First Name: Eric

Last Name: Kramer

Email Address: 2greatteachers@gmail.com

Affiliation: CCA Channel Islands

Subject: New Regs.

Comment:

I have been fishing California waters both commercially and recreationally for over 60 years. I do not want the boats I go on to be burdened with your new regulations. It will put a lot of fisherman out of business. Sincerely, Eric Kramer

Comment:

Most sportboats have spent tens of thousands already repowering to cleaner tier 3 engines. These proposed changes will remove thousands of jobs and take millions of dollars from our economy.

First Name: Joe

Last Name: Russo

Email Address: Litethelamp13@aol.com

Affiliation: Boat owner

Subject: Newsoms emissions law

Comment:

As a father of two boys who enjoy the lifestyle of Sportfishing I write to you to ask that you not pass this law. I have taken both my boys out on overnight sportfishing boats from Santa Barbara to San Diego. They started going when they were just 10 years old and now they provide food for their families with the fish they catch. They learned boating rules and manners when fishing alongside other anglers and most importantly they learned respect. We have met many of the boat owners through the years and we consider them our friends. These owners are barely hanging on because of the pandemic years and are finally just getting by. If these owners are forced to install new motors into their boats or these new exhaust systems that run so hot that they would melt or burn a wood or fibreglass boat it will be the end for them. Sportfishing is a way of life for so many Californians and this new proposal will kill them. I ask that you please advise the governor that he please reconsider this action. These boat owners have already complied with installing new cleaner burning diesel motors just not to long ago. Why now do they want newer motors and exhaust systems that really make no sense in installing into a boat. It makes no sense what so ever. I thank you for your time in this delicate matter. Joe Russo

Comment:

To whom this may concern. I am composing this letter in hopes and wishes to keep California's fishery including commercial businesses and recreational fisheries open in the state of California. With these unfeasible requests thousands of jobs and owners would be out of business and out of a livelihood which is unfair. These requests that have been made to switch over admission system are unfeasible and are just downright not capable and or not have been tested to prove in safety and efficiency going forward. I suggest you reconsider postponing until further agreements can be agreed upon and feasible agreements can be agreed upon.

Comment:

Please make safety the top priority and mandate only technologies that have been proven at sea. In addition to safety concerns, the current proposal will put close to 80% of Sportfishing and whale watching boats out of compliance. Please adopt a more phased-in approach that puts safety first.

First Name: Mark

Last Name: Stillians

Email Address: markomacklin83@gmail.com

Affiliation: Recreational Angler

Subject: CHC2021 affecting Sportfishing and Whale Watching boats

Comment:

I'm emailing a request to eliminate, or modify pending emission decisions, so they better meet the needs of business owners and the general public. If business owners are forced out by costly upgrades, the general public will be excluded from ocean experiences. We usually choose fleet sportfishing/whale watching boats because we can't afford our own boat. The economics go well beyond the boats on the water. You know that restaurants, hotels, Gas stations, sporting goods dealers, and even the states ability to generate money to enhance State recreation opportunities would be affected negatively. If emissions and greenhouse gas reduction is the goal, allow a phase out over time, as existing engines die and need replacement. Re-powering marine engines is already a fairly frequent thing. Or maybe consider emissions testing for boats (to remain licensed) to manage gross polluters... There shouldn't be an industry wide mandated repower date. Phase it in. Thanks, Mark Stillians

Comment:

Please don't pass this new legislation on the boating industry. You are only pricing the average person out of being able to afford to go fishing, diving, or sight seeing.

I understand the purpose of the regulation, but wouldn't grandfathering the existing boats in and phasing in New boats. The small boat owners can then continue to make a living.

Please reconsider this extremely harsh legislation. I won't be able to afford to continue diving or fishing in the future under the proposed legislation. Also the bigger fleets would be a monopoly and charge whatever they want. Thank you

Last Name: latorre

Email Address: chris.latorre@gmail.com

Affiliation:

Subject: new regulations on ocean boat owners

Comment:

Here is a partial clip of an article written by a couple of local boat owners. It pretty much covers everything. I wish to express my dissatisfaction with these potential new rules.

"For as long as most people can remember, local passenger sportfishing, whale watching and eco-tourism boats have been introducing Californians to the Channel Islands, drawing thousands of visitors a year to our coastline. 410.1

However, this could soon change. The COVID-19 pandemic decimated the region's tourism and

hospitality industry, reducing visitor spending and erasing years of economic gain. Fortunately, family-owned boat businesses such as ours have been able to sustain operations. However, there is a looming 410.2

threat to our livelihood that will achieve what COVID-19 did not -- put us out of business.

Even though boat owners have been proactively reducing emissions by repowering their engines to the cleanest marine engines on the market today, the California Air Resources Board (CARB), a board appointed by Governor Newsom, has proposed engine emission regulations that require technology not developed for commercial passenger vessels, nor deemed safe at 410.3

sea.

What's more, CARB concluded that the modifications they require are not structurally safe for some types of boats, leading them to conclude that "vessel replacement will be likely, especially the categories with wood or fiberglass vessels." This is a stunning admission, for more than 80% of all passenger sportfishing and whale watching boats are made from these materials. 410.3

So, CARB has concluded that boat owners like us should be mandated to build new boats as soon as 2023, which would at least double the cost of passenger tickets. 410.4

Our existing boats will be deemed illegal and have no resale value. Even in the best of times, no small business can have their most valuable asset made worthless and then be told to go find an additional loan to rebuild their business. 410.5

Then there are the unresolved safety issues. CARB's regulations require engines to have equipment installed that has not been thoroughly tested at sea. It is common for this type of equipment on trucks and farm equipment to create significant heat and severe back pressure on engines. Blocked exhaust systems may be manageable on land, but not at sea. Passengers could be adrift at sea for hours as boat crews try to recover the system. The worst-case scenario of a failed engine would risk the lives of passengers and crew." 410.6

Comment:

most of my 72 yrs I have frequented sportfishing boats. I have also worked on them. To lose this recreational resource and jobs would be devastating for Southern California. Let's be sensible. I, as a retired person, need some time on the water to recharge my batteries. I am on a fixed income and can not afford to pay 2-3 times a much for a days fishing. Please reconsider this nonsense.

Comment:

Mandating the changing of engines of sportsfishing boats in California would be so costly it would be disastrous to the sportsfishing industry and would most likely put it out of business. The cost of these proposed engines would be double what regular engines now cost.

Subject: CHC2021 Save Our Boats

Comment:

I am against the Newsom Administration proposed passenger boat regulations that require new engines and technology that is not feasible from a safety, financial or operational standpoint. The proposed regulations will likely remove passenger boats made of wood and fiberglass from service. Boat owners will be forced out of business. This would apply to over 80% of all boats. As boats go out of business millions of Californians will be denied access to the open sea and significant economic harm will come to coastal communities that depend on outdoor tourism.

### **Comment 414 for Proposed Amendments to Commercial Harbor Craft Regulation (chc2021) - 45 Day.**

First Name: Karen

Last Name: Collier

Email Address: KarenS62@Reagan.com

Affiliation: Scuba Diver

Subject: CHC2021 Save Our Boats

Comment:

It has been brought to the attention of the Scuba diving community that the Newsom Administration has proposed passenger boat regulations that require new engines and technology that is not feasible from a safety, financial or operational standpoint.

Implementation of these regulations without a conscientious and concerted effort to ensure that they will not have a destructive and devastating effect on the entire boating industry in California is unacceptable.

Knowing how concerned the industry as a whole is to ensure not only the safety of their customers but also to care for the Oceans, waterways and general environment in which they operate it makes no common sense to consider the draconian types of proposed regulations without the direct input, advise and counseling from business owners directly involved in this industry.

As a scuba diver I know that the regulations being proposed would absolutely destroy the entire scuba industry in California which along with the destruction of the entire boating industry will have an unrecoverable negative impact on the entire State

Please do not move forward without involving the business owners who can give the best, most timely data necessary to make reasonable and responsible decisions

Comment:

Putting our precious sportfishing fleet out of business is absurd. I am a lifelong passenger in San Diego. Boats have a loyal following world wide. Practical solution would be to grandfather older boats and require new boats to meet CARB regs. We need a common sense solution that is equitable for all parties involved. Some environmental regs reek of Govt overreach. This would devastate an entire industry that depends on sportfishing. Please reconsider!!!

Subject: Commercial Harbor Craft Regulation CHC2021 Save Our Boats

Comment:

I as that you do not enact regulations that will have a negative impact on Sportfishing. There are many communities that rely on t his industry for a living.

Any regulation that will remove wood or fiberglass hull boats from the fleet should be balanced out with grants and low interest loans to replace the boats. There also needs to be a grace period to allow for owners to acquire new boats.

Additionally this regulation will increase the size of the 6-pack and private fleet to a point that exceeds current issues casused by party boats.

Comment:

This email is a emphatic plea for CARB to reject Gov Newsoms plan that will shut down Sportfishing and whale watching charters across the state. His proposal will have a huge negative economic impact on coastal landings across the state and more importantly will deny thousand of people the only access to an off shore experience. This proposal is without thought and unfair. Please do the right thing and reject the proposal.

Subject: "CHC2021 Save Our Boats"

Comment:

Dear CARB,

This power grab to force an emission changes to sportfishing and whale watching tourism boating is coming from yet another bureaucracy gone awry.

None of this meeting any standard of rational thought or behavior. Exactly how much air pollution will you be saving us from? And what is it replaced by?

We the public know the real goal, get fishermen off of the water so they cannot fish.

It seems like you just don't understand where the fish on your plate at a restaurant comes from. Or what it feels like to hook up on a beautiful fish and eat it for dinner.

As the adage goes, don't you have bigger fish to fry with so many container ships idling off shore?

This is a bad policy, by bad bureaucrats who are out of touch with reality.

With Best Regards,  
Howard

Comment:

I believe these newly proposed regulations are a very misguided and will only help in putting many people out of work as well as destroying the recreational opportunities for millions of Californians. Clean air is important but there are many other industries that pollute more that should be looked at before this relative handful of boats. This is truly ludicrous and it will be a travesty if you approve it.

Comment:

My name is Mitch Gutierrez and I have been a fisherman all my life. I ask that you reconsider this proposal to have fishing vessels update their fleet with new engines, removal of certain wood boats, etc. A lot of boats are family owned and would be a financial hardship to meet your new requirements. Also if the ARB follows through it will create a huge economic problem throughout the State as a whole. Please reconsider. Thank you Mitch Gutierrez

### Comment 428 for Proposed Amendments to Commercial Harbor Craft Regulation (chc2021) - 45 Day.

First Name: Tom

Last Name: Geldner

Email Address: tom@geldner.com

Affiliation: Recreational fisherman

Subject: CHC2021 - Save our boats and recreational fishing

Comment:

Dear CARB,

I am both a recreational fisherman and a supporter of sustainability. In fact, I used to be the Director of Marketing for the California Center for Sustainable Energy (aka CSE), a large NGO that promotes and sponsors green energy and renewables. HOWEVER, what is being proposed under the Commercial Harbor Craft regulations goes WAY beyond anything I've ever come across in my 20 years of monitoring rule making.

It's like using multiple sledge hammers to kill an ant. Not only is the technology virtually unobtainable and extraordinarily expensive, it has the potential to scrap wooden and fiberglass vessels removing hundreds if not thousands of working boats from service. 428.1

Off-shore recreational fishing is largely a working class sport. While a few boats may cater to the wealthy, the vast majority of participants are ordinary folks who pay \$50 to go on half-day trips or \$250 to go on overnight trips with their friends and families. These "party" boats serve up to 50 anglers at a time.

Should your new rules go into effect, it would literally triple to quadruple the price of trips or simply cause operators to stop altogether in California while scrapping perfectly good craft. 428.2

How does this serve the public in any way? Sportfishing is NOT a

major source of air pollution -- especially since many trips only leave from a California harbor and travel well beyond the 3 mile state limits and 12 mile US limits.

428.3

Again, unless you deliberately want to put sportfishing out of business, please reconsider your actions.

Subject: Commercial Harbor Craft Regulation

Comment:

Dear Board,

We are longtime residents of San Diego and support the local recreational Fishing boats. We go on 1/2 day and full day trips. We enjoy being out at sea and catching a few local fish.

I have also participated in fishing trips donated to Wounded Warriors. We support the Rollo trips given to many youngsters who have never experienced fishing or the Pacific ocean.

We hope that the board will look at the new regulations and help us keep a fleet of fishing boats. They are mostly family businesses that don't have large amounts of money to rebuild their boats. They all run diesel engines and don't create a large amount of pollution compared to many other users.

Fishing boats are an important part of San Diego history and they are an important piece of the San Diego economy.

Please help them survive.

Claude Lubin

Subject: why i cant aford to pay more

Comment:

I cant afford to pay more to go out sport fishing. I go out on sports fishing boats every 10 days. I pay \$60 each time It is necessary for my mental health to do this. Have you done a study to see how these proposed changes would effect sports boats customers mental health.? also if this happens it will effect people living in coloured and poor neighborhoods way more than people in affluent neighborhoods?

Has there been a study done on how this will effect different neighborhoods?

Please answer my questions and please send a copy of my e-mail to governor Newsome

Thanks Keith Langman

Subject: Sportfishing

Comment:

New engines and technology mandates along with removal of wood boats will cripple our passenger sport fishing in California. Not only will these boat owners not be able to afford these upgrades but the cost to fisherman will be prohibitive.

Southern California relies on sportfishing for its coastal communities. Many families will lose their way of life. We as Californians are connected to the ocean and this mandate would severely limit our access to offshore fishing.

Subject: Protect Sportfishing

Comment:

To Whom It May Concern:

I understand there is a proposed regulation to passenger sportfishing and whale watching boats here in California that could hurt many many boat owners and fishing families. I was born and raised in San Clemente, CA and some of my best memories growing up were on many of those boats. Dana Point is arguably the Whale Watching capital of the North America and people from all around the world fly here annually to see these beautiful creatures just miles off the coast. I still try and get down to San Diego at least a couple times a year to jump on one of the fishing boats in hopes of catching local dorado or tuna. I now have two babies of my own and I hope to be able to teach them the same things my dad taught me; but if this regulation proposal is passed, I'm not sure if it will be possible. Please - and I know I am speaking on the behalf of many other people with similar memories and desires - re consider this proposal and allow the fishing and whale watching boats to continue their normal operations for the generations to come.

Thanks in advance.

Comment:

The California fishery should not be targetted with such hard requirements as is proposed. This will not only hurt the small business charters but big buisness fisheries that support thousands of resturants local and abroad. The cost of this proposal will only be pasted along to every consumer with no regard to financial standing if the fisheries are forced to make these outlandish unsupported requirements.

STOP THE MADNESS

Subject: Taking away another pleasure

Comment:

To the clerk of the board- my name is Robert I grew up in Thousand Oaks fishing on sportfishing boats out of ventura captain Jack's in particular years of fine memories, now I live in Las Vegas and drive to San diego for sport fishing out of pt. Loma my life's dream is to get a bluefin tuna over 200lbs if this bill passes that will be the end of my dream and future memories I along with millions of other fisherman have a patio that's only satisfied by going Offshore and fishing on the boats this energy bill will put out of business, I'm guessing that the people in charge of passing this bill don't share the same pations as the people who enjoy the fishing on the socal fleet of boats, for the biggest part of us aren't rich and can't afford to have our own boat so our only access to the pacific is with the fleet, if you take this away from us just think what it would be like if someone took away something from you that you were very pationate about and didn't have a reason you thought was reasonable.

Subject: Harbor Craft Regulation

Comment:

These proposed regulations would cripple an industry that brings millions of dollars into the local community. These regulations would require sportfishing boats to be completely rebuilt, which is economically unfeasible. Not only is the material not available to build these 50-year-old boats, to support these tier 4 engines, but a new vessel would also cost an insane amount of money that these small businesses just don't have. Not only would the 4 major sportfishing landings that have 100s of boats that fish every day out of business, but it would also cripple the local community. The San Diego sportfishing supports everything from restaurants, hotels, the tackle industry, food service industry indirectly. Not to mention the thousands of people that work directly at the landings and the boats.

Subject: Don't Kill The Southern California Fishing Industry

Comment:

To the Clerk of the Board

I fish. I fish a lot. After all of the things that I have to deal with on the day to day, racism, politics, sexual equality, Covid, and any one of the many things the news uses to distract us from the real issues, I fish to get away. I fish to have fun. I fish to relax. I fish to eat quality fresh fish.

This issue the news media could not distract me from. The regulations that you want to put in place to control emissions, which is a very serious issue I must admit, will kill the industry. It will make the industry better. It will kill it. I can't afford the price increase. I am barely able to afford the price increase with the Covid shut down.

My favorite boats will be dry docked permanently. The few boats that are left will not be able to keep up with the demand of our growing community of anglers.

