Subject: three comments from SPMV manufacturer

Comment:

Dear Board,

We are a NHTSA-Approved Low Volume Manufacturer who is eager to work with CARB to create CARB-compliant SPMVs for manufacture and sale in the State of California and also for sale outside of California. We are ready to begin producing these vehicles in California immediately, as soon as we are approved by CARB. We will be working with many local businesses and suppliers and creating jobs in California.

In order for this to happen, we have two minor but crucial recommendations for the proposed regulations. The regulation's definition of SPMV should be identical to the definition of "replica" in the FAST Act. Also, the regulation should not require the SPMV manufacturer to be EPA certified if neither the FAST Act nor EPA have such a requirement.

We hope CARB will consider these minor but crucial changes to allow us to immediately start. If CARB accepts our proposed changes, we are prepared to spend over \$500,000 over the next 12 months starting immediately, all within the State of California to engineer and build the first run of these vehicles. We anticipate our investments and spending to manufacture, develop, test, and build these vehicles could easily top \$10 million dollars per year spent in the State of California alone starting in 2020.

Reach out with any questions or concerns.

Thank you.

Sincerely,

Jesse GlickenhauS

Subject: Comments about Modified Text for SPMV2018

Comment:

Dear Clerk of the Board and CARB,

Thank you for all your help. We believe SPMV2018 is very close to being a great rule, if only the definition of replica was identical to the definition in the FAST Act. We believe the rule could help bring manufacturing jobs to California through our company and us building our replica Boots. However, the modified text poses four fatal legal flaws related to this new definition of replica, as the definition of replica proposed in SPMV2018 differs than the standard prescribed by the FAST Act.

Please see the attached PDF as our official comment on the record on behalf of Scuderia Cameron Glickenhau LLC.

We are optimistic that CARB will understand and agree with our comments and change the proposed text accordingly.

Sincerely,
Jesse
