Re: 2022 Scoping Plan Update – Engineered Carbon Removal Technical Workshop

Dear Chair Randolph and Members of the California Air Resources Board,

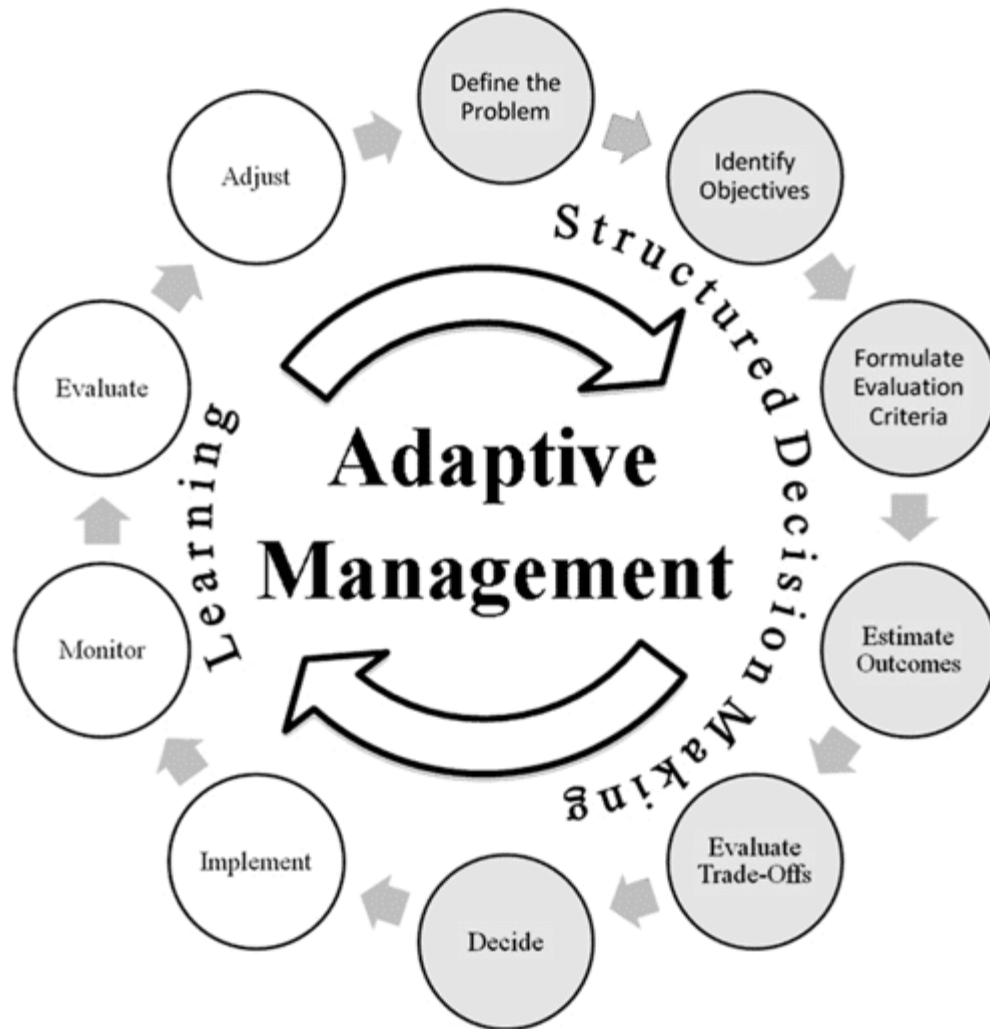

PSR-LA and our allies thank you for the opportunity to provide comments regarding engineered carbon removal through Carbon Capture, Utilization and Storage (CCUS) technologies as presented at CARB's public workshop on August 2, 2021. We urge CARB to reject techno-fix carbon removal strategies, including the ones that:

- A. Do not also reduce local air pollution which disproportionately harms and increases the cumulative health burdens faced by frontline and Environmental Justice (EJ) communities, and;
- B. Are unproven, unstable, unsafe and costly techno-fixes that incentivize the most polluting industries while keeping much-needed public dollars from going to the most critical solutions on the frontlines of human and ecological harm.