The fishing industry is not made up of corporations. It is made up of family owned businesses. I don't think any of them own more than two boats. Three at the most.

I need fishing. I need it bad. I can't imaging NOT being able to go our for big tuna or even the local kelp beds for local bass.

Please help me.

Sincerely,

Elry Phillips

Comment:

Please consider recreational sport fishing boats to be in a class of their own for these new requirements. There are far fewer boats in these fleets that operate much differently than the commercial fishing boats. They do not have the annual operating income compared to the commercial fleet therefore should be recategorized and with less restrictive measures imposed.

Subject: stop bothering the sportfishing industry

Comment:

Many families and customers have counted on getting fresh fish products from the boats. Sports fishing itself is a wonderful way for landlubbers to experience the fresh air and sea for themselves. It also shows an industry that young people can have a job beside flipping burgers. It is important to our whole city to continue with them being active. The new regulations want engines that are not even available yet ! The amendment would want to put a brand new engine in a 1949 chevy where nothing adapts or works ! These are small businessmen and women who have worked their whole life to provide for their families. Please DO NOT take away their livelihood and our fresh fish !

Thank you

Subject: Proposed Amendments to the Commercial Harbor Craft Regulation

Comment:

I am a fisherman that has taught fishing by my father and I in turn have taught my children and my grandchildren to fish. We have been going on boats from various ports in California. The boats we go on are open party boats. Either half or three-quarter day boats. The price to go on these boats is affordable as long as we save up for them. Requiring boat owners to upgrade their boats (without some govt funding) will force boat owners out of business or force the cost of boat upgrades on to fisherman like me. Raising prices of boat tickets will result in fewer trips or eliminate this recreational fishing opportunities for families like mine. If upgrades are approved, at least funding for boat owners need to be approved along with the upgrades.

Comment:

It is insane to regulate commercial crafts out of business when the technology is not affordable to keep businesses afloat.

I go on whale watchings tours which would be unable to recover costs of the amendment. The sport fishing boat owners would not be able to double the fees!

Governor Newsom sits behind a desk in Sacramento whi is unwilling to investigate this technology and how it will disrupt revenue, business and leisure activities.

I protest the amentment entirely.

I have been fishing from Sportfishing boats my entire life. My children and now my grandchildren have learned fishing with me. Sportfishing provides food for the family and friends and is unique source of recreation.

What CARB is proposing for fishing vessels will ruin the lives of thousands of businesses that are connected both directly and indirectly to sportfishing.

Comment:

do not adopt, change or modify any regulations regarding the operations of sport fishing and sighting boats on the california coast. any changes will have a negative impact on both the boat operators and the general public. i do not want to see the industry destroyed due to unnecessary/over regulation. we do not need any more people out of work in our state. further the boat owners feed business tax revenue into the states economy which would be lost to the state if this industry dies out over the proposed new regulations. it would be a lose-lose situation for all californians to be sure!!!

from a life long californian and fisherman who enjoys the sea....

Comment:

As a lifetime (more than 5 decades) California fisherman I believe this misguided measure should not go forward. It is impractical and undue hardship on the men/women and families that make there living from the ocean. I believe that if this measure continues it will effectively kill the sport fishing industry that my father introduced to me and I have introduced to and participate in with my son. My grandchildren are just becoming of an age where I am ready to introduce them to the delicious and wonderful world of ocean sportfishing. Do not deny me and many others that support the charter fishing industry this pleasure by requiring these unreasonable restrictions on small business/boat owners.

Comment:

NO NO NO NO NO on this VERY BAD IDEA, with lofty but misguided intentions!!!!

We Americans INNOVATE our way out of problems, like pollution & climate change. This is one more Wealthy Elite Idea to eliminate blue collar jobs in the fishing & other water-way businesses.

Please kill this Bill.

Instead, invest in businesses that capture carbon and clean up the water.

Thank you.

Subject: CHC2021 Save Our Boats"

Comment:

Sportfishing operations in the state will be extinguished by the proposed new regulation. The industry as we know it will cease to exist. This will deny the majority of people the ability to enjoy and benefit from the use of the public resource. Only the very rich will be able to participate, denying the rights of low income families to participate for enjoyment and sustenance. Compared to the pollution caused by cargo ships the impact of sportfishing boats on air quality is very very small.

I know several owners that have already upgraded to tier 4 engines which are very clean running, there is virtually no exhaust odor from these engines. Adding the requirement for tier 5 would put most of them out of business. CARB should concentrate on the real "Gross Polluters" that are cargo ships.

Comment:

The proposed new regulations towards sports fishing will have wideranging implications.

Destroys a way of life and those that make a living in this industry.

Enjoying a fishing trip will become a thing of the past. Itll to expensive. Nobody will be able afford it.

And the state will lose untold amount of dollars in revenues.

This proposal will spread like covid to other states.

Comment:

I will not be able to afford higher prices forced to customers of sport boats if the proposed regulations are passed. Please pass higher taxes income pressures on to other industries as the fishing industry is already too expensive for most of us who make a modest living and like to go catch fresh healthy fish meat for ourselves.

Subject: Proposed Commercial Harbor Craft Regulations

Comment:

I'm a deep sea fisherman and I plead with you not to pass the Proposed Amendments to the Commercial Harbor Craft Regulations. The owners of these boats can't afford to implement these new regulation. They will have to raise their prices that means they will pass them on to us the public. They have already raised their prices because of the restrictions of Covid 19. I know that I being on a fixed income will not afford to go as much as I do now if prices are increased. Please look at the economic impacts this will have on these boat owner and the surrounding businesses that rely on this sport fishing industry.

Comment:

Although I understand the idea of cleaner air this bill singles out the small business owners of the sport fishing industry. They will have to go out of business and this would essentially close the sport fishing industry

I have been utilizing these services my entire life and the thought of not having it there for my kids and grandkids is heartbreaking. This is a ridiculous bill that should be stopped in its tracks.

Subject: Proposed Regulations Impact

Comment:

Hello,

I am writing to express my concerns with the proposed new clean air regulations. I am completely on-board with doing what we can to maintain a clean coastline. I absolutely love the beauty of our oceans. However, it seems as though these regulations are being forced without much consideration to all stakeholders. I have been a lifelong angler. I love the fishing off our coast, and i love the fishing community here. I have family members whose only business is in the fishing industry. I am deeply concern about the effects that the new regulations could have on all of us. I don't want to see my family members loose their livelihood. I do not want to see other boat owners loose their boats. I want to continue being able to fish of this coast. These new regulations will jeopardize all of this. We need to approach this issue in a way that is sensitive to all of those that will be affected. We can achieve our clean air goals, but also balance the needs of those who will be bearing the brunt of the regulation changes.

Comment:

I appreciate your efforts for clean air but the cost to the Sportfishing industry is excessive. Many Sportfishing operations barely make ends meet and this will put many operators out of business.along with many support businesses too.

May I suggest a phase in of these regulations and Federal or State grants to provide funding for vessels/motors.

Comment:

Hello this amendment if it is passed will harm many peoples tradition of taking younger family members and friends out for a day to learn to feed themselves and learn good values. The impact of a few boats engines on the environment is not worth the loss it will impose on the people of the community, not to mention the lost revenue of many hotels and small businesses along California's coast who depend in part on ocean fisherman. Efforts should be spend elsewhere to help clean up the environment. Chris Martin long time fisherman.

This bill CHC2021 is a cancer to all the millions of Sport and Commercial Fishing Public, Boat Owners and Employees. It further would effect million\$ in lost revenue for Landings, Boats, Tackle Shops and California Manufactures. All of the boats I've fished on for year had repowered more fuel efficient/low pollution engines a long time ago. OUT on the ocean, we enjoy FRESH CLEAN AIR, and the boats we fish on contribute little if any pollution to the Environment. This bill is a disaster to all of of who fish, DO NOT SIGN THIS LOPSIDED BILL PLEASE

Comment:

I want to express my concern and opposition to the proposed regulations requiring the sportfishing fleet to install new motors, which if I'm not mistaken, don't exist as I type this message. I'm in favor of protecting the environment, but there are other areas that should be the focus. A compromise is certainly attainable, if the parties affected are willing to sit down together and discuss the issue.

Subject: CARB proposal

Comment:

I am writing in regards to the CARB requirements that are being brought up for the possible future.

I, like many of us boat owners and crewmen have grown up on the water and have made this our main source of income as well as a direction for retirement when that time would come.

We have raised families with these vessels and have provided a service in which we take pride in what we do.

With the future unknown with the looming possible requirements, our future is a giant question mark and our families and crewmen will be without a job to support their families.

Please consider a reasonable solution that will not bankrupt the fleet to meet requirements.

First Name: Jeffrey

Last Name: Jones

Email Address: fungjones@sbcglobal.net

Affiliation: Citizen of California

Subject: Economic impact of commercial harbor craft proposed amendments

Comment:

I understand that the strengthening of air quality requirements for sport fishing boats will substantially increase the cost of procuring and operating these vessels. This cost must be passed on to the paying customers. I am a frequent fisherman on these boats and, while I might be able to afford a cost increase, many will not. Sport fishing boats are the only places I know where people of all nationalities, ethnicities, and social economic status freely mingle and help each other, a sort of racial and economic level playing field. For many, this is their primary entertainment and an important food source.

I am a firm believer in working to enhance air quality. It seems hard to believe that the few sport fishing boats operating in California waters, most or all of which have already been repowered to reduce emissions in the past few years, would have a significant impact on air quality if they moved to the proposed tier.

Please carefully consider the economic impact of this decision on the diverse people who take part in recreational sport fishing using commercial boats. This activity should be encouraged, not limited by unnecessary cost.

Comment:

Hello,

We have a wonderful fishery here in Southern California. I love taking my kids fishing, so if you continue with these regulations this will put the sport fishing boats out of Business or make the prices of tickets twice three times as much and I will not be able to afford taking my kids out fishing. So please don't sink the fishing boats.

Best regards,

Subject: "CHC2021 Save Our Boats"

Comment:

I am one of thousands of people who enjoy taking a sport fishing trip each year. The boat I choose is a family business and their standards are high. Most sport fishing operations are single family run and they provide a great way for people to enjoy our waterways while catching fresh fish.

It would be a crime to put these families, many who have been fisherman for generations, out of business. If their boats become illegal, they have lost both their livelihood and the major investment they have made in their boat.

Even if they were able to purchase a "compliant" vessel, no one would want to pay the fees (which I am told might need to double) to go fishing. They are expensive now, but with fuel on the rise, they are not getting rich. This regulation, if it passes will kill the industry and disappoint thousands of Californians.

Please do not pass this legislation! Keep sport fishing alive for us all to enjoy. IF at he California Air Resources Board is serious, it would instead outlaw wood burning ovens, and set aside funds to enforce the regulation. Don't pick on the fisherman!

Subject: CHC2021 Save Our Boats

Comment:

Hello, as an avid angler for over 25 years I feel that these new proposed regulations are unreasonable as far as the time that is being given to comply with the necessary changes. In this economic climate we are in, Ca and Californians can't afford to take a huge financial fall in an industry that provides so many jobs, revenue and tourism. There are so many people that come here to fish and whale watch from all over the country as well as foreigners. These would probably affect dive boats as well. Prices have already risen steadily because of gas prices as well as limiting passengers due to covid regulations and safety. I simply as well as other people I know could not afford to pay double fares in the near future.

488.1

Prices have already risen steadily because of gas prices as well as limiting passengers due to covid regulations and safety. I simply as well as other people I know could not afford to pay double fares in the near future.

488.2

The sportfishing and whale watching industry leaves such a small environmental footprint compared to gross offenders like commercial fishers, tankers as well as trains, plants and factories, cars and trucks etc. More regulations should be directed at the head of the snake not its tail.

488.3

Fishing has been an almost life long passion for myself, family and friends. As a former marine bio major student at csulb, our waters and shores have been my sanctuary, my zen, my connection with nature. I try to take as many family and friends fishing whenever possible. They love the fish I bring home and ensure that nothing goes to waste. I regret to think that this passion I love so much would be taken away from me and my future children. Fyi I currently contribute thousands of dollars per year to the fishing industry as well as its connecting sectors. To think I meet so many anglers

488.4

that fish our boats double sometimes ten fold what I contribute monetarily to our fleet.

Again i urge you to consider the kind of economic impact this will have on workers, anglers, tourism and our beloved state. I beg the question of how many sectors this would affect. Aviation, car rentals, hotels, restaurants, parking lots, fish processing and canning, tackle shops, online sales, bait barges, mechanics, as well as maybe the department of fish and game. A practical solution would be to allow more time for boat owners to make the changes over a reasonable period that would not cripple the fleet as well as severely inhibit anglers from enjoying our ocean due to excessive fares. Please and thank you for your time.

488.5

488.6

Subject: Killing another Industry

Comment:

How many more businesses, families, and outdoor enthusiasts will suffer with another industry being decimated by state government by way of draconian regulation. Destruction is all that California politicians and their self serving agencies know. I don't expect that this message will do any good to change carbs mind.

Comment:

Do not adopt regulations hindering sport fishing boats. The opportunity of sport fishing is precious and we need to encourage more people to sport fish. Adoption of emissions regulations for non highway engines on sport boats is cost excessive. I want to take my grand kids sport fishing on my boats

Subject: CHC2021 Save Our Boats

Comment:

I urge CARB board members to stop proposed regulation requiring boat owners to upgrade engines. As an Ocean fisherman, I depend on the sportfishing industry to offer a recreation activity for myself and family. If boat owners are forced to upgrade engines, it would not be economical for my family to afford cost increases passed along to customers. Cost in California are already the highest and additional increases in outdoor recreation will force many to move out of state.

Please do not force owners to upgrade and force economic tragedy to boat owners and customers.

Thank you

Subject: Any.

Comment:

I have taken my daughter deepsea fishing many times when she was younger and she absolutely loved it!!! Every summer her and I went camping and fishing in the mountains, I love the outdoors and my daughter was raised to appreciate what nature has to offer us. The deepsea adventures were always a bonus. I had no problem paying the fee to a charter that would take us out on the ocean and fish and o always tipped well because I appreciate all the crew does. To destroy the off shore charter industries would be devastating, not only to the people that appreciate and enjoy, but also to the people and families that depend on it.

Please do not impose the regulations for our fishing boats. My husband and I love going fishing on the charter boats and they will not survive this. The public will not be able to go fishing on these boats if the regulations go through and the cost is passed on to us. Regulate the cargo ships and cruise ships instead.

Clerk Of The Board.

Hello Sir/ Madam i hope you're doing well

I am writing you this email to let you know my opposition to the CHC2021 potential regulations that will affect my freedoms to fish at a affordable price in the ocean, lakes and rivers of this already over regulated state of CA. I hope our voices are heard and your board will will on a different way at economically beaten fishing boat industry. Again I am opposing the proposed regulations on emissions for the CA. Boating Industry.

God Bless you all.

Comment:

I have a masters degree in marine biology from Stanford U, and have always been a staunch conservationist. Given that I still believe that the proposed requirement for fishing and whale-watching boats to get tier 4 engines installed is completely unfair and will result in the destruction of the local recreational fishing industry. The boats are not able to support such engines and the owners certainly cannot afford to purchase new boats and stay in business. The current fleet should be grandfathered in. I support many conservation groups that are working to save our oceans and I also love to fish for salmon on a local party boat. Please don't destroy our local fishery and whale-watching fleet. Participation in the activities provided by these boats turns people into conservationists. We don't want to lose that.

Subject: targeted carb diesel emissions standards

Comment:

i feel your goals to try and compel the passenger carrying fleet of sport fishing boats plying California's waters to be unfair to the owner/operators that make up the lions share of sport boats. it is too bad there are no technologies that have been born out to work within the confines of boats.(work on ships, they are bigger). technology will be developed that will get you to your goals, but you should allow the tech to catch up you your mandates. remember, your ideas have been driven by any real consensus. just your "board". dont push it.

Subject: CHC 2021 Save our boats

Comment:

Charter fishing boats along our Calif coast provide access for fisherman to enjoy the outdoors at sea and bring home quality fresh Iscaught fish for family to enjoy. Fishing liscence of \$50.00 annual and average \$200.00 boat ticket for all day fishing trip is affordable for couple season trios. Cost of boat ticket would triple w/ new engine specs for charter boats and major loss to supporting fishing agencies like tackle stores statewide that provide saltwater tackle. Please reconsider this engine requirement for charter boats. Thank you, Ernie Kost

Subject: CHC 2021 Save Our Boats

Comment:

I am a retired police officer of 32 years of service. Unlike many retirees that I know who have fled this state, I have stayed in California mostly because of the wonderful fishing I do as a hobby.

