ERRATA

TITLE 17. CALIFORNIA AIR RESOURCES BOARD

On July 20, 2009, the Air Resources Board released a "Notice of Public Availability of Modified Text and Availability of Additional Documents" for the proposed Low Carbon Fuel Standard. The deadline for public comment on the modified text and additional documents is August 19, 2009.

PLEASE BE ADVISED that Attachment 2, the modified regulation order, to the Notice of Public Availability of Modified Text and Availability of Additional Documents has a few minor errors, as described below. The errors are located on page 44, Table 7 (Carbon Intensity Lookup Table, section 95486(b)(1)) which is posted at the following website: <http://www.arb.ca.gov/regact/2009/lcfs09/lcfs09.htm>.

1. "Total" value for "Renewable Diesel (Conversion of tallow to renewable diesel)" should be "29.70" not "27.70." The direct emissions value of 29.70 is correct, the indirect is 0.0, so the total should be 29.70;

Also in Table 7, there are two extra row lines in the column labeled "Fuel."

2. The first extra line is immediately below "Biodiesel" – the end result is that "Biodiesel" should include the row with the pathway description of "Conversion of waste oils (Used Cooking Oil) to biodiesel (fatty acid methyl esters – FAME)."
3. The second extra row line is immediately below "Renewable Diesel" – the end result is that "Renewable Diesel" should include the row with the pathway description of "Conversion of tallow to renewable diesel."

The errata, including the attachment which illustrates the corrections, and the complete notice of public availability of modified text and availability of additional documents are available on ARB's website at the following address:

<http://www.arb.ca.gov/regact/2009/lcfs09/lcfs09.htm>.

Any questions regarding these corrections should be directed to Floyd Vergara, Manager, Industrial Section, at (916) 327-5986 or John Curtis, Manager of the Alternative Fuels Section, at (916) 323-2661.

For individuals with sensory disabilities, this document and other related material can be made available in Braille, large print, audiocassette, or computer disk. For assistance, please contact the Clerk of the Board at (916) 322-5594 as soon as possible.

The energy challenge facing California is real. Every Californian needs to take immediate action to reduce energy consumption. For a list of simple ways you can reduce demand and cut your energy costs see our website at www.arb.ca.gov
