

EXECUTIVE ORDER D-660-326

Relating to Exemptions Under Section 27156 of the California Vehicle Code

Cobb Tuning Toyota Stage 1 Calibration

Pursuant to the authority vested in the California Air Resources Board by Section 27156 of the Vehicle Code; and

Pursuant to the authority vested in the undersigned by Section 39515 and Section 39516 of the Health and Safety Code and Executive Order G-19-095;

IT IS ORDERED AND RESOLVED: That installation of the Toyota Stage 1 Calibration, manufactured and marketed by Cobb Tuning, 2311 West Rundberg Lane, Suite 500, Austin, Texas 78758, has been found not to reduce the effectiveness of the applicable vehicle pollution control systems and, therefore, is exempt from the prohibitions of Section 27156 of the Vehicle Code for the vehicles as listed in Exhibit A.

The Toyota Stage1 Calibration is ECU reflash intended for use with specific fuel octane ratings. Calibrations are available for 87, 91, and 93 octane fuel and are designed for vehicles equipped with either a stock air filter or a high-flow panel air filter. Engine and transmission calibrations are installed to the ECU and TCM using the COBB Accessport, which connects to the vehicle through the OBD-II diagnostic port. Installation is completed by following the device's on-screen instructions. Available engine calibrations include Performance Tow 91, Performance Tow 93, Anti-Theft, Stage1 87, Stage1 91, and Stage1 93. Available transmission calibrations include Simulated Stock, COBB OEM+, and COBB Sport. In addition to calibration installation, the Accessport provides user-adjustable settings including Valet Mode, Dynamic Pedal Control, Auto Start/Stop, and Speedometer Adjustment for Tire Size. Valet Mode limits calculated accelerator pedal position to 30%, restricting maximum throttle to 30%. Dynamic Pedal Control allows adjustment of throttle sensitivity from -5 to +10, with negative values reducing sensitivity and positive values increasing sensitivity. Auto Start/Stop can be enabled or disabled through the device. Speedometer Adjustment for Tire Size allows speedometer calculations to be adjusted to account for changes in tire size.

This Executive Order is valid provided that the installation instructions for the Toyota Stage 1 Calibration will not recommend tuning the vehicle to specifications different from those specified by the vehicle manufacturer.

Changes made to the design or operating conditions of the Toyota Stage 1 Calibration, as exempted by the California Air Resources Board, that adversely affect the performance of the vehicle's emission control system shall invalidate this Executive Order.

This Executive Order shall not apply to any Toyota Stage 1 Calibration advertised, offered for sale, sold with, or installed on a new motor vehicle prior to or concurrent with transfer to an ultimate purchaser.

Marketing of the Toyota Stage 1 Calibration using any identification other than those shown in this Executive Order or marketing of the Toyota Stage 1 Calibration for an application other than those listed in this Executive Order shall be prohibited unless prior approval is obtained from the California Air Resources Board.

This Executive Order does not constitute any opinion as to the effect the use of the Toyota Stage 1 Calibration may have on any warranty, either expressed or implied by the vehicle manufacturer; or compliance with any other state, federal, or local law, such as safety equipment requirements or noise limitations.

Exemption of the Toyota Stage 1 Calibration shall not be construed as an exemption to sell, offer for sale, or advertise any component of the assembly as individual devices.

This Executive Order is granted based on information submitted by Cobb Tuning, including emissions test data.

The California Air Resources Board reserves the right in the future to review this Executive Order and the exemption provided herein to ensure that the exempted add-on or modified part continues to meet the standards and procedures of Title 13, California Code of Regulations, Section 2222, et seq. Further, if test results or other evidence provides the California Air Resources Board with reason to suspect that the Toyota Stage 1 Calibration will affect the durability of emission control systems, Cobb Tuning shall be required to submit durability data to show that the durability of vehicle emission control systems are not, in fact, affected and/or that the add-on or modified part demonstrates adequate durability.

THIS EXECUTIVE ORDER DOES NOT CONSTITUTE A CERTIFICATION, ACCREDITATION, APPROVAL, OR ANY OTHER TYPE OF ENDORSEMENT BY THE CALIFORNIA AIR RESOURCES BOARD OF ANY CLAIMS OF COBB TUNING CONCERNING ANTIPOLLUTION BENEFITS OR ANY ALLEGED BENEFITS OF THE TOYOTA STAGE 1 CALIBRATION.

No claim of any kind, such as "Approved by the California Air Resources Board", may be made with respect to the action taken herein in any advertising or other oral or written communication.

Violation of any of the above conditions shall be grounds for revocation of this order. The order may be revoked only after a ten-day written notice of intention to revoke the order, in which period the holder of the order may request in writing a hearing to contest the proposed revocation. If a hearing is requested, it shall be held within ten days of receipt of the request and the order may not be revoked until a determination is made after the hearing that grounds for revocation exist.

Executed on this 5th day of June 2026.

A handwritten signature in cursive script, appearing to read "Robin U. Lang for".

* ECU calibrations include the followings for above mentioned vehicles:

- Stage 1 (87 OCT or 91 RON)
- Stage 1 (91 OCT or 95 RON)
- Stage 1 (93 OCT or 98 RON)
- Stage 0
- Performance Tow (91 OCT or 95 RON)
- Performance Tow (93 OCT or 98 RON)
- Vehicle Anti-Theft Mode

Calibrations for Transmission module include:

- Simulated Stock
- COBB OEM+
- COBB Sport

** TC = Turbocharged