I mostly fish on overnight to 2 day fishing boats for the best offshore fishing in the US. I frequent Fishermans Landing, H&M Landing, Point Loma Landing and Seaforth out of San Diego. Closer to home I also frequent Newport, Long Beach, 22nd Street and Oxnard (Cisco's) Landings. I fish on these boats at least twice a month and supply my family, friends and neighbors with fresh fish. My father and grandfather taught me how to fish and took me out on boats since I was 3 years old. I have passed on this tradition of love for the ocean to my three kids who are adults and avid fisherman now. We all purchase fishing licenses every year and frequent all the local establishments including restaurants, gas stations, grocery stores, etc, along the coastline when we prepare to go out on our fishing charters. We frequent all the tackle shops and sporting good stores purchasing gear for our specialized fishing trips throughout the year.

My fellow anglers and family are worried about any new restrictions on our gracious boat owners who are already making sacrifices to make ends meet and to safely serve all the anglers that board them on a regular basis. There are literally thousands of anglers boarding these boats daily that will oppose any new restrictions on our boat owners! Please reconsider any future restrictions!

Hello my name is peter I just wanted to reach Because I love sport fishing, And the carb emissions Will mess everything up for everyone that loves sport fishing and whale watching. This is the only thing that keeps me out of trouble. Everyone enjoys the water. I really want my kids to see sport fishing in the future. But if the emission laws follow through this will never happen.I hope this message makes you understand what we go through. I hope do you guys understand what the mission of us can do to us and thank you for understanding my situation I am reading my message thank you again Peter,

Comment:

The proposal would greatly damage recreational fishing in ocean waters that hundreds of thousand of people do each year. I request that rather than destroy fishing boat owners and their families which will also destroy or greatly reduce family fishing, you continue to permit wood and fiberglass commercial fishing boats. Thank you

Comment:

I think your decision to recommend making the charter boats to retool or buy a metal boat will put them all out of business. it seems like your board and Gov. Newsom have the same agenda, force the whole state to lose small businesses. Whale watching and sport fishing add to our states economy in a positive way.

Subject: California gov't attempt to destroy party boat fishing

Comment:

Please look into all the aspects of the changes you wish to change in the party boat fishing industry which will ruin the livelihood of many, many people and to those who come to Ca. to fish!!!! There has to be some humanity included in your decision. I implore you to examine this issue with your heart as well as your mind.

Thanks for your consideration.

Dr. Paul K. Schiff

Subject: Carb Proposed Regulations Sport Fishing Boats

Comment:

This new regulation will definitely ruin the sport and commercial fishing industry . It will definitely ruin sport fishing for all west coast fishermen. Also it would definitely bankrupt many related businesses and cost the state millions or maybe billions in tax revenues. Many kids who have just started fishing may never be able to experience fishing on a sport boat. I personally know many boat owners who would have to shut down their business because of this regulation and loose their only source of revenue.This regulation would certainly cause lots of revenue for the tourist industry in California, with the lost of sport fishing, whale watching,harbor cruises, and the lost of fresh locally caught fish in the restaurants in California. The fishing industry on the west coast in California has such a long history in the sport and commercial fishery dating back before the war. If this bill passes many lives will be ruined and business lost. PLEASE DO NOT PASS THIS BILL.

Comment:

I am so sick and tired of government, under the guise of claiming a point to be just, has screwed everything up under the label of saving something from its future demise from our actions today. The pompous strutting of these swelled heads, ATTEMPTING TO IMPOSE their thinking on the majority of people.

Air pollution being one example. A single volcano releases more contaminants into the air per year than all of mankind does.

Ocean fishing is a very important part of peoples lives. The last thing the Americans need is more regulations that ruin Charter boat jobs and recreational fishing, whale watching, and scuba diving.

Comment:

Please do not impose these requirements on these sportfishing boats, it's way too expensive to implement these changes \$ would bankrupt most all fishing & whale watch boats!  
What's more important is the safety factor while the regeneration is happening, it can catch fire & catching fire 100 miles off the coast is not a good thing!

Sincerely, D Dargatz

Comment:

Growing up I watched in envy my child hood friend go ocean fishing with his father. I had no idea what it would be like outside my imagination. The moment I was old enough to get my self to a boat to experience this I did. The waves were to this day Ive ever been in and the fishing was horrible. I was immediately hooked (no pun intended). This was the greatest thing I had done and changed my life for ever. At that point a kid from a bad environment found something to work towards and stay out of trouble. If this passes so many others my not find that outlet to keep themselves from their environment that could lead to a path of no good. I found out how hard people in this world work for so little pay and will forever make an impression on me.

Comment:

I am writing to ask that you reconsider implementing legislation that will effectively shut down the recreational sport fishing industry as well as whale watching operations in California. While I truly appreciate that we need to place limits on the dispersal of emissions to stem the adverse affects of climate change, this proposal is not the solution. Small businesses operating recreational fishing vessels are but a small percentage of a much larger problem. But as with many regulations, these businesses do not pose a political cost to decision makers as is the case with hoisting these regulations on well financed and influential corporations. Give the little guy a break. Set realistic and reasonable expectations so that implementation of these rules as currently considered do not wipe out businesses that offer sportsmen and women along with their kids to enjoy the great outdoor opportunities that our state has offered to so many generations of Californians. Thank you.

Subject: Sport fishing passanger boats

Comment:

As a passanger on multday fishing boats for over 10 years i respectfully urge CARB to reconsider the new regulations to the sportfishing fleet. The owners of the boats and crew are environmental thoughtful and respectful that I have witnessed. After all it is there livelihood and would like to keep it alive. The fishing fleet is something that has been passed down from generation after generation not just as owners but ir passanger to ground the fleet will remove access to the open ocean for a lot of passangers like me and end faimly traditions for those that meet once a year and go fishing. In the big picture it is a small fleet and a good number of those boats run there trips out of California and in Mexican waters. As a life long fisherman my best memories of my father was ridding sportfishing boats with him. As a life long sportsman are actions were respectful as to not ruin the environment that we would go into so that it would thrive for generations to come. As stated early it is a very small fleet of boat in a very big piture. I feel it would deviating to shut that fleet down. Thank you gor your time respectfully David Vahorvich

Subject: Engine retrofit proposed amendment

Comment:

The proposed amendment for engine retrofit is not reasonable for the sport fishing industry. The sport fishing fleet of California allows thousands of persons to enjoy the recreation of getting on the water. The amendment will either drive many sport fishing boats operations out of business or the industry would have to charge the customer a price that would not allow many thousands of persons the enjoy the recreation that the sport fishing fleet provides.

Subject: CHC2021 Save Our Boats

Comment:

You will be imposing devastating economic harm on California coastal communities if you implement these new regulations. Please reconsider these detrimental regulations and work with boat owners on a compromise that will work for everyone.

Subject: Sport fishing boat repower

Comment:

It is completely wrong to lay the requirement and blame on relatively small, generally family based businesses to repower or replace their vessels. You will be destroying a very hard working industry.

There are so many big polluters to go after but you don't have guts to do so, not to mention you will ship all these jobs to noncompliant countries and buy their fish from them . ABSURD.

This is a horrible idea,  
Mike Taix

Comment:

This is a bullshit bill. Really they think 138 sport fishing boat will pollute the air and water. What about the oil spills that does more damage then the fishing fleets Or even with sewage spill goes to the water and pollutes the water. You know and I know that this is really stupid. Pull your head out of your ass.

How in the world can you even consider ruining a complete industry?  
You don't even have a solution for these fishing boats. Take a step  
back and think how dumb this sounds, on what your trying to do.

C.A.R.B Please do not allow this bill to pass.

Gov. Newson and His OVERREACHING POWER GRAB is TOO MUCH, He has already hurt our economy and trying to have a LEGACY OF DESTRUCTION by steering California in the WRONG DIRECTION.

I like to fish and when I can afford it I go Deep Sea Fishing on Charter boats, with the new regulations I believe it will be the end of Charter boat fishing trips.

Already Emission regulations have hurt the Independent Trucking industry ( Harming and Eliminating Small Construction Companies).

Harming our Farmers by making them get rid of their older Diesel Generators and Well Pump Engines.

Again, PLEASE do not allow this Bill/ Regulation to pass.

David Cook, Central Valley Resident

Comment:

Please do not move forward with requiring Cat4 engines on California boats. While the goal is worthy, the complete lack of available and affordable engines for these boats make the measure draconian. I, like 10s of thousand others love boating and fishing in California. This measures takes away the livelihood of my and the enjoyment of millions.

Comment:

To whom it May Concern:

Please stop this requirement for small boat owners, and fishing boats....at least for the time being. With Covid 19 still Not over, these business people have really already struggled a great deal these past 18 - 20 months, and haven't yet recovered.

The few numbers of people that would receive air quality relief from this expensive upgrade, does Not (in my opinion) equate to what will be lost if, and when, they go out of business. I live just a mile from the water. As a Senior Citizen, taking a harbor cruise or going whale watching is an activity I completely enjoy - and can still afford - and participate in several times a year. I, among MANY, hope our small boat owners will be around for many years into the future.

After our Country, State and Community recover in a few more years, this issue can always be revisited.

Thank you, Kathleen Reyes

these regulations are not well thought through and need to be adjusted to allow the sportfishing industry to transition over to more environmentally friendly engines and technology at a reasonable cost and time line.

Subject: Save Sportfishing and Whale Watching

Comment:

With proposed regulations and mandates of equipment improvements that are financially unachievable regarding Sportfishing and Whale Watching Fleets, this action will decimate the industry and collapse a long time pleasure time activity to many in California.

How ironic it may seem that in current advertising of "Come to California for Vacation" that both of these activities are pictured in the advertisements. Seems someone thins that this is a positive activity representing California and its communities.

When sudden and harsh regulations are imposed to pleasure industries there are always downhill consequences to unintended users. This is one.

It is imperative to reconsider this proposed regulations enactment and stay the current course for a future to be maintained and true California activites to continue.

STOP THE REGULATION OF SPORTFISHING AND WHALE WATCHING FLEETS.

Subject: California

Comment:

California waters have long been the allure of both tourist and residents alike. For most access to the open sea is not feasible given the incredible cost of private yachts and boating in general. Without large passenger carrying vessels most people will never see an open ocean.

The best way to protect our ocean is to make people not only aware of it but also enamored with it.

I think of Shamu at Sea World. For most a trip to Seaworld was the first time seeing a large marine mammal. The amount of awareness that came from these interactions was incredible. People that never cared about the ocean or the animals that lived there suddenly became their biggest advocates. Today people are somewhat turned off by seeing such an incredible animal in a confined pool and many turn to whale watching as a great opportunity see these amazing animals in their own wild environment completely uncaged. This is something that everyone should have a chance to experience.

Passenger carrying vessels make this a very practical and economical possibility.

When legislation is passed that puts these types of businesses at risk it just leaves us all asking why. At what cost will California continue to over regulate and make small businesses jump through hoops just to stay afloat. At what cost to environmental awareness will we be environmentalists?

Comment:

At a time when people are not able to work full time, this new amendment would add to the unemployment. Such an amendment serves no purpose. While you may think it may help, the damage it will inflict, is exponentially more. When these boats are removed, some will be replaced (most will not) but in order to build these new boats, more carbon will be emitted, more waste will be generated, and of our resources will be burned up for no better reason than someone thinks they had a good idea.

Does no one think to look at what the result will be when when you force others out of work? What will become of the boats you want off the water? Landfill? Most likely. Some things will be recycled but most will not. So you save one thing only to destroy another. We need to find ways that work.

## Comment 557 for Proposed Amendments to Commercial Harbor Craft Regulation (chc2021) - 45 Day.

First Name: Fred A

Last Name: Smith

Email Address: Fasmith@rocketmail.com

Affiliation: None

Subject: Sportfishing

Comment:

Im a senior citizen that has fished up and down the coast of California for over 60 years on hundreds of sport boats. The fish I have caught have supplanted my wife and myself's food budget which helps do to the fact that we're on a fixed income and with the increase in the cost of food do to storage that the pandemic has created. If the commercial harbor craft regulation passes this will devastate the sport fishing industry and put several thousand people out of work and the only ones fishing will be the financially well off if we have any boats left to fish on. I have a question if this bill passes where do you think these boats will go? Im pretty sure they will be sold to the Mexico sport fishing fleet and of course they will find there way back up the coast fishing off the California coast. So my second question is what have you folk accomplished?

1. You have put several thousand people out of work!! 557.1
2. You have increased the cost of a sport fishing ticket out of range for the average fisherman 557.2
3. Fathers won't be able to take there kids fishing like there dads did for them 557.3
4. It's one more item removed from California to draw tourist to our fine state 557.4

So I request that you folks search your souls and take a second look at this regulation do you really want to see the fishing industry disappear from our coast. I hope not, Thanks for reading this !!

Subject: CHC2021 Save Our Boats

Comment:

Dear California Air Resources Board,

I am fortunate enough to have worked on the water for 17 years, with the last 10 years out of Dana Point Harbor. I have extensive experience running daily public Whale Watching and sight seeing tours off the coast of Southern California. My career has given me the opportunity to provide and support my family, while continuing to do what I love.

The proposed CARB passenger boat regulations threatens the livelihood of me and my family. These unattainable and unrealistic guidelines would compromise the solvency of the family owned company that I work for and many others up and down the beautiful California coast. We all want cleaner air, but these impossible regulations are not the way to accomplish that goal. I implore you to reconsider the current regulations, and instead, revise them to be more fairly attainable.

Thanks you for your time.

Fair Winds and Following Seas,

Captain Steve Burkhalter

Subject: CARB and Fishing Boats

Comment:

Having fished since the age of three and now I am about to be 70 I can tell you that imposing this law on small sport fishing boats will devastate my community of fisherman in California. Many of the older boats that are still in service cannot afford the overhauls or replacements of engines this law require. This law will wipe out most of these boats that are still functional and whose engines will still work for many years. I understand why and the intention of this proposed law but it is not realistic that these boats can be able to make these changes without either going completely out of business or costing them so much money they will have to sky rocket their fares. Many fisherman are retired and raising fees will be prohibitive to many of us on fixed incomes. Why not require that when these boats need to install a new engine it must use the required engine under the new law? That would be the time to do it or retire the boat? That seems sensible and fair. Please consider the effect this law will have on our fisherman and boats.

Subject: Proposed Regulations

Comment:

I have been sportfishing locally in Southern California since I was a child. Before this my dad and his dad sportfished since they were young. I can tell you this, no one cares more about the ocean than fishermen like us. Proposed regulations on local sportfishing boats is not sensible. We have 25+ tankers off the coast spewing out exhaust and the state wants to target a few small fishing boats? Tell me how this makes any sense? If you really wanted to tackle this climate problem go after the things that make a difference!!

To whom it may concern,

Please stop this nonsense of trying to outfit passenger boats with your nonsense ideas that is not safe, non economical, anti small business ideas. Leave the sport fishing and all small business alone and let them thrive. Everyone is still trying to recover from the pandemic and you people have another non sense ideas to put a nail to the coffin of these small business people.

To whom it may concern,

I am from Colorado and I really enjoy coming to CA and taking my family whale watching. My dad enjoys fishing for as long as I can remember. Please reconsider your decision and think about all the families and how this will affect them. The pandemic was bad enough! Let us continue enjoying the splendors of the sea.

Comment:

To whom it may concern,

I can't afford to by a boat to go fishing. I take use the local sportfishing boats. They provided a great service to those of its that can't afford to buy boats so we can fish for food and sport. My understanding is that California is going to impose some regulations that will make it almost impossible for these sportfishing boats to remain in use. The boat operators would have to charge so much more per trip that hardly anyone will be able to afford to pay the cost of the boat admittance cost. Most of the anglers that I know would just drive to Mexico and go fishing from there. The money that would have gone to Californians will then be spent in Mexico.

Please reconsider your decision that will destroy California's great sportfishing.

Comment:

Save our boats, don't force boat owners out of business. Keep cost down for the enjoyment of our younger generation to experience our oceans .Please Find other solutions And don't make them homeless. California has too many already. Spend my tax money on fixing homeless in the inner cities before it spreads to our coastal areas. Don't do it to the small business owners.

Comment:

I am just now reading this for the first time and I AM SHOCKED !!!  
I am a democrat. I'm for improving the environment. However, I LOVE FISHING IN THE OCEAN on a Party Boat. Over the years it has gotten more and more expensive to enjoy doing this. I've had to cut down on how often i can go. These KILLER regulations are going to put an end to ocean fishing !! You can NOT do this !!! You have cruise ships that burn fuel at a rate of more than a gallon per foot of travel and they go on trips going hundreds of miles. They toss trash out in the ocean. GO AFTER THESE SUPER RICH DESTROYERS OF THE SEAS. Leave the little guys alone !!! We need our fishing boats !

