

State of California  
AIR RESOURCES BOARD

EXECUTIVE ORDER D-215-64

Relating to Exemptions Under Section 27156  
of the Vehicle Code

Edelbrock Corporation  
Performer X Turbo Kit

Pursuant to the authority vested in the Air Resources Board by Section 27156 of the Vehicle Code; and

Pursuant to the authority vested in the undersigned by Section 39515 and Section 39516 of the Health and Safety Code and Executive Order G-02-003;

IT IS ORDERED AND RESOLVED: That the installation of the Performer X Turbo Kit, Part Nos. 1500, 1501, 1502, 1505, and 1510; manufactured and marketed by Edelbrock Corporation, at 2700 California Street, Torrance, California 90503, has been found not to reduce the effectiveness of the applicable vehicle pollution control system and, therefore, is exempt from the prohibitions of Section 27156 of the Vehicle Code for the following vehicle applications:

| <u>Part No.</u> | <u>Application</u>                                                                                                     |
|-----------------|------------------------------------------------------------------------------------------------------------------------|
| 1500            | 1996 through 2000 model-year Honda Civics equipped with the 4 cylinder, single over head camshaft (SOHC) V-Tec engine. |
| 1501            | 1999 and 2000 model-year Honda Civics equipped with the 4 cylinder, dual over head camshaft (DOHC) V-Tec engine.       |
| 1502            | 1992 through 1995 model-year Honda Civics equipped with the 4 cylinder, single over head camshaft (SOHC) engine.       |
| 1505            | 1994 through 1999 model-year Acura Integras equipped with the 4 cylinder, dual over head camshaft (DOHC) V-Tec engine. |
| 1510            | 2000 and 2001 model-year Acura Integras equipped with the 4 cylinder, dual over head camshaft (DOHC) V-Tec engine.     |

The Performer X Turbo Kit includes the following main parts: Garrett T-28 Turbocharger (model # GT28R for SOHC applications and model # GT28RS for DOHC applications), equipped with a waste gate set at 7 psi., an intercooler, Performer X intake manifold with four additional injectors that are controlled by a stand alone controller, exhaust manifold, and an intake air tube with an open element air cleaner attached. High pressure fuel hoses that are modified are replaced with a Gates SAE30R9 fuel hose.

This Executive Order is valid provided that the installation instructions for the Performer X Turbo Kit will not recommend tuning the vehicle to specifications different from those submitted by the device manufacturer.

Marketing of the Performer X Turbo Kit using any identification other than that shown in this Executive Order or marketing of the Performer X Turbo Kit for an application other than those listed in this Executive Order shall be prohibited unless prior approval is obtained from the Air Resources Board.

Exemption of the Performer X Turbo Kit shall not be construed as exemption to sell, offer for sale, or advertise any component of the kit as an individual device.

This Executive Order does not constitute any opinion as to the effect the use of the Performer X Turbo Kit may have on any warranty either expressed or implied by the vehicle manufacturer.

This Executive Order is granted based on prior evaluation which determined that Edelbrock Corporation's Performer X Turbo Kit does not cause an adverse effect on emissions of selected Honda vehicles (D-215-59), nor does it affect the vehicles' ability to perform On-Board Diagnostic II (OBD II) system monitoring. The same effect on emissions and OBD II system monitoring is expected from use of the Performer X Turbo Kit on the vehicles listed in this Executive Order.

This Executive Order is granted based on submitted emissions test data which showed that the Edelbrock Corporation's Performer X Turbo Kit did not adversely affect tailpipe emissions during the Cold Start CVS-75 Federal Test Procedure. However, the Air Resources Board finds that reasonable grounds exist to believe that use of the Edelbrock Corporation's Performer X Turbo Kit may adversely affect emissions of motor vehicles when operating under conditions outside the parameters of the previously prescribed test procedures. Accordingly, the Air Resources Board reserves the right to conduct additional emission tests, in the future, as such tests are developed, that will more adequately measure emissions from all cycle phases. If such test results demonstrate that the Performer X Turbo Kit adversely affects emissions during off-cycle conditions (defined as those conditions which are beyond the parameters of the Cold-Start CVS-75 Federal Test Procedure), this Executive Order shall be effectively rescinded as of the date the test results are validated. Further, if such test results or other evidence provides the Air Resources Board with reason to suspect that the Performer X Turbo Kit will affect the durability of the emission control systems, Edelbrock Corporation shall be required to submit durability data to show that the durability of the vehicle emission control system is not, in fact, affected and/or that the add-on or modified part demonstrates adequate durability.

In addition to the foregoing, the Air Resources Board reserves the right in the future to review this Executive Order and the exemption provided herein to assure that the exempted add-on or modified part continues to meet the standards and procedures of Title 13, California Code of Regulations, Section 2222, et seq.

THIS EXECUTIVE ORDER DOES NOT CONSTITUTE A CERTIFICATION, ACCREDITATION, APPROVAL, OR ANY OTHER TYPE OF ENDORSEMENT BY THE AIR RESOURCES BOARD OF ANY CLAIMS OF THE APPLICANT CONCERNING ANTI-POLLUTION BENEFITS OR ANY ALLEGED BENEFITS OF THE PERFORMER X TURBO KIT.

No claim of any kind, such as "Approved by the Air Resources Board", may be made with respect to the action taken herein in any advertising or other oral or written communication.

Violation of any of the above conditions shall be grounds for revocation of this order. The order may be revoked only after a ten-day written notice of intention to revoke the order, in which period the holder of the order may request in writing a hearing to contest the proposed revocation. If a hearing is requested, it shall be held within ten days of receipt of the request and the order may not be revoked until a determination is made after the hearing that grounds for revocation exist.

Executed at El Monte, California, this 30 day of October 2006.

Annette Hebert, Chief  
Mobile Source Operations Division
