Subject: Approval of South Coast AQMP

Comment:

I will speak on behalf of SC Johnson mainly in support of the decision to remove control measure CTS-04, relative to LVP-VOCs, from the AQMP, to encourage the ARB to proceed with the study of LVPs requested by South Coast, and to offer any assistance SC Johnson can give to the ARB to ensure completion of an accurate, science-based study of LVP reactivity.

Subject: Incorporate by Reference AQMP 2012 SCD In Total +Soc. Econ Study & DEIR/
FinalEIR etc.

Comment:

I hereby rearin incorporate by reference the complete record of the 2012 AQMP in total with all drafts including but not limited to the DEIR & FEIR & Socio Economic study and all proceedings in the matter including links etc.. including meetings informal & formal etc..

This is comment No. 1 of several. 1/16-13 for self and PSPC the Public Solar Power Coalition for the SIP. AQMP 2012 SCAQMP/CARB

I question what was or is in the record in the proceedings for the 2012 AQMP etc cited above in total that carb has used and will use in this proceeding. Attorney for the carb Daniel Whitney total me on a telephone call at aprx. 4:30 pm Monday 1/14/13 that the record for the 2012 aqmd ie all related documents , including references and meetings etc was not part of the record of the carb 1/25/13. If not what is?

Also Mr Whitney didn't return my call of later in the evening of 1/15/13 requesting his answer in writing through an email. That request is made again here now. In addition what is in the record if not the full record leading to the Dec, 7,2012 SCAQMD 2012 AQMP? Please respond asap.

Solarly,
Thanks, take care

January 17,2013

Harvey Eder
and the
Public Solar Power Coalition (PSPC)
harveyederpspc@yahoo.com

PS I tried vis ve The Notice in this matter as well as throught the Agenda for electronic service and could not connect on 1/14/13 Monday night and through what was sent to me and the NOTICE "ELECTRONIC SUBMITTAL" LAST NIGHT TUESDAY 1/15/13 TO BE WITHIN THE 10 DAYS !? What is the purpose of the 10 day in advance comments submittal? How does it differ from the submittal date of noon 1/23/13 ? And again what is in/ on the record ?

Subject: Technology Intervention for Control of PM2.5

Comment:

A large contributor to the poor air quality within the SCAQMD are existing wood burning fireplaces. PM non-attainment areas in States like Oregon and Utah are requiring EPA Phase II Qualified wood burning fireplaces and retro-fit devices to meet their obligations under the Clean Air Act. Even though new wood burning fireplaces have been banned within the SCAQMD PM non-attainment area, EPA Phase II Qualified wood burning fireplace retro-fit devices should at least be included as a contingency measure in the SIP. These technologies are considered by Oregon and Utah to be "Best Available Control Measures" BACM for wood smoke from fireplaces.

Subject: a 5 and 10 year Immediate Solar Conversion Plan & Implementation is For 2012 AQMP

Comment:

The comments for Harvey Eder and for Public Solar Power Coalition for the 2012 AQMP. EIR and Socio Economic Study all drafts and the Final documents etc are incorporated into the record herein by reference and responses as well as the Sierra Club (Oct 23, 2012) comments and responses. This includes comments submitted on July 16, 17 & 18 of 2012, all comments submitted in August and September, October 21, 22, 23, 24, as well as November 2012 and oral comments of December 7 2012 and all attachments and references in comments and responses this also includes the submission of the 1991 AQMP App. IV Solar Hot Water to reduce 5 Tons of Nox/Ozone per day citing the 1988 conversation with Harvey Eder/ Public Solar Power Coalition with staff of SCD as well as the full record of Harvey Eder and PSPC Public Solar Power Coalition over the past 27 years as well as the record of the lawsuit filed by the same in 1990, 1991, 1992 and or thereabouts for South Coast District Solar Conversion Plan.

Solar is BACT, BARCT (best available retrofit control technology) required by the California Clean Air Act/ and Federal CCA as well as RACT and LAER. It pays for itself using life cycle cost analysis and therefore has no cost (or very low cost) per ton /pound of emissions reduced, for green house gas emissions as well as criteria and toxic emissions. The cost of solar continues to go down and interest rates are about the lowest ever. Until the end of 2016 federal tax credits and deductions make solar even more cost effective (proposed extensions of the credits for another 5 years will further help the cost effectiveness (ACRS will continue).

Several parts of the 2012 AQMP are cited in the CARB 21 page staff report submitted approx 2 weeks ago (so the plan has been reference into the record by CARB staff already. Harvey Eder's comments of last week incorporating all proceedings in the record in AQMP/ DEIR all drafts and finals as well as meetings SE Study all drafts and final. Much of this was not available timely in the record. Requests were made for hard copies etc which were late. etc..

THIS IS COMMENT NUMBER 2 BEFORE CARB THE LAST WAS SUBMITTED LAST WEEK WITH ANOTHER TO FOLLOW /PLUS

Comment:

This is Comment #3 For CARB on an immediate total solar conversion plan and implamentation for SCAQMD? STATE OF CA. by Harvey Eder self & PSPC Public Solar Power Coalition. Attached or in the body of this comment in the CARB SIP Ozone and PM 2.5 etc plan on the 2012 AQMP SCAQMD meeting 1/25/13 in Diamond Bar Ca. CARB BD OF Directors

<http://www.businessweek.com/articles/2012-10-25/solar-energy-is-ready-dot-the-u-dot-s-dot-isnt#p1>

This is the link to the Opening Remarks , Strangling Solar article by Ken Wells, Page 12 and 13 of the October 29-November 4,2012 Bloomberg Businessweek article on solar conversion "Photovoltaic power's low cost shouldbe a boon for consumers. Why isn't the U.S. taking advantage of it ? with a byline subtitle on page 13 "Realizing solar's potential requires a smarter national energy policy that takes on entrenched interests"
The entire 2 page is entered into the record here by reference etc.

This includes the fact "Over the past five years the price of photovoltaic panels has plummeted 75 persen...Nationally, the cost of residentialonstallations-including hardware,permits,labor-has plummeted from \$9 a watt in 2006 to \$5.46.Averging in commercial industrial installations, the national installed price plumments to \$3.45 a watt says the Solar Energy Industries Association, a Washington-based trade group."
Further "many utilities and their political backers are standing in the way of changes that could boost U.S. energy independence,reduce carbon emissions and save cousmers billions... Congress should also extend beyond the 2016 the 30 percent federal solar tax credit for rooftop installation,then gradually phase it out. Five years from now,solar-without subsidies-will be competitive with conventional power prices in 17 states,and the credit could greatly increase that number ."
(The Federal Solar Tax credit should be refundable for low and middle income like the origional solar tan credit in Ca. est. in the mid to late 70s)
Most solar systems are installed by 3ed party ownseds in Ca. at rates that are lower than the IOUs (investor owned utilities)
This is no cost but savings per pound/ton of Nox/Ozone and PM 2.5 reduced etc (GHGs etc)

The Immediate Total Solar Conversion Plan submitted to South Coast

District must be Planed and implemented now as included in the record. The stated should ficilatate this wiht CARB working with other agencies through Solar Cal. etc