Comment:

Honorable CARB Board:

The proposed Commercial Harbor craft Regulations has too many unintended consequences and should be rejected and reworked. The impact will force the majority, if not all, small, hard working multi generational families to shutter their family business. We are still in the middle of a global pandemic which has forced business closures and emergency regulations on the businesses this impacts. While the harbor craft industry has adapted and complied with emergency regulations so they can continue operating, the industry can not survive the burden the proposed regulations present. The negative impact of the industry, loss of recreation and educational opportunities to California families, California Fish and game revenue through license sales, California tourism should make it obvious the regulations need to be adjusted and not approved. Please protect our state and reject the regulations. The many voices from business owners, citizens and other agencies all have reviewed the matter and have reached the same conclusion - the only vote should be no.

Subject: Sportfishing

Comment:

Please do not end sport fishing. My son and several friend have been fishing on the various California boats since they were 10 years old. Fishing kept the boys entertained and out of trouble. It even became careers for them. Some are now boat captains for major companies , others dock workers. The fish they caught over the years have been enjoyed by family, friends and neighbors. Fishing is so important to so many families as a career and income.

Please don't put people out of work and ruin businesses and careers. Think of boat owners, dock owners, fish processing plants, captains, crew, office workers. Please let the boats run.

Maybe the focus should be on oil lines that are leaking. Seems that is much more of a problem to our oceans.

Again. Do not stop sport fishing!

Comment:

CARB-

Please do not destroy the sportfishing industry with your new rules. These boats have had difficulty during the COVID years and now you opt to put more financial pressure on them. Also, industries building new specialty engines cannot catch up with the demand. Please delay this ruling.

Subject: chc2021 SAVE OUR BOATS

Comment:

As you well know, the Newsom Administration has proposed passenger boat regulations that require new engines and technology that is not feasible from a safety, financial or operational standpoint.

By the California Air Resources Board's (CARB) own admission, the proposed regulations will likely remove passenger boats made of wood and fiberglass from service. This would apply to over 80% of all boats! If boat owners can't afford to spend millions of dollars for new metal boats --- or you can't or won't pay twice as much for boat tickets to pay for the new boats, boat owners will be forced out of business.

Comment:

We need responsible and common people in the businesses and industry to help write these recommendations and possible laws- we are time and time again are the ones to suffer the consequences of this process. We just start to get back to a somewhat of a normalcy in life and business- then we're hit again with a new form of worries and uncertainties for maintaining our way of life and subsistence. There is no way can fulfill these new requirements unless we have major subsidies and assistance in implementing this process-Please help get real people to Sacramento to show Law makers and Governor-What were up against. Thanks for reading and trying to understand-Were barley able now to start standing on our own two feet. Please don't cut them off .

Subject: New engine requirements

Comment:

Please consider "grandfathering" the existing fleet for exemption to your proposed regulations. Requiring retrofits is not at all reasonable and will decimate this industry.

At some point you need to consider the "cost to benefit" aspect of your proposed regulations. Maybe you should require railroad diesels that operate in the state to clean up their emissions too.

Oh wait, Silly me, I forgot that the railroads are much more powerful than a small group boat owners.

Comment:

This proposal is unfair and not realistic. It would cause the loss of thousands of jobs and millions of dollars to the boat owner/operators, not to mention the multi-millions of dollars lost on recreational fishing and tackle revenue from the public.

Subject: Sportfishing

Comment:

I've been sportfishing for over 50 years. It's a sport that I can seek refuge from the pressures of every day life and bring home food for my family. It's therapy for me. If it's gone, not sure what I can do for myself to release the tension. I feel it's stupid to put ridiculous restrictions on the fishing fleet and the burden to comply with a rule that does not exist. Simply put, the technology is not there and for the many tax dollars that everyone of Californians pay every year. The state does not lift a finger to help out the situation! The state needs to find a solution to the problem instead of destroying lives and livelihoods! Stephen Early

Subject: small boats and commercial harbor craft regulation

Comment:

This proposal is another example of trying to look like one is solving a problem by making life difficult or impossible for the small user, possibly destroying the small businesses of sport craft and small line fishermen while not addressing the truly large polluters. This is the LAST place to start this clean-up. We have huge vessels polluting the ocean, but they are overlooked because they are big business and line pockets. This looks like a way of looking as though the problem is being addressed without addressing the larger problem and, once again, making the individual trying to make his or her way pay the price for looking as if the problem is being addressed. This should be the LAST line of correction. Save the small fisherman.

Comment:

Don't enact these unless draconian regulations! These heavy handed regulations will do nothing to help the environment and will put dozens of small family businesses out of business. It will also deprive the non rich of going deep sea fishing. This is the epitome of big government over reach. Don't do it!

Comment:

Hello, We are hoping that you reconsider what you are trying to pass. This will impact the families and owner operators that own these operations and businesses by taking a lively hood not only from them but from their children. Also, me personally, I use these boats as a theraputic outing that helps me get through things in life. Just being out on the open ocean is very relaxing and helps many people in more ways than just fishing as a hobby. I really hope that this can be reversed so that something like this does not take away from the thousands if not millions of us Californians enjoy and make a living from.

Comment:

The proposed engine changes to these vessels will close down much of an industry in California. The costs to change these engines is too high to justify for many of these companies, which work on such a fine margin. Implementing these changes on all new boats and rebuilds makes more sense. These vessels run mostly miles from shore where their effect to the air quality is negligible.

Subject: Don't mess with the boat regulations!

Comment:

This whole subject sounds to me like another California expedition by an uninformed legislature into the 'Land of the Unknown! Beware of Unintended Consequences; for instance have they considered the unemployment that will result from their actions? And that it will hit the most vulnerable part of the population? Most of the guys (and girls, as well) who crew on these boats are youngsters, perhaps just have graduated H.S., and trying to make college funds. This is no way to improve the lives of these youngsters! God willing, it may make Republicans out of them! That would also be an U.Q., wouldn't it?

Subject: vessel refit

Comment:

the pollution caused by these vessels cannot possibly be as bad as the vehicles and commercial trucks that move around the state 24/7. There are numerous examples of major polluters working within the state why would you come down like the hammer of GOD on an industry that contributes so much to both individuals and the state? The people that own these boats aren't rich, they can't afford a major refit. Their livelihood will be taken away from them. The people that use their services can't afford to pay double or triple the fee, I can't afford to pay double the fee. Just think of the business owners and employees that will be affected by this law for no real gain to the environment.

Subject: CHC2021 Save Our Boats

Comment:

I am writing today to please reconsider the proposal that Gavin Newsom's administration has proposed that would require new engines and technology that is not feasible from a safety, financial or operational standpoint.

California Air Resources Board's (CARB) has acknowledged the proposed regulations will likely remove passenger boats made of wood and fiberglass from service. This would apply to over 80% of all boats! If boat owners can't afford to spend millions of dollars for new metal boats --- or you can't or won't pay twice as much for boat tickets to pay for the new boats, boat owners will be forced out of business. I grew up on the water in Southern California and have fished these Charters that would be affected for 45 years and still do several times a year as many others do as well, we are a tight group of fishermen that would have no other means to participate in a sport that we love! we gladly contribute our hard earned money to the Captains of these charters that provide a service not only to us that fish but to those that enjoy Whale watching and School outings that more than likely would be cut because the cost would not be faceable. I please ask that you would reconsider this proposal that would financially devastate many and take tourist money away from the community. Thank you

Comment:

There Board needs to consider regulations that can be implemented without causing injury to business. Passing such a regulation without a plan for those effected to meet compliance in a reasonable time period and to have financial assistance programs in place before implementation. But there needs to be a follow up program to verify regulations being implemented without hardship and business loss. If there is harm the program needs an cess and desist clause such that changes can be made and proven effective. To offend regulations are made without hastially to meet some internal agenda. Stand up and make the system before such that business and air quality goals can both be met.

Comment:

I am a registered voter and frequent ocean angler. As a retiree on a limited income, sportfishing is one of a few things I can occasionally afford to do. These proposed regulations will likely put an end to my enjoyment of fishing off our beautiful coast. Please do not proceed with these regulations.

Sincerely,  
Charles Witt

Please do not eliminate sport fishing and whale watching. Let the Captains run the ships and their businesses. We have had enough HELP from this current Governor. I will vote you out when given the opportunity. CARB you guys are the worst. Messing with people's equipment that they maintain for decades. You guys are communists. What if the Governor made it impossible for you to work your job at CARB. Then try and figure out how to feed your family. After spending your whole life dedicated to your business. I hear Walmart is hiring. Special place in hell for men who fuck with other men's income.

Comment:

This proposal of retrofitting commercial boats in order to reduce carbon emissions is ludicrous and will offer little more than a drop-in-the-bucket toward reducing world wide carbon emissions.

While the US, and California in particular, take draconian measures to attempt to reduce carbon omissions, China and India continue to greatly increase their carbon emissions daily. And in fact China just increased their child birth policy from one just a few years back, to three. If you know anything about geometric growth, you'd know that the extreme measures the US is taking to reduce carbon omissions will pale in comparison to the emissions increase due to this policy change in China.

Please stop this ridiculous policy which will do little more than destroy the livelihood and recreation enjoyment of many Californians while doing virtually nothing to impact the global footprint of carbon omissions.

Subject: Sport fishing

Comment:

Dear California Government,

I am an avid sport fisher woman. I am also a conservator of our oceans resources. I have fished the last 20 years and never owned a boat I relTo go fishing locally in the Pacific ocean. It would be a travesty if you no longer allowed sportfishing off our coast.

The tuna sailers and other large commercial fishing vessels do how are resources than any sport fishing boat could ever do.

I hope you will reconsider putting a moratorium on sport fishing as it is not only a great family sport, it brings many jobs to our coastal towns and cities.

Thank you for your consideration,  
Erin Kaplan  
Lifetime California Resident

Subject: CHC2021 Save Our Boats

Comment:

Hello,

I am a small business owner that rents boats to individuals and groups for outings on San Diego bay. I personally own and rent one vessel that serves our community as well as San Diego's tourism. The impact of forcing my small business, to purchase engines for my vessel, that don't yet exist, will obviously put us completely out of business. My boat alone gives access to hundreds of people per year, looking to get off land, and enjoy the San Diego skyline by water with friends and family. We help celebrate weddings, wedding proposals, birthdays, baby showers, bachelor and bachelorette parties, as well as delicate burials at sea for loved ones who's wishes were to have their ashes scattered in the ocean.

I received my captain's license almost 7 years ago to share my passion for the water and if this passes, myself and thousands of other captains and crew will be without work on charter vessels!

Please DO NOT LET THIS PASS!!

Regards,  
Captain Jason Lilley

Please stand down on this unrealistic requirement which will make a fishing or whale watching trip to expensive for my family. I supported Tier 3 requirements but now we have reached a level of insanity by proposing a standard that few in the local small business passenger carrying fleet can possibly comply with. Stop the Madness or Florida is looking like my new home. Read, my tax dollars go with me.

Respectfully,  
David Jones

Sportfishing in California is an important activity to thousands visitors and residents in this state. Your proposed requirements for sportfishing boats would likely destroy this most vibrant industry and leave it as an activity affordable only to the privileged few. Don't do it!

Subject: Chc2021 Save our boats

Comment:

Good morning,

As an avid fisher of 20+ years and engineer. I would hate to see people forced away from the fishing and water. I am currently striving to work for the air pollution control district down here in San Diego County. I think people should have the choice of what to purchase. Plus taking away one of the reasons we live in California isn't really a wise decision. Numerous people are moving away in droves. I realize C.A.R.B. thinks they know what is best for everyone but destroying history for profit doesn't make sense. We still haven't built the infrastructure for the electric vehicles how will you market boats? I ask for wisdom. I also work at the registrar of voters every election and have no political party if that matters since everyone makes these things political.

Thank you for your time.

David Hersey

BS in Mechanical Engineering

Why would you kill so many small businesses that have extremely low impact on the environment and actually help promote ecosystem knowledge and conservation for youth? Do you have your own investment in the industry so you are destroying your competition?

Subject: Proposed commercial harbor craft regulations

Comment:

The proposed regulations to commercial harbor craft will mandate an unattainable standard for sport fisherman to meet and continue operating their businesses. Sport fishing in California is a culture and tradition that spans generations and brings families together. Sport fishing charters are great opportunities for lower income Californians to get out on the water, experience nature and spend time with family. These proposed regulations will make these experiences for lower income family's in California too expensive or non existent. Please don't take away the opportunity for Californians who will never afford to get out on the water without sport fishing charters by regulating them out of existence.

Sincerely George Balogh

Subject: CHC2021 Save Our Boats

Comment:

The need for addressing climate change is more compelling than ever. The need to address air pollution is a continuing endeavor that must be sustained. However, the cure must not be worse than the disease.

As I understand the proposed regulation changes to the ocean-going vessels, it seems that many severe financial impacts will occur that will affect a broad swath of industries associated with fishing and boating. Putting such draconian measures into place will likely cripple the fishing industry for years to come. This will put many people out of work including not only commercial and sport fishing boat crews but the ancillary businesses that support them. The boat manufacturing business will also be heavily impacted with similar results. Lastly, let us not forget that each of these industries and all the people working within these industries provide tax revenues for the state, counties, and cities.

Each of the individuals share your goal to solve the crises before us. Work with them, they may have solutions that can be implemented more readily and will lessen the burden of the implementation of the changes instituted to combat pollution and climate change. Take advantage of low hanging fruit, put into place changes that are simple cheap and effective now and work with the industries to quickly develop more substantial changes in the future.

For the last nine months I have been recovering from an injury that has kept me from being able to go fishing. I was looking forward to catching some tuna out of the H&M Landing fleet in San Diego,

but the injury prevented me from that. Now, I am looking forward to going out fishing out of Marina Del Rey on a boat named the Betty-O. I plan on going out on October 23, 2021, and I intend to listen to the USC Notre Dame football game on the radio just like I did when I was 15 years old, 50 years ago. Let's keep the boating and fishing industry alive so we can all create memories to look back on.

Sincerely  
Mark Duran

Comment:

There needs to be a reconsideration of the planned law being proposed. The main 2 reasons this law should not even be part of CARB mandates are : 1. The technology for the prescribed engines hasn't even been invented. This isn't even putting the cart before the horse. This horse hasn't been born, yet, and 2. This would cause an incredible unemployment scenario of upwards of 1 million people associated with these crafts. In other words, there's no science or economic impact attached to this idea.

We dont want people who live in mansions and fly in private jets creating economy destroying legislation. You want to do something about the environment how about you go after one of the single biggest pollution causing sources on the planet, the US armed forces. Anyone with a functioning brain knows you only attack the middle class and the American people have had enough of these double standards

Comment:

This is not progressive, it is madness. Attack pollution where it matters...the container ships idling off our coasts, for instance.

Stop the posturing and cloaked attack on sportswomen and men, do your job as PUBLIC SERVANTS and represent the millions of people who would be adversely affected by this ill conceived bill that, IF passed would have no discernible impact on the problem it claims to fix. Thank You, Chris Kirkbride

Subject: my comments on chc 2021 proposed pollution regulations

Comment:

CARB Board and Governor Newsome,

I share Americans concerns on air pollution and its potential environmental and health threats, but our approach to these challenges must be both logical and reasonable, especially in our transition to cleaner forms of mechanical energy. Your recent proposals for emission standards for small commercial and fishing vessels are neither logical nor reasonable. Exemptions to these rules have been carved out for military, commercial cargo, and cruise line ships. The military exemption is an undesirable but most necessary action. However, exempting the massive pollution and emissions from both cargo ships and large cruise ships, and instead imposing impossible regulations on the small fishing and commercial boats, turns a blind eye to the real polluters, and threatens the livelihoods and survival of small commercial and fishing boat owners and operators, as well as the industries and customers that they serve.

A recent detailed study by the prestigious California Maritime Academy demonstrated that the engine technology required for small boats in the proposed regulations DOES NOT CURRENTLY EXIST, and that the after-market pollution equipment required in their place present severe stability, fire, safety, and reliability issues. Many of the affected boats operate many miles from land and often in isolated conditions. Vessel stability, fire safety, and propulsion reliability are ESSENTIAL in these operations. Imposing the regulations as currently proposed would place these small boats

and all aboard them squarely in harm's way.

Placing unattainable mandates on small commercial and fishing boats while exempting the REAL polluters (commercial cargo and cruise ships), who HAVE the space and capability to safely lower emissions, is unconscionable in my view, and in the view of many others. Rather than penalize (and possibly destroy the lives of) the owners and operators of small boats with regulations that cannot be attained with their current vessels, I suggest that you drop these regulations, and instead use some of our current multi-millions of dollars State budget surplus to fund the study and development of advanced, reliable, and affordable technology to lessen the emissions from these small boats. Once proven, the State could help fund affordable replacement programs for these boat owners, similar to what has been done for the lower emissions propulsion engines and generators in recent years.

Don't pick on the "little guys and gals". Go after the REAL polluters in the massive cargo and cruise ships, and invest in technology development for the owners of small commercial and fishing boats.

