Affiliation: CBE

Subject: Race, Equity and Air Quality

Comment:

East Oakland, especially deep East Oakland has continued to suffer from zoning that allows grandfathered industry, like the AB&I Foundry and the huge Crematorium to continue to operate. These polluting industries are close to and downwind from residential areas as well as schools and school playgrounds. The standards that have allowed these grandfathered and permitted polluting industries to continue operating are not realistic! The "allowable levels" of pollution don't exist in a vacuum. Their pollution combines with the fumes off the 880 freeway and the idling trucks that go through the neighborhoods. These conditions would never be tolerated in the Oakland hills. These are areas that historically have been redlined and reserved for people of color. These are neighborhoods that are economically disadvantaged. Add the smoke pollution from the wildfires and covid to this mix and we have a totally disastrous situation. Permitting standards need to be changed immediately and these polluters need to be shut down now, not in 2-10 years. at the very least Spare the Air days must include shutting down these polluters for the duration of the alerts. Thank you
