

State of California
AIR RESOURCES BOARD

EXECUTIVE ORDER D-701-23

Relating to Exemptions Under Section 27156
of the California Vehicle Code

Pacific Performance Engineering
Diesel Fuel Lift Pump, Part Number 113050000

Pursuant to the authority vested in the Air Resources Board by Section 27156 of the Vehicle Code; and

Pursuant to the authority vested in the undersigned by Section 39515 and Section 39516 of the Health and Safety Code and Executive Order G-14-012;

IT IS ORDERED AND RESOLVED: That the installation of the Diesel Fuel Lift Pump, manufactured and marketed by Pacific Performance Engineering, 303 North Placentia Avenue, Fullerton, California 92831, has been found not to reduce the effectiveness of the applicable vehicle pollution control systems and, therefore, is exempt from the prohibitions of Section 27156 of the Vehicle Code for 2001 to 2016 model year General Motors trucks with a Duramax diesel engine, 2001 to 2016 model year Ford trucks with a Power Stroke diesel engine, and 2001 to 2016 model year Dodge trucks with a Cummins diesel engine.

The Diesel Fuel Lift Pump is an add on diesel fuel lift pump that is designed to be installed in series to the factory fuel pump and regulator. The add on part is designed to work with the stock fuel pump and regulator. **The Diesel Fuel Lift Pump has no mechanical or electrical user adjustments. No changes are made to any component of the stock engine for installation, including engine calibration.**

This Executive Order is valid provided that the installation instructions for the Diesel Fuel Lift Pump will not recommend tuning the vehicle to specifications different from those of the vehicle manufacturer.

Changes made to the design or operating conditions of the Diesel Fuel Lift Pump as exempt by the Air Resources Board, which adversely affect the performance of the vehicle's pollution control system shall invalidate this Executive Order.

Marketing of the Diesel Fuel Lift Pump using any identification other than that shown in this Executive Order or marketing of the Diesel Fuel Lift Pump for an application other than those listed in this Executive Order shall be prohibited unless prior approval is obtained from the Air Resources Board.

This Executive Order does not constitute any opinion as to the effect the use of the Diesel Fuel Lift Pump may have on any warranty either expressed or implied by the vehicle manufacturer.

This Executive Order is granted based on an engineering evaluation and information supplied by Pacific Performance Engineering on the Diesel Fuel Lift Pump. Fuel pressure is retained by the factory fuel pressure regulator in a stock setting.

The Air Resources Board reserves the right in the future to review this Executive Order and the exemption provided herein to assure that the exempted add-on or modified part continues to meet the standards and procedures of Title 13, California Code of Regulations, Section 2222, et seq.

THIS EXECUTIVE ORDER DOES NOT CONSTITUTE A CERTIFICATION, ACCREDITATION, APPROVAL, OR ANY OTHER TYPE OF ENDORSEMENT BY THE AIR RESOURCES BOARD OF ANY CLAIMS OF THE APPLICANT CONCERNING ANTI-POLLUTION BENEFITS OR ANY ALLEGED BENEFITS OF THE DIESEL FUEL LIFT PUMP.

No claim of any kind, such as "Approved by the Air Resources Board", may be made with respect to the action taken herein in any advertising or other oral or written communication.

Violation of any of the above conditions shall be grounds for revocation of this order. The order may be revoked only after a ten-day written notice of intention to revoke the order, in which period the holder of the order may request in writing a hearing to contest the proposed revocation. If a hearing is requested, it shall be held within ten days of receipt of the request and the order may not be revoked until a determination is made after the hearing that grounds for revocation exist.

Executed at El Monte, California, this 9th day of December 2016.

FOR Annette Hebert, Chief

Emissions Compliance, Automotive Regulations and Science Division