Subject: Common sense

Comment:

What happen to the common sense that is supposed to be used when passing a law. Why are you a the Newsom trying to put more people out of work and close down more businesses even after COVID-19 has hurt so many. Please take a more reasonable approach to the situation with the sports boats. There is not even a engine that is made to fit in these boats with the specifications you are asking for. Your solution is to buy a new boat and pass on the cost to the customer, don't You think California has already done this to many times. This is why so many people are becoming angry with all this political stuff. Use a little common sense and work with the sports fishing industry to come up with a reasonable solution. I know this is my opinion, but I think you should really take a hard look at what effect this will have. Thank you for reading my message.

Comment:

Please support our local fishing boats and do not put them out of business! My family and I enjoy 1/2 day fishing adventures as well as whale watching every year! It is so important for my grandchildren to experience the awe of the whales migrating, and appreciate this beautiful part of our ocean's wonders!

Our economy has already been devastated by the COVID shutdown, please do not put more families at risk by putting these fisherman out of work.

Thank you,  
>Kathleen Cleary

Subject: Passenger Boat regulation

Comment:

The proposed regulations will likely remove passenger boats made of wood and fiberglass from service. This would apply to over 80% of all boats! If boat owners can't afford to spend millions of dollars for new metal boats --- or you can't or won't pay twice as much for boat tickets to pay for the new boats, boat owners will be forced out of business.

Millions of Californians will be denied access to the open sea and significant economic harm will come to coastal communities that depend on outdoor tourism.

Please consider the catastrophic impact that this unrealistic proposal will have.

thank you.

John Sim

I am against anything that damages ocean sport fishing in California. I hope you will see that destroying these opportunities for all of us will not get the results you want. I have been fishing in California 60 years. Leave this industry alone. My 30 year old son is a forth generation sport fisherman in our proud family. Lets let the new generation enjoy the same beautiful experiences I had as a kid growing up in California. Its cowardly to pick on soft targets that dont have the strength to fight back.

Comment:

Dear board members.

Please reconsider implementation of new boat regulations. Many family owned businesses cannot afford to scrap their boat and get a new one simply it does not meet your standards. Please allow a gradual implementation of new standards.

Comment:

Please do not impose further, unrealistic regulations on our boating community. We are privileged to live on the coast and have the opportunity to fish the ocean, provide food for our families and enjoy the activity with our children, parents, extended family and community. The sport is already almost too expensive for many families and individuals, and if you pass tighter regulations you will basically take away this opportunity for all the public with the exception of the very rich. Please support our communities by being reasonable and non-oppressive in your duties to protect the public. The sport fishing industry has been a well run and safe enterprise that continues to serve the members of the community well.

Thank you,

Suzanne

Subject: Our Family Rely on Sportfishing Business

Comment:

Hi

We are having to deal with higher cost for boat ticket already since covid, but after the new engine regulation less and less people go on fishing.

632.1

Our family and relative all relies on the saltwater fishing tackle businesses.

632.2

Please consider us, and our economic harms that new regulation would bring.

Thank you,

In Kyu Hwang

Subject: CHC2021 Save Our Boats

Comment:

Hello,

I am a Arizona resident now who grew up in Los Angeles, and have been a salt water sportfisherman my entire life. I, like many other out of state fisherman travel to CA for just that reason. I typically spend about \$800 per trip which includes food, lodging, fuel and fishing trip costs to do so, and if I travel with my family, that costs doubles or triples depending on our length of stay and agenda... If the cost of the actual fishing trip were to double or triple due to the expenses the Boat owners would have to pass on to myself to cover the cost of an engine "retrofit", I along with many other non-resident fisherman would not be able to afford to come and enjoy the resource. Is it worth the loss of additional Tax Revenue that's generated by Visitors?? Will it be worth it to the Hospitality industry and the Small businesses that we patronize when we visit the State?? I understand the premise you are working towards.. but putting it all on one small group of business owners, Sportboat Owner's, is not fair or just to many others that will be affected, both young and old.

Comment:

I live in Canada but have been travelling to San Diego at least twice a year for offshore fishing trips for a decade. If you force these fishing boat operators off the ocean I will be keeping my money in Canada. It is just not the boat operators who will feel this pinch, travelling fishermen like myself spend a generous amount of money on local hotels, restaurants, tackle shops, etc every trip we take.

Comment:

Please, PLEASE do not do this. This impact on people will be severe, both the actual boat owners and businesses associated with them, the entire literal industry itself and on the people that utilize these services as an enjoyable use of our public lands and oceans. All of us do not want pollution that is a given, all of us are fine with efficiency, but done in such a way that it does not literally destroy entire industries. Please rethink this and come up with a better plan.

Comment:

This message is to implore the CARB to not implement the proposal to stiffen air quality standards for Sportfishing boats. These boats presently provide an enjoyable and affordable means of exercise and entertainment to a large number of sportsmen on an annual basis, and also offer significant employment for thousands of people. Establishing these standards will effectively put these operations out of business which will have a significant economic and social impact. Please reject these new propalsals.

To whom it may concern:

I ask that you do not approve the new amendments for new regulation for Commercial Craft. With all thats going on in the world right now, we all need a little down time to recharge and have a little fun. These changes will affect my life and those of the fishing fleet. Some will not be able to afford the changes and lose their way to feed their families. Please think about how this will affect so many in a negative way. thank you

Comment:

This is the most ridiculous thing to even consider  
Many families will be effective. Many anglers who fish the ocean  
of Southern California for pure enjoyment and to catch fresh fish  
for their families will be effective as well, this is just wrong.

Comment:

I am asking you to not approve Governor Newsome's proposed passenger boat regulations that require new engines and technology that is not feasible from a safety, financial, or operational stand point.

Some probably most of the sportfishing vessels will be put out of business.

My grandfather fist took me fishing in the ocean and I have kept up the family tradition.

If passed you will take this away from my family and many others. please save sportfishing in our state for future generations to come.

There has to be a way to help the environment without taking this away !

Subject: CHC2021 Save Our Boats

Comment:

To Whom It May Concern,

Our Southern CA fishing fleet is world renowned as some of the best sports fishing available, a real treasure to CA. This fleet serves millions that will be denied access to the open sea. Significant economic harm will come to coastal communities that depend on sports fishing, whale watching, and lobster harvesting.

I am a avid sports fisherman that has enjoyed sharing this vital industry with many family members and friends. Some of the best fishing I have ever experienced has just been in the last few years and if this industry is taken away it will be devastating to California's economy.

Please save our boats!

V/R,

Christopher Howard

Comment:

To the CARB,  
I have been a recreational sportfishing enthusiast in California for over 50 years and look forward to going on the local family owned sportfishing boats in San Francisco and San Diego. Unfortunately the regulations you are considering will likely put most, if not all of these boats out of commission. The only reason I can see for this to occur is that California needs more unemployed workers on welfare. Please reconsider your proposed amendments before you destroy an entire industry.  
Thank you.

To the board,

I have used sport fishing boats since I was a child.  
I also have taken them out with my children throughout the years we have a lot of fun memories. I think the older boats should be grandfathered in if you pass this rule. The financial impact is to great not to.

Thank you for your time,

Dan Moreland

Comment:

To whom it may concern. It is my opinion that by changing the rules as usual, you will put the public in chains. By making people bow to what a few want is never good. The commercial fleet puts out more pollutants by way of staying out day and night with their engines running to support their equipment and keep floating. The higher prices you state on the fishmonger are always passed to the public as in all foods at a store. When trucking pays more customers pay more and so on as it goes but you knew this already. The air in California is also polluted by the winds that blow our way from the open ocean but you know this also, you need to make stricter laws to make sure less people have jobs that you don't agree with. By putting people out of work will never solve a pollutant problem when wind still blows and other peoples pollutants are in the air we breath. So the other countries that pollute our air don't need to worry as we will cease to exist, and the lobbyist that pay you will keep the big commercial ships afloat with no new regs. for them. That's the way government works nice.

September 17, 2021

Ms. Liane M. Randolph, Chair  
California Air Resources Board  
1001 I Street  
Sacramento, California 95814

RE: California Air Resources Board (CARB) Harbor Craft Rule

Dear Chair Randolph and Commissioners:

On behalf of the many Ventura Harbor businesses, residents, and visitors that are directly or indirectly dependent upon marine vessels, I request your consideration of several major impacts that would result from the proposed Harbor Craft Rule. Some considerations relevant to this request include:

Business Impacts:

- The proposed regulations are believed to place such a significant financial burden on small businesses that many operators are expected to close and lay off staff. 651.1
- Technology to meet this standard does not exist for some vessels. In other cases, the required modifications are financially or structurally infeasible or unsafe. 651.2
- Even if achievable with some vessels, CARB's proposed solution would reduce passenger load and necessitate increased ticket prices. 651.3
- New watercraft that will meet the proposed standards would likely be larger and/or less efficient with regard to passenger count likely resulting in no net reduction in emissions per passenger. Larger vessels could also require significant shoreside infrastructure changes to accommodate. 651.4
- Demand for construction of new vessels or repowering of existing vessels would create a significant concern related to shipyard availability to meet the deadline. 651.5
- All of the passenger vessel operators in Ventura Harbor are privately owned and operated thus not currently eligible for grants and subsidies to upgrade, so the costs will be passed on to the public. 651.6

Public Impacts:

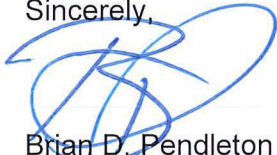

- Many of the affected vessels include those that provide opportunities for the public to go on the water for such activities as transportation, whale watching, and sport fishing. These services provide the public the opportunity to enjoy these experiences without owning their own boats. 651.7
- In particular this bill could terminate the only public passenger service to the Channel Islands National Park. In 2020, over 167,000 people visited the National Park. Most of these passengers travel via Island Packers privately operated ferry service contracted by the National Park Service. 651.8

- Sport fishing across the state, which not only provides a public amenity, but also allows many to put food on the table, would likely not survive the implementation of this proposed standard.

651.9

California's maritime community and economy is critical to the future of our State. I urge the CARB Board to conduct further engagement and work closely with the maritime industry on viable solutions that will achieve emissions reductions while preserving our coastal communities, working waterfronts, and maintain affordable access to our ocean waters.

Sincerely,

Brian D. Pendleton  
General Manager

CC: CARB Board Members  
Board of Port Commissioners  
Monique Limón, State Senator, District 19  
Steve Bennett, State Assemblymember, District 37

Comment:

These new regulations will impact thousands of families and small business owners who rely on their boats as a source of income, additionally, local recreational activities which bring in good revenue to the local economy and joy to local citizens and tourists alike like whale watching, fishing/angling, and other activities will be adversely impacted.

People deserve opportunities to fish at a reasonable price and with the proposed changes fishing will no longer be affordable!

Comment:

After learning about the proposal put forth by the current California Administration and CARB to remove wood and fiberglass boats from service and while it may makes sense if a politician in Sacramento, a Government Agency or a reading the headlines the overall effect on ocean working people will be devastating. Putting people out of work, raised prices for ocean activities not only privately but also for research and school kids and universities. I could go on and on but please look at the impact it would have on our communities. We have so many other issues to adress this is overall small in scale. I ask that you do your homework and reconsider.

Scott Lund

Subject: Oppose Proposed Regulation on Passenger Boats

Comment:

CARB:

I strongly oppose the proposed new regulation for passenger boats that will require new engines and technology. We are currently being over regulated by new State and Federal mandates. Implementation of this new regulation will put thousands of people out of work because retrofitting costs will be too exurbanite to implement.

654.1

I have been fishing out of Charter boats at least 15 times a year over the last 10 years. This will put an end to Commercial sport fishing. There are thousands of other fisherman that will also be impacted.

654.2

Please vote down this proposed regulation.

Richard Stutsman

Comment:

I have been fishing in the southern California oceans for over 50 years. It is always an exceptional experience to be out on the ocean. You appreciate the mix between man and nature and without fishing, sightseeing boats on the water, this experience will be reserved for the wealthy only. We have already closed a lot of businesses in California let's not add to the growing list.

Subject: CHC2021 Don't Close Sport fishing and Passenger Boat's

**Comment:**

I never thought that I would be writing a letter to keep our right to access the ocean. Due to the rules that have been proposed by CARB to retrofit the boat's to zero emissions would be to costly with out the technology available and would be putting many of these family businesses out of business. Not to mention tourism tackle shops dive shops and businesses encompassing the harbor and support of the operation involving the economy to access the open water. From a young age our family outings on open party boat's to the fairy boat's to Catalina Island and Whale watching was the foundation for my passion for the open water. Later to obtaining dive training and buying tickets on dive boat's then buying my private boat while becoming a member of my local yacht club. This legislation could break up a 20 year's of charter fishing with friends and now generations that attend. Please reconsider a more reasonable solution to keep our California experience on the water. Thank you

Comment:

I really don't understand why a government and a Governor would want to destroy and industry. I have been fishing and working on sport fishing vessels practically my whole life. I've brought up my 14 year old daughter to enjoy the sport of saltwater fishing and to appreciate what it is like being out on the ocean. I understand wanting to help the environment. What I don't understand is why you would want to destroy and industry and peoples livelihoods of thousands of people that work on these vessels that will have to shutdown because of your narrow mindedness on trying to save the world.

Do the right thing and save the sport fishing industry, the whale watching/ecology industry and any other local bay cruise industry that you are currently targeting.

Comment:

In an effort to protect the environment, CARB has to look at all options. However, while looking at restrictions, it is also important to look at the economic impact of actions. This is part of any environmental review.

I ask that you weigh your decisions carefully with the benefit versus negative results. California does not need to have a loss of another industry.

Comment:

Dear sirs,  
Regulating party fishing boats out of business is the wrong thing to do.

It will impact many fisherman who can't but their own boats for fishing the ocean and have economic impacts on an entire range of businesses that support this sport.

Subject: New Regulations for Sport Fishing and Whale Watching Boats

Comment:

By the California Air Resources Board's (CARB) own admission, the proposed regulations will likely remove passenger boats made of wood and fiberglass from service. This would apply to over 80% of all boats! If boat owners can't afford to spend millions of dollars for new metal boats --- or if people can't or won't pay twice as much for boat tickets to pay for the new boats, then boat owners will be forced out of business. This also would mean that many people will lose their jobs.

As boats go out of business, millions of Californians and tourists will be denied access to the open sea and significant economic harm will come to coastal communities that depend on outdoor tourism. It means a lot to many people and their families to be able to harvest their own food from the ocean and to enjoy all the splendors of the sea!

Please do not enact these new proposed regulations.

Subject: Please Re-Consider

Comment:

I understand that the new law will help keep the ocean clean and I am all for that. However there are a lot of sportfishing boats and other commercial boats that people enjoy going on that will either put them under due to the costly repairs to retrofit their boat so exhaust is not dumped into the water. If this new law does go into affect you have to write in a clause where it will give people time to upgrade and retrofit their vessels if not you could sink an entire industry.

Subject: Engine replacement

Comment:

I don't believe what your a asking or expecting is a realistic goal. You can't paint this subject with that broad of a brush. You could have suggested when engines need to be replaced all new engines must meet smog requirements.

Comment:

I grew up fishing off the coast, best times of my life, and I would hate to not be able to share the same experiences with my kids and grandkids

There are enough restrictions in California as it is!!  
Just because Newsom can't catch a fish, don't take fishing away from the rest of us that enjoy fishing for all it brings!!

Comment:

An end to sport fishing as we currently know it will be a disaster for the local fishing communities. I personally have benefitted greatly from spending time on the water. We get away from the hectic life many of us lead and have chance to think about the wonder at our door steps. It is also clear we must clean up our act with regards to climate and CO2 emissions. There is no reason both cannot be accomplished with a more thoughtful approach that recognizes all the needs and forges a compromise.

Subject: chc2021

Comment:

Dear California Air Resources Board,

The proposed passenger boat regulations that require new engines and technology is not feasible from a safety, financial or operational standpoint, and should not be adopted.

By your own admission, the proposed regulations will likely remove passenger boats made of wood and fiberglass from service which would apply to over 80% of all boats! Boat owners can't afford to spend millions of dollars for new metal boats and fishermen, like myself, are already paying higher and higher fares even without the added costs associated with the proposed passenger boat regulations.

If adopted, the proposed passenger boat regulations will force many boat owners out of business and will significantly reduce or eliminate opportunities for individuals to enjoy the ocean. Not only is adoption short-sighted, harmful, and punitive, it will further increase wealth inequality as only the wealthy will be able to sportfish or enjoy seeing marine life.

I urge you to not adopt the proposed passenger boat regulations as drafted.

Thank you,

David Karlin

First Name: Gregory  
Last Name: Grivetto  
Email Address: greggrivetto@icloud.com  
Affiliation: Former excursion boat owner

Subject: CHC2021 Save Our Boats

Comment:

To Whom It May Concern,

I write this as a former excursion vessel owner/operator that understands the financial hardships associated with remaining in this industry. Most of the businesses to be affected are family owned small businesses. There are few that will be able to absorb the cost of substantial modification of existing vessel or construction of a new vessel to meet the letter of CHC2021.

