Notice of Decision

Project Title: Advanced Clean Truck Regulation (SCH# 2018052041)
Project Location: Statewide
Public Meeting Date: June 25, 2020; Agenda Item #20-6-3
Project Description: The Advanced Clean Truck Regulation is a requirement for truck manufacturers to sell zero-emission trucks in California and a one-time requirement for large entities to report about their facilities, types of truck services used, and fleet of vehicles.

This notice is to advise that the California Air Resources Board (CARB or Board), as the lead agency, approved the project, identified above, on June 25, 2020 and has made the following determinations.

CARB prepared and certified an environmental analysis (EA) for the project in accordance with the requirements of CEQA and its certified regulatory program. (Cal. Code Regs., tit. 14, §15251, subd, (d).) The EA, included as an appendix to the Staff Report prepared for the project, concluded the project may result in significant adverse environmental impacts. Mitigation measures were made a condition of approval. A mitigation reporting or monitoring plan was not adopted for this project because CARB lacks the jurisdiction to implement the suggested mitigation measures and made findings in the EA to that effect, consistent with CEQA Guidelines section 15091(a)(2). The Board made CEQA findings pursuant to section 15091 of the CEQA Guidelines and adopted a statement of overriding considerations for this project pursuant to section 15093 of the CEQA Guidelines.

CARB staff prepared written responses to comments received during noticed public comment period that raised significant environmental impacts pertaining to this project. The written responses to these comments are included in the Response to Comments on the Draft Environmental Analysis for the Advanced Clean Truck Regulation. Before taking final action on the project, the Board considered written responses to these comments as required by CARB’s certified regulations. (Cal. Code Regs., tit. 17 § 60004.2(c)(2).)

This is to certify that the final EA with comments and responses and record of project approval is available to the General Public at the following locations:
