Subject: SORE2016
Comment:

I appreciate the ARB's efforts to regulate evaporative emissions for small off-road engines (SORE). However, I would urge ARB also to consider regulating the overall combustion emissions and use of these engines, particularly on "spare the air" days in the Bay Area and other major populated areas.

You know better than me the inefficiency of SOREs as combustion engines, and that one lawn mower is the equivalent of more than 10 cars. In my area of San Mateo, it is not uncommon to see many lawn and garden services working daily (I counted 13 on a 4 mile morning jog through my neighborhood). Considering that each of these "mow and blow" services use multiple SORE-powered machines to do their work, the impact on our local pollution and that of the wider Bay Area is potentially significant.

I would urge ARB to consider regulations to improve the combustion-efficiency of SOREs, AND to regulate their use particularly on "spare the air" days. In addition, I would like to see greater encouragement of the use of electric, or battery-powered lawn and garden equipment to reduce pollution.

I would be happy to engage with you further on this issue. Thank you.