To give you additional context with which to understand my position, I am an environmental advocate that fully understands the immediate necessity to move toward carbon neutrality or negativity by substantial reduction in GHG emissions across the board. Every little piece of the puzzle is a piece to be addressed, some can be heavy handed while others need to be on a case by case. CHC2021 should be looked at as one of the examples of case by case.

My immediate concerns are the small business sportfishing and excursion vessels that service the Southern California region, but my comments are generally aimed at all small ocean based businesses CHC2021 will affect.

As you are aware, marinized Tier 4 diesel engines are not available for most of the vessels blanketed by CHC2021. And if the technology does become available, in the format that is anticipated, 75% of the existing small business sportfishing and excursion vessels will not be able to make modifications required to install these engines. The United States Coast Guard has also expressed concern in this arena.

If it is the intent to "Darwin" businesses out of existence to reduce GHG, this initiative will do the trick, but there will be substantial lash back from many directions.

As previously stated, I am an environmental advocate.

My views are more moderate when addressing comparatively small quantity GHG producers. A multi-tiered approach, utilizing engine replacement with existing technology that will be better than the current Tier 2 engines utilized in these vessels coupled with modifications to operations to include some of what is already in CHC2021:

1) Utilization of shore power immediately upon return to berth UNLESS the vessel will be underway within a pre-determined timeframe.

2) Main engine idling reduction - When not required, main engines must be secured within a certain timeframe, i.e. 2 mins, 3 mins, 5 mins, etc.

3) Engine maintenance - Engines must be maintained per OEM recommended intervals for oil/filter changes, air filter changes, engine adjustments, etc. Documentation of said maintenance to be electronically provided to CARB at time of maintenance. Yes, this is a huge work load, but will keep owners honest.

4) SMOG Program - Development of a SMOG program that tests engines on each vessel every 1 to 2 years to ensure they fall within CARB guidelines. Similar to tests performed on motor vehicles. Currently a program of this nature for CHC does not exist. Once again, huge workload, but will keep owners honest.

#### New Technology Exploration:

Work with small business CHC and marine PE's to develop usable technology for these vessels to reduce GHG emissions while satisfying safety requirements set forth by USCG and accompanying CFR's.

The following are examples, though presently are not feasible or practical now in a commercial small passenger vessel, but with development for the maritime industry this is/will be the future:

1) Installation of batteries, solar panels to allow for reduced electrical load and GHG emissions.

2) Survey of vessels to determine ways to reduce power consumption while maintaining safety and comfort for passengers/crew.

3) Nitrogen fuel cell technology

4) Open door discussions to slowly swing the paradigm. Most small business owners have a very small margin. If you were to work as a partner to the future instead of Thor's Hammer, threatening to smash small business, the response would be much better.

Conclusion:

We all understand that GHG is the problem. Look at the large scale polluters i.e. ships anchored offshore, large commercial - high hour operations, etc. But still, there must be a guiding hand and a paradigm shift.

Thank you,

Gregory Grivetto

Subject: Proposed Amendments to the Commercial Harbor Craft Regulation

Comment:

To whom it may concern,

As a frequent consumer of the services provided by the ocean sport fishing industry, I would like to request that the input and concerns voiced by the trade organizations that service the above commercial boating industries be considered. In over 40 years of being on the water, I have never seen an industry group more concerned with their environmental impact than the sport fishing and ocean wildlife tour industry. Please consider the practical and economical impacts that the proposals that you are considering will have on the trade groups and the consumers that they serve.

Respectfully,

Steven Land

Please reconsider what you are proposing ! I am a lifelong ocean person who enjoys many aspects of the ocean .food source , pleasure source, spiritual source , recreation source ,life source. I and many other people feel the same . I have many friends who are pleasure boaters and also commercial enterprises . What you are proposing will put these honest hard working people out of business and stop many pleasure craft owners in same situation . Please rethink all of this . Evan B. Jones

**Subject: CARB REQUIREMENTS FOR PASSANGER SPORTFISHING VESSELS**

**Comment:**

Regarding your future requirements for these vessels. Please do not change them from what they are now. It would most likely kill the industry. I and many thousands of other fisherman would be left high and dry and unable to do something we truly love, not to mention that California would lose hundreds of businesses and thousands of jobs. Thank you for your attain this matter.

Subject: CARB mandates

Comment:

CARB must modify it's regulations to accommodate the CA. saltwater sportfishing industry. There are tens of thousands of jobs at stake, billions in revenue and loss of tax dollars to the state. CA. is horribly over regulated and now poised to kill an industry and a fishing way of life for millions of people. CARB must work with the boat owners and State Legislature to find a reasonable outcome to save the ocean sportfishing industry. It's ridiculous laws like TIER 4 and others in this state that is causing an exodus of residents. CA. lost 2 seats in the House of Representatives do to over regulation, excessive taxation, highest gasoline prices in the nation etc. Do you really need to destroy sportfishing to satisfy yourselves? The clean burning diesels in large sportfishing boats now that AQMD heavily funded have completely removed the old style "smokey" engines that were not computer controlled. Just leave well enough alone. What about all the tug boats in our shipping harbors that help bring imports to our stores? Will you stop them as well? That would put the U.S. economy into an irreversible nose dive. Try using some common sense, if you have any.

Subject: Proposed changes to boats

Comment:

THIS Email is in regards to your proposed changes in vessels using out great oceans in California. I am strongly against these changes. As a Californian for 60 years, I have enjoyed using the CA coast for fishing and boating. I find it unacceptable that you are even thinking about these changes. Economically this will destroy the saltwater fishing charter business and we'll as personal fishing in this state. The changes if enforced are cost prohibited for our fishing industry.

Please rethink your position. This would destroy not only the fishing industry in California but the pleasure boat industry as well.

Michael Smith

Subject: Always Backwards!

Comment:

It always amazes me how the left thinks it is fixing a problem by making it worse. You are deeply hurting people in the process who will never forget. There are thousands of trucks with these d.e.f. engines nationwide right now sitting idle in their places of business because of a sensor that went bad, and they can't keep up on the needed repair or get the part because of demand. We have three trucks down for 3 to 5 months waiting. Think of that cost. Not to mention the safety aspect when my truck simply shuts down on a freeway. What about on an ocean with 50 passengers! We are all losing hope from your leadership the end doesn't justify the means. You may get your way, but you will alienate the backbone of your country. May God repay you, and not with the money that you worship. Boats are different there's not as many as cars and trucks. You may have the younger generation fooled, but us old guys know what this is really about.

Subject: Metal hulls and elimination of fiberglass boats

Comment:

Please note as a fiberglass boat owner and a recreational fisherman I opposed to the change of metal base boats and diesel engines only. This is something I simply cannot afford to purchase new England myself for a join fishing offshore in San Diego with my friends and family .

Subject: Tier ?

Comment:

You cant force technology that is not there on these guys .to think you can replace any of the boats over 40 ft fot 1 million or so is absurd try 7 to 10 million minimum on the larger vessel that fish long range. This is absolutely absurd! The existing program is fine but still cost the owners anywhere from 1 - 350 thousand to install them so get real leave it alone and stop trying to kill a generational fishery that the public absolutely loves. Jp

Subject: Do not put our passenger fishing boats out of business

Comment:

Dear CARB,  
RE: Small Fishing Charter and Whale watching boats.

There are only 174 boats that are affected by this legislation. They are all small, family run businesses. But they all contribute so much to the California tourism industry. Please do not make this legislation mandatory in such a short term. This would put such a financial hardship on them that most of them would be forced out of business. The impact on our environment would not even be measurable.  
Please do the right thing and extend this deadline.

Thank You,  
Tom Nickel

Subject: CHC2021 Save Our Boats

Comment:

This regulation would have devastating impacts on the many family owned businesses that run sportfishing boats in California. It would also ruin what is a healthy outdoor activity for many Californians by driving prices out of reach for all but wealthy persons.

The number of sportfishing boats operating in California is trivial in comparison to the enormous number of trucks, autos, etc that are on our roads. This regulation is going to have negligible impact on air quality, while there are many other sources of emissions that can be more effectively regulated.

Subject: CHC2021 Save Our Boats

Comment:

This regulation proposed by the Newsom administration would unreasonably burden small business owners and greatly damage local economies in California. Small businesses such as Virg's Landing would be forced to shut down until they can afford to replace their fleet with compliant boats, or, more likely, go out of business.

Comment:

Please give these fishermen more time to figure out how to afford these changes. Offshore fishing is one of the things that the west coast is known for, it drives alot of money through tourism just for the fishing. Plus this industry employees many, and for many it is there lively hood. Don't crush that.covid is already putting many in bad spots in life,don't add to that.

Sincerely your citizen,  
Hector Rodriguez.

Comment:

This is a complete stop to the San Diego way of life. The tree huggers have ruined Lajolla. They let the seals take over LaJolla cove, feeding the sharks. Now you cant go in the Ocean for fear of sharks.

What is wrong with fishing off the Coast?? So no seafood in San Diego?? Are they now to import seafood from China???

Subject: CHC2021 Save Our Boats

Comment:

Hi,

I am writing in opposition to the proposed regulations which would severely impact our ocean boats. The working class already has limited access to our coastal waters due to increased costs on transportation, sky-high housing market and traffic jams. Please do not create more obstacles which would further prevent us from enjoying our waters. There aren't enough of these boats to make an environmental impact and they are already using clean and efficient motors.

Thank you.

New regulations for sport fishing boats  
My name is Joe Phillips I own and operate the Toronado sportfishing boat in Pierpoint Landing Long Beach. I am against these new proposals as that will put me and hundreds of others out of business. The regulations that you were going to require require equipment that is not in production yet. Please reconsider your decision. Thank you

Subject: Save my Sportfishing Boats

Comment:

Hello CARB folks,

Your emissions standards will change the economy and sportfishing off the coast of California forever. Please do not put these sportfishing boats out of business and take my ability away to fish recreationally as well as feeding my family with the catch from these sportfishing boats.

Fish is expensive and is too costly for me to purchase fresh fish to feed my family. Additionally, it will hurt California's coastal economies.

Thank you for your considerations,  
Gene

Subject: Proposed ruling on wood and fiberglass boats.

Comment:

Your proposed rules for new engines and all metal boats could triple the cost of a day whale watching or fishing. Many of us already have to save throughout the year or several years to take a week long fishing trip. Inflation is already putting this sport out of reach of the common working man or family. Please don't legislate this into a rich man's sport.

Subject: CHC2021

Comment:

Ms. Liane Randolph, Chair

California Air Resources Board

c/o chc 2021

101 I street, Sacramento, Ca. 95814

As a board member of both Golden Gate Fishermen's Association (GGFA) and Golden State Salmon Association (GSSA), as well as owner and operator of the 54' Salty Lady, a small charter fishing and whale watching boat and business based in Sausalito, California, I am submitting this letter for your consideration during the current public comment period regarding proposed emission regulations currently on the agenda for Ca. harbor crafts.

There are multiple issues which I will address here. I am certain that you are already aware of these issues with your proposed mandate of tier 4 engines in all harbor craft. For the sake of myself, my family, and thousands of my counterparts, their families, and a whole host of supporting small business owners and their families I implore you to PLEASE consider proposed options to the overzealous, draconian, and yet imminent mandates currently being considered.

As a sport fishing and whale watching business that depends upon the environment, in particular the marine environment, I believe I can speak for our entire industry when assuring you that we support policy that protects and supports the environment. In fact, GGFA and GSSA have fought valiantly for decades in support of a multitude of environmental and habitat issues related to the health of our rivers and ocean. As we, as Californians, strive toward a future of a clean and healthy environment, however, we must consider the technological and economic feasibility of proposed regulation and ask ourselves, "is this reasonable or even possible at this point ?" and "at what cost ?"

A recent CARB commissioned California Maritime Academy study concluded that, #1- marine application engines that meet the proposed standards do not exist yet and, #2- would significantly impact a vessel's stability. Due to the excessive heat produced and the massive increase in size and weight - by CARB's own admission - "vessel replacement will be likely, especially in the categories with wood or fiberglass vessels" to comply with the proposed tier 4 mandate. With an overwhelming majority of sport fishing and whale watching boats constructed of these materials, nearly all of California's iconic charter boat fleet will be unable to comply. CARB's assertion that these small business owners can finance new vessels with new engines by passing on the cost to our customers within the proposed time frame is unrealistic (at best) considering the fact that our most valuable assets, our current vessels and engines, will be deemed illegal with no resale value in California.

696.1

696.2

For those few who may be able to absorb the costs of purchasing new steel hull vessels outfitted with tier 4 engines by catering to a high end clientele... the problems won't end there. Comparable, relatively new technology currently being used in trucks and heavy equipment such as farm machinery has been documented to clog the Diesel Particulate Filter causing engines to stall & requiring hours to clean out the system and in some cases even causing engines to catch fire. These issues occur more frequently in engines run at low RPM's... precisely the type of application common amongst these vessels in low speed trolling. While stalling and fire might be daunting to operations in a "best case scenario" land based situation, these problems on a boat miles from shore and hours from potential help could very well lead to a truly tragic end. In a remarkably stunning omission, these regulations have NOT been developed in collaboration with the US Coast Guard who are tasked with regulating stability and fire hazard on this state's navigable waters.

696.3

In addition to these glaring issues there are more !!

-While there may be some high income patrons able to afford the exorbitant fares required by the few remaining charter boats, many lower to mid-income individuals and groups including youth, students, veterans and minorities - who cannot afford to buy a private boat - will be excluded from access to the marine environment and the resources thereof.

696.4

-efforts to restore tourism based jobs and small businesses post COVID in scores of coastal communities will be severely hampered by this regulation.

696.5

-CARB has been directed by the legislature to take "prudent action" to reduce airborne toxins with FURTHER DIRECTION that implementation programs be "practicable as well as cost effective and technologically feasible" Clearly the proposed regulation is missing the mark on these objectives.

-This proposed rule separates, for the first time ever, Commercial Passenger Fishing Vessels (CPFV) from Commercial Fishing Vessels (CPV) with the proposed regulation to apply only to the CPFV

696.6

vessels. Targeting this newly created sub category is both inappropriate and unfair and moreover is not likely to have any significant impact on air quality.

-Vessel owners have been proactively and voluntarily reducing emissions by upgrading to the cleanest, most efficient engines that are actually available at this point. I personally have the latest (tier 3) engines in my vessel. Voluntary engine replacement has historically been at least partially subsidized by Carl Moyer grants, but this program will not apply to mandated tier 4 or whole vessel replacement.

696.7

-These regulations were drafted behind closed doors during the height of the COVID pandemic... with little opportunity for public comment. Many vessel owners are only now learning that their days at sea may well be coming to an end and their livelihoods could soon be lost forever.

696.8

So in conclusion I would direct some pointed questions to the California Air Resources Board-

1. Why has the CPFV fleet been separated and singled out by this proposed regulation rather than being considered in the same class as CFV's - as we have been up until now ??

696.9

2. Can the board please provide a realistic analysis of technological feasibility including some response to the well documented safety concerns ?? Clearly the current analysis is significantly flawed.

696.10

3. Can the board also please provide a sensible, pragmatic and truthful economic impact report ?? it is no secret among our CPFV community that... in some cases upgrading but in most cases replacing our vessels, with little to no value for our current vessels once this regulation deems them to be obsolete... would be devastating to the point of putting us out of business. And as a follow up to this question, what about the real impact to supporting businesses such as tackle shops, dive shops, hotels, bars and restaurants and a host of other small businesses in our coastal communities ??

696.11

As requested by multiple Senators and Assemblymembers in recent correspondence with CARB, I would implore the board to PLEASE amend the proposed rule and to place CPFV back into the category in which they have always been considered, with CFV, to provide an achievable, feasible, and equitable compliance pathway to reduce emissions.

Please consider my frustration with these proceedings as a reflection of my passion for a life and profession that I have chosen, love dearly, have become very good at, and now find in jeopardy. I am concerned for mine and my family's future as I provide our sole source of income. I have been in this industry since high school and have no other skill set capable of providing anywhere near a comparable income. But in addition I lament the prospect of a California in which one of our greatest assets, our beautiful and bountiful Pacific Ocean and the marine environment, would be inaccessible to a vast majority of our own citizens as well as untold scores of visitors to our state due to hasty

decisions made before their time has come.

Respectfully,  
Captain Jared Davis  
Board Member- Golden Gate Fishermen's Association  
Board Member- Golden State Salmon Association  
Owner & Operator- CPFV Salty Lady

Subject: chc2021 Save our Boats

Comment:

I have been fishing out of party boats in the Monterey Bay for the last 40 years. If new regulations are going to be installed that will be so costly that 80% of the current vendors would no longer be able to remain in business this would be devastating news to me. I basically live for those days out on the water catching saltwater fish.

