Comment:

Consider expanding the choice of monitoring instrument allowed and add to the SIP. Follow EPA Method 21, (section 6.1), as opposed to the much more restrictive AQMD 1150.1, which specifies the use of only FID technology, despite a number of other available technologies that are equal to or better than FID. No specific companies or models need be mentioned, simply allow all technologies that meet Method 21 requirements.

Comment:

I have attached a comment letter on ARB's proposed state plan for the federal MSW Landfill Emission Guidelines. My letter explains why we believe L and D Landfill is not subject to the federal guidelines and should be removed from the state plan.
