Comment 8 for Status Update for the Zero Emission Vehicle Regulation (zev09) - 45 Day.

First Name: Michael

Last Name: Bailey

Email Address: michaelebailey@cox.net

Affiliation: People First, California, Orange County

Subject: Zero Emission Vehicle Draft Regulation

Comment:

This regulation will be a giant step forward in making zero emission vehicle infrastructure and vehicles as fully emission free as can be done with the state of current technology. I hope you will support it. This regulation will be the foundation for the 21st Century transportation system. The transportation system of the future will have cars, trucks, and buses powered completely by hydrogen in some cases or fully electric powered in others, and there will no longer be a need to continue with the old 20th Century technology powered by gasoline and diesel. If solar power is used to manufacture hydrogen fuel the only exhaust would be pure water vapor when a vehicle uses hydrogen to operate. In the case of all electric powered vehicles where solar power is used to recharge the vehicle there would be 0% exhaust. Another major benefit to all of this could be lowering of the speed limits on roads and freeways because electric cars don't seem to go quite as fast. So this would be another good benefit. People First California is made up of members with disabilities, including many types of breathing disabilities so this regulation and what it means for the future of transportation would be of great benefit to the disabled and the environment. Thank you and best wishes, Michael E. Bailey.