If sport fishing were to become so expensive that it would no longer be a viable activity that would be a travesty. Not being able to expose my grandchildren to all the fun and beauty of nature that comes with fishing for chinook salmon in our local bay waters is an unconceivable vision for me.

In addition the saltwater fish that we catch on these charter boat trips have become a big part of my wife's and my healthy diet. Please try to find another way to achieve your air quality goals without coming up with regulations that would result in the death throes of such an important industry.

Roger Bonner

Subject: Opposition to new CARB rules for commercial harbor craft

Comment:

These new laws will pretty much eliminate Whale watching trips, bird watching and fishing from party boats. These changes will require boats to be re-engineered, which in most cases can't be done. Perhaps grandfathering in existing boats might be a better solution

Subject: Feeding my family

Comment:

This is absurd.  
You are not helping anyone.  
Feeding our families via sport boats (made out of wood and fiberglass) is something that I do.  
As it is right now during Covid, the prices are just barely manageable but if you (nothing better to do) board members (who can afford EVERYTHING) are going to force smaller operations to buy new equipment you are simply going to make life harder on all of us that rely on our fishing skills to help supplement our meals.  
I'm pretty sure EVERY one of you are Democrats because you continue to do things that help NOBODY but your own ego and corrupt pockets!!!  
MORONS!

Subject: Sportfishing Boat regulations

Comment:

If this comes into place it will be the biggest hit to blue collar sportfishing boat owners and employees in history. Financial margins on these boats are so small that you will force over 90% of boats out of business if they must meet the new engine requirements. Multiple thousands of hard working people all along the coast of this beautiful state will be put out of work, with no way to feed their families, it is that simple. You have no idea of the negative impact you will cause from this. Keeping people in jobs and creating new ones is one of the many hard tasks of the government, this is doing the exact opposite.

Subject: California sport fishing

Comment:

I have been fishing on these boats for over 20 years always felt safe being on them without any problems due to way the boats are built they've been on the water for many years and are definitely sufficient for California weather conditions and ocean conditions why should most of sport fishing boats be revoked because of way the hull is built!! this will ruin the business in California sport fishing which is a great tourist attraction. A lot of these people will not afford to buy new metal boats to be able to continue in this business please reconsider these decisions!

Comment:

Please consider that many of us older Californians have few if any activities that we can participate in. For me and many others fishing is one activity that gets us up and out for not only exercise but also interaction with others not to mention food when we are luck enough to catch some fish.

Boating and fishing are important to me and if taken away I would add this to the many reasons I am considering leaving California to go to another state where I can enjoy my retirement.

Please do not deny me one of the few enjoyable activities I have left.

Don McKay

Alot of people, especially in California can not afford the upgrades. Some of wich use ther boats for residence or for their income. Please let them have their homes and businesses. I love the ocean and fishing and save for months to do a fishing trip. Please don't make it impossibe for me to go once a year.

Subject: Sportfishing Engine Regulations.

Comment:

This is Government overreach in the worst form! To even think about putting these regulations on this industry will be catastrophic for the state of California! I grew up working on these vessels and still have a lot of friends and family who rely on this industry. These are not semi trucks that have engines available to convert to DEF. Which you have already ruined that industry as well. Look at how many Owner Operators have been put out of business due to your Port Regulations. You are doing the same here with no legitimate reason whatsoever. These vessels operate under generator power for a high percentage of the time while fishing, similar to a Tripac on a Semi Truck. They also don't operate year round! They also mostly operate in International Waters 80% of the time. Why is CARB trying to regulate a law for boats that are under power in the State of California for maybe 45 minutes before entering International Water. Once again this would be the nail in the coffin for this industry, which is unacceptable! If you want to pass laws like these you need to get with engine manufactures on creating a reliable Marine engine to suit the States needs. Carb is once again getting ahead of affordable technology. There is nothing wrong with wanting this conversion but this is not the right time.

This proposal doesn't make sense when there are much more pressing issues like hunger and climate change. This proposal will shut down and destroy all industries using watercraft. Stop ruining California and forcing people to leave and go elsewhere. I was born in San Diego and California is my state my home.... Do not force us to leave. Thanks for listening

Subject: CHC2021 Save Our Boats

Comment:

I have fished my whole life with Family and Friends. I have many Friends that either own Boats or work on Boats. I am in a Conservation contiguous Fishing Club which supports the Community financially and in a humanitarian way by means of Children's fishing programs and Wounded Service members outing enhancing their overall mental rehabilitation. I am appalled at the threat of the shutdown of the Sports Fishing Fleets and it's supporting industry. This will have a ripple affect on many people/communities within the industry, with a fairly large economic impact for many. If all I read and hear from Political parties is about the small business/Mom & Pop shops?????? Is this just smoke and mirrors. I stand for these businesses and all that they do for Our lives, Other's lives, Our community, Our Veteran's that risked their lives for all of our freedoms, Our children, and maybe even you if enjoy the outdoors in this manner? STOP THE MADNESS, Let's give it a second look.

Thank you  
V/r Dave Hanes

Comment:

While considering myself an environmentally friendly voter I cannot support this bill and the impact that it would have on significant industries here in California. By the California Air Resources Board's (CARB) own admission, the proposed regulations will likely remove passenger boats made of wood and fiberglass from service. This would apply to over 80% of all boats! If boat owners can't afford to spend millions of dollars for new metal boats---or you can't or won't pay twice as much for boat tickets to pay for the new boats, boat owners will be forced out of business.

Grandfather existing vessels and make these regulation apply to all new boats moving further.

Sincerely,

Bruce Stubbs, Ph.D.

Comment:

Please consider the ramifications of restrictions that would add to the already difficult situation for many operators, owners, crew members and participants of sport fishing and commercial fisheries. Thank you for considering the devastating consequences of further regulation.

Comment:

Please reconsider this action. If this is passed and as boats go out of business millions of Californians will be denied access to the open sea and significant economic harm will come to coastal communities that depend on outdoor tourism. My newborn son will not be able to share the joys I have when fishing on these boats. Please reconsider. It is not fair that our own military is exempt from these rules and pollute many times over.

Comment:

CHC2021 Save our boats!!

If Newsom's proposal is passed I will not be able to afford to go fishing out of Dana Point Harbor or my family to be able to go whale watching any longer. This is a disaster to this wonderful small business industry. I'd imagine this would also effect the commercial boats taking folks back and forth from Catalina island. This whole proposal is disgraceful and unlikely to improve to any significant effect on the ocean environment. Oh! I guess if there are no longer any boats on the water that would help the environment. This may be the underlying intent of this proposal

Comment:

Sportfishing has been a favorite activity for decades now. We have many fond memories out on the ocean taking in all of nature's wonders. The prospect that future generations may not be able to have these whale watching and sportfishing experiences is sad. The proposed legislation for wood and fiberglass boats does not seem reasonable and it is cost prohibitive for these small, independently owned boat proprietors. None of them have \$1,000.000 to comply with these new regulations. The loss of an entire "occupation or line of work" , sportfishing profession, is unfortunate. It will be a real loss for future generations not to have an opportunity to experience sportfishing on the the ocean	719.1
The loss of revenue for the coastal communities where these whale watching and sportfishing boats currently conduct their businesses will be affected. These seaside attractions will no longer include harbor cruises, sportfishing, whale watching and other boating activities that enhance their tourist coffers. It will no longer be feasible to enjoy a day out on the ocean with family and friends, whether whale watching or catching fish for dinner.	719.2
	719.3
	719.4
	719.5

REEL STEEL SPORTFISHING  
6934 Seaview Dr  
Eureka, CA 95503

October 1, 2021

Ms. Liane Randolph, Chair  
California Air Resources Board, c/o chc 2021  
1001 I Street, Sacramento, CA 95814

Dear Ms. Randolph,

Reel Steel Sportfishing is a small family owned business located in Humboldt County California. These last two years have been especially trying for us. Our income comes from fishing, crabbing and sightseeing charters on our 36 foot boat. Our season normally runs from May to November and we work 7 days a week when the weather allows. This year we were only able to get out 9 days in May due to weather. In July and August, forest fires closed most of the highways into Humboldt County and many of our customers had to cancel their trips. Since most of those people were from out of the area they also canceled their motels etc.. It was tough for everyone here. Add in Covid and early season closures and well, it seemed it couldn't possibly get any worse.

The CARB rules for fishing charter boats as proposed would likely finish us off. Two years ago we replaced our single diesel engine. At that time we thought we were all set for the foreseeable future. Now it looks like we may not be.

I know that there are ways to protect the California environment and it's hardworking citizens at the same time. I hope that you will work to find a solution that works for all of us.

Sincerely,

Handwritten signatures of Tim and Sherry Klassen. The signature for Tim is written above the signature for Sherry.

Tim and Sherry Klassen  
Eureka, CA

Comment:

My family has been fishing for years in the Pacific Ocean. Three of my family members have there boat captain licensees and depend on Sportfishing as a living in So Cal. My friends and family depend on fishing from these boats to provide food and memorable family sporting trips. By making these upgrades would send the sport fishing industry into a tailspin and cause an economic disaster to to the boating and fishing industry in California. Please vote No to make any changes to this valuable industry.

We in California can't let this happen. Governor Newsom needs to come up with another plan than stronghold an industry that depends on these boats for commercial and pleasure. Wood and fiberglass hauls have been around for years. Please don't let this happen. Again Vote NO.

Subject: New engines etc on fishing/whalewatching boats.

Comment:

To whom it may concern,

As I am sure you are well aware, the California fleet of recreational fishing boats is a truly unique entity -- not found anywhere else in the US. Sure -- other places have recreational boats, but not like here.

Each boat represents an enormous source of income to the community. From the individual scooping sardines out of a bait barge into the bait holds to the captains and crews that provide that bait, to the shops, restaurants, and hotels around the landings. Each of these individuals and businesses rely on those vessels to thrive.

Also the amount of money that each angler invests in a trip is astounding -- from rods and reels, to tackle and food -- the total dollar spend is tremendous.

If CARB legislates emissions and other requirements that would force these vessels out of service, or require them to buy and install new engines to comply, it is likely that 80% + of the vessels and their owners would simply go out of business.

While I am 100% for emissions control and protecting our environment, it doesn't make much sense to target a few 100 recreational boats in california as a source of significant pollution, when 1000's of massively polluting super-tankers, container ships, and other commercial vessels transit our ports yearly.

If indeed CARB feels the need to legislate extreme emissions control over the fishing fleet, please at least subsidize the transition rather than burdening the individual boat owners with the full cost.

If it is for the costal environment that all taxpayers share, lets  
let the taxpayers help make it right.

Regards,

Matt

Comment:

California Air Resources Board-

I fish. I fish for outdoor recreation and to put health protein on my family's table.

I started fish on sports-fishing boats with my parents before I was old enough to need a fishing license. I brought my kids up fishing as a family activity and life-skill teaching opportunity, and to provide them with the same opportunity I value as a kid, and as I continue to cherish.

The sports-fishing industry provides the public the means to get out on the water and enjoy the benefits I described above, that few can afford to do on an individual basis.

Please do not destroy the sports-fishing industry or mandate capital cost improvements/retrofits that will drive up the admission price to preclude the middle-class from participating; if the proposed CARB regulations are implemented, sports-fishing will become an activity only the wealth can afford.

Please allow me and my family to continue fishing by working with the sports-fishing industry to find a mitigated solution that does not sink the fleet.

# MARINA DEL REY®

## convention and visitors bureau

September 28, 2021

Ms. Liane Randolph, Chair  
Clerks' Office, California Air Resources Board  
1001 I (eye) Street  
Sacramento, CA 95814

RE: Public Comment – Proposed Amendments to Commercial Harbor Craft Regulation, November 19, 2021, Hearing. (CARB Engine Emission Regulations; Passenger Sportfishing, Whale Watching Boats, and Excursion Vessels).

Dear Madam Chair:

The Marina del Rey Convention and Visitors Bureau stand firmly opposed to the engine emission regulations proposed by the Administration that will decimate recreational fishing's \$5.6 billion annual contribution to our State's economy and undermine the Administration's efforts to restore half of the 1.2 million hospitality and tourism related jobs lost during the COVID-19 pandemic. We are concerned about the California Air Resources Board's (CARB) costly proposal on engine emission regulations because it 1) requires technology that has not been developed or tested safe on passenger harbor crafts and 2) would result in most passenger sportfishing and whale watching boats going out of business within 6 years from the adoption of the proposed regulations due to the cost of vessel replacement. Furthermore, CARB's expectation that these small business owners can easily finance new steel vessels is far-fetched especially if many existing vessels have no resale value in California and are still being financed via loans and these same businesses are focused on pandemic recovery. 724.1 724.2 724.3

Likewise, Excursion Vessels are equally vital to the visitor serving community and have faced huge business and economic challenges resulting from the Covid pandemic. Any new regulations, or further implementation of additional regulations and limitations, such as lowering the low use annual engine hour maximums and implementation of opacity testing should be avoided, or at the very least delayed, for a number of years so that this vital industry can recover. 724.4

Marina del Rey is a small tourist destination comprising 400 acres of land that is surrounded by hotels, restaurants and visitor attractions including popular sportfishing, whale watching, and excursion passenger boats—these passenger boat businesses, just like everyone else, are struggling to recover from the devastating economic losses they experienced during the pandemic. The sportfishing, whale watching and excursion vessel companies in the Marina and throughout California's coast provide communities a valued source of outdoor recreation and tourism dollars. Every year, boat charters in Marina del Rey are in the business of introducing

thousands of visitors and Angelenos to the magic of the open sea and appreciation for Pacific wildlife. Whale watching and sportfishing are two popular water activities in Marina del Rey, serving everyone from families with young children to multi-generational first-time and seasoned anglers.

While CARB's economic analysis of the proposed regulations most certainly underestimated the economic harm to passenger sportfishing, whale watching, and excursion vessel boat charters, the analysis did not evaluate the economic impact on California's hospitality and tourism industry as boat charters go out of business and visitor spending declines. It is unimaginable that the CARB board would consider the regulations until this oversight is corrected. 724.5

We support everyone working together to rebuild the State's post-pandemic economy. We urge you to take a closer look at CARB's irresponsible proposed engine emission regulations and realize that it would do the exact opposite: put passenger sportfishing, whale watching, and excursion boat charters out of business and deny Los Angeles County residents and tourists affordable and convenient access to offshore fishing and marine life excursions.

Thank you for your consideration.

Sincerely,

A handwritten signature in black ink, appearing to read 'Janet Zaldua', with a stylized, flowing script.

Janet Zaldua  
CEO, Marina del Rey Convention and Visitors Bureau

CC: The Honorable Gavin Newsom  
State Senator Ben Allen  
State Assembly Member Autumn Burke  
Los Angeles County Supervisor Janice Hahn

As you well know, the Newsom Administration has proposed passenger boat regulations that require new engines and technology that is not feasible from a safety, financial or operational standpoint.

Comment:

I agree with the mandates.

We need more environmental friendly sport fishing fleets out there.

I don't care that it could affect sportfishing fleets now because they contribute to environmental damage and overfishing.

They have also become like Disneyland in that It costs us a fortune just to take out the family for a day of fishing. In the past it was reasonable to take my family but now I can't even afford it because it is extremely costly and the fishing fleet has taking full advantage of its customers and so I really don't care about their concerns.

Protect the environment.

Comment:

Greetings:

I needed to reach out to you to question your proposed legislation. After reading it and discussing it with various stakeholders it definitely will do more harm than good.

The sportboat industry (at least in San Diego) will be crushed by this after a brutal two seasons because of covid. California climate change legislation is usually admirable and practical but this is neither.

Please do not finalize this harmful legislation!

Best regards,

Joseph Wayman

Subject: CHC2021 Save Our Boats

Comment:

CARB,

Your proposed regulations will devastate the local Sportfishing fleet. These boats create thousands of jobs and opportunities for the public to access our state's bountiful fisheries resources. Without public funding for conversion of the fleet to meet the proposed regulations, your actions will be a death sentence for the industry and will deny access to offshore fishing for the majority of the middle and lower class public. Please consider amending your plan to avoid the destruction of our fleet.

Comment:

I am writing you to please consider modifying your carb bill so that includes commercial passenger fishing vessels for hire. I am an avid fishing person and without those boats I would not be able to go out. It is barely cost effective enough right now but if the price was to go up we would never be able to go out. Please consider waiting for an engine that is designed to fit in The existing boats before you condemn all the boats.

Thank you, Sancesca Desouza

Subject: CARB restrictions on Charter Fishing Boats

Comment:

Why? I know thats a big question. It is my opinion that Newsom and his crew care nothing about Californians or California's economy. The over carbon foot print of few boats doesn't justify putting businesses and people out of work. I hope you reconsider your destructive ways and selfish decisions.

