under sections 2449.1 (b)(2) and (3) are not exempt from the Tier phase-out requirements in section 2449.1 (c). Beginning January 1 2024, all fleets must meet the renewable diesel requirements in section 2449.1(f).

Are snow removal vehicles now subject to these phase-out requirements? I think previously CARB mentioned that snow removal vehicles would be exempt, correct?

Comment:

Opposed to phasing out of diesel equipment. Restorations and Antique collectors who still maintain and use this equipment for business and Ag. need to be able to keep this equipment in their fleet as well as the equipment having a resale value is foremost. Natural obsolescence and innovations will remove these relics from service.....The Air Resource Board needs to dial it down and stop the over reach of power. YOU people should be doing everything in your power to end the mandated BIENNIAL Automotive smog program as that program is no longer needed with todays Automobiles technology and the Electric cars..... PHASE OUT LEGISLATION not equipment.