Comment:

please reconsider this regulation on Commerical Harbor Craft. the amount of expense to retrofit these "mom and pop" charter boats is cost prohibitive and in some cases can upset the balance of the vessel. Charter Fisherman are not the ones polluting our state.

Comment:

I'm writing to oppose the current proposal to require repower or retrofitting of exhaust systems to meet tier 4 requirements. This was a very poorly mapped out plan by CARB as there is not a timely and cost-effective solution available to the small business sportboat owners in California. Additionally the singling out of sportfishing boats for this mandate and its timing, but no similar mandate to other groups such as private yacht owners, commercial fishing and shipping vessels, land-based vehicles/equipment owned or operated by the state such as CalTrans, CalFire, SDG&E, PG&E, Univ. California, California State university or other governmental agencies or taxpayer supported affiliates of the State of California smacks of wholesale discrimination against a small group of small business owners because of their lack of political influence or monetary sway with Sacramento. There is a reasonable compromise available by allowing shifting to Tier 3 until technology catches up. You're not only hurting the owner operators of sportboats, but impacting a larger group of businesses that benefit from the sportboat business in this state. Boat crews, support staff, mechanical and boatyard workers, Tackle shops, bait receivers/suppliers, equipment manufacturers, fuel docks, harbor berths, affiliated restaurants and the ancillary uses of lodging and purchase of goods and tourism/travel that the sportboat industry brings to California will be lost. Also, this is discriminatory in that the basis for most people to use sportboats is because they are not in the income brackets that allows them to own a boat of their own. The great majority of participants are middle class individuals financially and they will lose a major recreation opportunity here. We all vote. We all will remember those who were supporting the common man versus those who are supporting vested financial interests and lobbyists representing them. Get your priorities straight.

Comment:

Hello, My name is Roman Davalos Jr. I've been Fishing with My Brother's & Family Member for Years. We've started with our Father, he has now passed. We keep this Tradition he enjoyed so much. It our way to connect with him & makes all the worries of our Day to Day go away. If this Bill Passes it will make it Hard to afford & try to keep Families like mine to come together as we do (4-5) times a Year. Like I believe it will with other Families. In addition making Boats upgrade so drastically is unfair. Your takin the Lively hood away from a Hard working Class of people. There is have to be a better resolution to ease the transition to green. I appreciate you given me opportunity to express my concerns.  
Thank you

I am messaging you to reconsider your bill and include commercial passenger fishing vessels for hire with commercial fishing vessels.

738.1

I have been fishing my whole life and your bill would put 90% of the boats out of business. Can you please wait until the technology that fits in the existing boats to come out so we don't lose access to our resources considering it would be too expensive for me to keep fishing. I am asking that you please reconsider your bill.

Subject: CARB ruling on Sportfishing boats

Comment:

My name is Ron Koyasako I'm the owner of the the sportfisher Nautilus out of San Francisco Fisherman's Wharf. I have owned the Nautilus for 3 seasons now and have turned a failed business into a successful fishing business. I bought the Nautilus as it had a Tier 3 Cummins 6.7 diesel motor and a certificate of inspection from the USCG for 20 passengers and 2 crew. The boat is well maintained and is 30 feet by 12 feet. With the proposed changes , it would be impossible to retrofit with a filtration system, Tier 4 engine replacement or batteries as space and weigh on a boat of this size would be prohibitive. The boat was manufactured in December of 2015 with USCG specifications. I would like the CARB to reconsider the Harbor craft air regulations or give us more time as technology, USCG and boat owners are not ready for such drastic changes as no solution is available.  
Thanks  
Ron Koyasako  
Captain/Owner Nautilus

Subject: CHC2021 Save Our Boats"

Comment:

Dear C.A.R.B.,

I'm spiritually connected to the ocean. Being born in Hawaii I have great love and respect for the ocean and all that it brings. I surf, boat, fish the ocean and a few times have also had the ashes of loved ones that have passed scattered at sea.

If these regulation are put into place it would make it more difficult for an individual or small business to provide for their family or enjoy all that the ocean offers.

Please withdraw these proposed regulations on personnel water crafts and for the small business owners of fishing boats that cater to the individuals to provide food for the families. Also for the small business owners that provide other services on the ocean.

Regards,  
Greg

To whom it may concern,

My name is R.J. Waldron I own and operate the charter boat  
Sundance. I

am a board member of the Golden Gate Fisherman's  
Association(ggfa).

I'm writing in concern of the proposed mandate for tier 4 engines  
in all harbor craft. If this passes I will not have a future in the  
the business I devoted my life to. I've invested all my time and  
money into my boat! I worked on the Sundance starting in 2011 and  
purchased it from the previous owner in 2015, since then I've kept  
up with upgrading to the most state of the art engines including  
the tier 2 engines that I have today. I'm currently in the process  
of upgrading to tier 3 engines

I ask that you reconsider your mandate and let us stay in  
operation

with our tier 3 engine. If I had to replace my boat and have a new  
boat built and or get a new engine the cost of all this would put  
me

out of business. Also we only run our vessel at 60 percent power  
only 15 percent of the day on the water while the other 85 percent  
of the day we only run  
the engine at 12-14 percent load.

Aside from my personal concerns it would be such a tragedy if we  
couldn't take people out fishing everyday. Families, fathers/mother  
and sons/daughters, friends and corporations doing team building.  
Fisherman look forward to spending time with friends and family on  
the charter boats every year!

Capt. R.J. Waldron

Comment:

I am messaging you to reconsider your bill and include commercial passenger fishing vessels for hire with commercial fishing vessels.

748.1

Please wait until the technology is available before passing this bill, as it will take out most fishing businesses. Passing this bill will cause us to lose access to our resources because it will be too expensive for me to keep fishing. I am asking you to please reconsider your bill. we don't want to lose the existing vessels. thank you

Comment:

Private and commercial sport fisherman should not be subject to the proposed rules on exhaust emissions. Many of these commercial boats have been sailing for decades; the cost to meet these standards would be prohibitive and would put them out of business. The same is true for private boaters. My boat is 24 years old and I am retired. I cannot spend \$15,000-\$20,000 on a new outboard motor, even if a motor meeting these requirements were available. As far as I can see, no such outboard motor currently exists.

Subject: Save CA Sportfishing.

Comment:

Members of the board,

I am writing to express my frustration and my outrage at your proposed regulations on commercial harbor craft such as sport fishing and whale watching vessels which operate in our state.

For more than twenty years, my uncle Mr. Dan Salas has operated tour and sportfishing boats in the waters of Los Angeles and Long Beach, a thriving business that has put food on his table and his children through college. Now, your draconian, outright impossible engine regulations proposed this year seek not to cut down on pollution in our state, but to snuff out the livelihood of small businesses like my uncle Dan's all for the sake of stamping out what little pollution that small charter vessels emit. This isn't about pollution is it? It's about stamping out the little guy. If this board, this state, and its government was really interested in reigning in pollution on our coasts, why not focus on the ports, the cargo vessels with their oily industrial powerplants instead of the little guy?

What you are proposing, if I have the story straight is to install a technology that doesn't exist yet in an environment that it hasn't been even remotely tested for use in and then assume that everything will be fine. I've read a lot of ridiculous things in my day and this might just take the cake. This plan eschews all logic for the sake of an agenda that supports a select few whiles ruining the many. Ever think to stop and wonder how many tourist dollars are brought in by these businesses? Ever think to consider the economic impact of stamping even briefly out a staple tourism industry in our state?

In closing then I ask then that CARB think long and hard about what it wants to do. I ask that the board understand that what it's doing is not just a death sentence to a few family businesses, it's a death sentence to one of the most prolific of tourist industries in California.

Keep California the Golden State that it aspires to be as we recover from the pandemic storm and keep your hands OFF California sportfishing.

Signed,  
Michael Zurvalec  
Orange County, California.

Subject: Proposed Amendments to the Commercial Harbor Craft Regulation

Comment:

Such a proposal would place many people out of business, or at the very least into a hardship. Such passing of laws appears to be a form of personal for some individual with connection to others in our State Government. Especially when there are already conflicting laws on the books.

Subject: Proposed regulations to passenger boats in California

**Comment:**

Please CARB members considering new proposed regulations on passenger boats keep in mind all the livelihoods that are directly and indirectly affected by these proposed changes. The economic toll will be devastating for many coastal communities which benefit greatly from the money spent in order to enjoy the ocean and all of the interesting natural wonders associated with it. I'll admit that I am an avid fisherman, but it is not selfish reasons that I want to preserve ocean passenger boats. First I think the services make the public more interested in protecting everything associated with ocean by giving them a connection to the ocean. Second I feel affordable experiences provide an equal opportunity for all people to develop a respect and caring attitude of the ocean and all it has to offer all of us. Lastly I believe we all benefit when an experience is afforded to all within reason. By not making an experience feasible for people I feel more are affected negatively than the benefits. I urge you to consider the above statements when considering the proposed regulations. Thank you, John T. Richter

Comment:

Please don't take away our fishing fleets because if a new regulation. It would be more appropriate to grandfather in existing boats and enforce the new regulation on new builds. This would be akin to telling all car owners they have to modify their cars to meet a new regulation. I don't think anyone would be willing to replace their car motors because of a new regulation. Think about it.

Comment:

It seems almost inconcievable that a regulation would be passed that would put small business people (sportfishing boats owners) out of business. The requirement to upgrade their boats power plants may be financially unfeasable. Many small boat operators have their entire lifes work at risk. There would also be a ripple down effect to small businesses that depend on sportfishing. Sportfishing landings are tourist attrations.

As a sportsfisherman I oppose unfair regulations which affects my ability to charter a fishing trip because an unfair regulations have destroyed a small business industry and the people connected to it.

Comment:

Commercial fishing, Sport fishing, whale watching and just boating in general will hurt tourism on the central coast of California if you consider these proposed amendments to the Commercial Harbor Craft Regulation. Besides, metal boats rust which would be terrible for the environment and health of the creatures that live and thrive in our ocean and lakes.

Comment:

I've been fishing on the boats on the southern cal. coast for almost 60 years, and the people who own and operate these boats are more concerned about their environment and the fisheries than 90% of the general public. they almost all changed out their engines about 8 years ago at a large expense. now the new requirements will almost surely collapse the entire industry. there are only about 300 of these sport boats on the coast and I fail to see what, if any impact they have on our air. the new requirements would surely break most of these small business owners. because of that I strongly that the board not go forward with the new regulations related to the sportfishing boats. there should be some consideration of the economic impact of new regulations.

As an Asian-American, I am asking you to not pass this Bill. Please wait for the technology to come out with an engine that will fit in the current vessels. I work on one of the vessels that will be put out of business. I have worked on commercial passenger fishing vessels for hire and it is my dream to become a captain myself someday. Why can you not include commercial with sport fishing vessels as there are only 170 commercial passenger vessels in California. I am begging you to not crush my dream and stop me from being able to support my family.

Subject: Big fan of these proposed amendments

Comment:

There are very few certainties in life. We trust some things that we are told because others have passed that knowledge along, and their consistency in truth has given comfort in that knowledge. We also know some things to be certain about these proposed amendments to commercial harbor craft regulation. 1. We know that these are amendments are proposed. Anyone who says otherwise is a fool. They are indeed proposed. They should not be considered as final regulations. They should only be considered to be proposed. They should also not be considered regulations that are not proposed, for they are indeed proposed. 2. We know they impact the way California regulates commercial harbor craft. It should not be said that they impact residential craft, like speedboats and inner tubes. Paddle boats will also have to wait for their own regulations. 3. We know the deadline for comments on this item is November 15, 2021 by midnight. Anyone who says that these comments are due by November 14, 2021 by midnight is simply wrong, and undercutting this important deadline. Thank you for your time.

Subject: CHC2021 Save Our Boats

Comment:

I am against Gov. Newsom's proposed Passenger Boat Regulations for new engines and technology to be installed into our current fishing, whale-watching and sight-seeing vessels. This proposed regulation would put the vast majority of these valuable business's out of business. The cost to modify these vessels to install new engines and technology would be too much to absorb. We need to keep these vessel's running as they provide a great experience that will be lost by many if these fleet's end up closing down forever. They also bring in a HUGE amount of money to the Bay Area which will be lost from the tourism and fishing industry. Save our Boat's, Thank You

The only thing holding California together are the sport fishing boats. Rich evil politicians are always trying to ruin something thats good. You people wouldn't like it if the golf courses were shut down.

Subject: "CHC2021 Save Our Boats"

Comment:

I realize that fossil fuel needs to be eliminated from the Earths eco-system but this attack on ships is totally unjustified. How can you mandate equipment be used that dose not even exist?

On a personal level, I have reached retirement age and my main source of recreation is fishing. Both fresh and saltwater. How can dismantling an industry, like sport-fishing, solve problems? You create many more problems with this approach than anything solved. How am I supposed to enjoy my retirement? I already have a significant investment in equipment. That investment will become worthless, just like peoples jobs, their boats, their livelihoods.

Focus on real problems. Homelessness, covid-19 containment, a stable government that actually works for the people that voted for You. Please do not ruin a California industry that is a part of MY LIFE. I am a native of San Diego and enjoy most of the aspects of what this initiative will destroy. Changes that CARB proposes will take time to implement, so please slow down and do it right. Let REALITY catch up to the proposals!

Thank You  
Sincerely, Ron Beveridge

Comment:

I am a fisherman ,I am out fishing in the ocean around twelve times a year. I am concerned that the new engine regulations will affect my ability to go ocean fishing. Also I know many people that work in the Sport fishing industry. My son is also included in that group so he would have a possibility of losing his job . he's not young anymore so transitioning to another one would be very difficult. I'm hoping that we don't need to do these regulations that would so adversely affect the sport fishing industry it is a small segment and dosent have a lot of voice on their own they would be so negatively impacted. Thank you Howard young

Good morning, I'm getting ready to go fishing, i depend on this source of food for my family. Your new regulations bering small boats should be for boats over 100 feet not boats that are wood hold a small amount of people, please re categorized the vessels for this industry has taken a huge hit for 2 years already. Thanks  
Mr Beck

Subject: Do NOT require all boats to meet new emissions upgrades

Comment:

Our family has sport fished in California for decades - and we also periodically enjoy whale watching. At one time we also owned a boat and we are strictly middle class.

it is TOTAL discrimination to pass these laws requiring the upgrades - the only people who will be able to afford it are the richies - like the Governor (fancy diner that he is) and his ilk.

772.1

You would be taking away joy from families of all incomes. Last night at a church finance committee meeting, in our church's older neighborhood, I watched as a father and son lovely readied a smaller fishing boat (with engine) for a trip over the holiday weekend.

You would be STEALING that from thousands of us. And many church, community groups, schools utilize the services of these people for therapy, field trips etc.

My 3 year old grandson deserves the right to a fishing trip on a friend's boat - just like his Dad and his Grandpa before that.

you pass this? And thousands and thousands of boat owners will have to sell - and will be able to sell . to no one.

772.2

Economic hardship all around.

Tired of this Governor and his cronies making rules and regulations that do not effect him.

What is wrong with you people ? Have you totally lost your good judgement ?  
After reading the amendment proposal before your Board I am disgusted and dismayed that you could even consider these changes fair much less possible.  
Please come to your senses and do not ruin the sport fishing industry in CA with your misguided agenda. This is another attempt to destroy California's future in the name of some far fetched environmental fantasy.  
Disappointed as usual in CA leadership.  
R. Hochhaus

Comment:

This law will destroy the sport fishing and whale watching business along our coast. Most of these boats are ran by families that can't afford to change out the engines in their boats. This bill would put an undo burden upon those families. It also would end up costing the people that go out on these boats considerably more money to do so. I am retired and am already close to not being able to afford to go out and fish on a party boat. It's time to stop all of this nonsense.

Comment:

To the Board,

Please do not kill the fishing industry in California like you have killed many other industries. The pandemic has crippled the economy and just when it's starting to come back to life your regulations will put hard working families out of business. I can move to someplace when the regulations are not thought up by some idiots who know Nothing about life in the real world, but your regulations will kill hard working families.

Comment:

Hello,

I am very sad to hear about the new proposed passenger boat regulations that would greatly affect the sportfishing industry. This is something that I've been doing for 10 years and one of the reasons I've moved closer to the coast. It provides great joy to myself, my family, and my friends. It also provides a livelihood to many friends who make a living off of the sportfishing industry. I hope that the CARB reconsiders this proposal.

Subject: CHC2021 Save Our Boats

Comment:

Fishing has been apart of our life for years. I have gone out with my grandpa some 53 years ago and that's when I first fished, I was hooked..pardon the pun. Since then, we have taken dozens of trips deep sea fishing with friends, family members, business colleagues. It is a fun and enjoyable time. Not only is it a sport but its a time to bond together, its a time to meet new people, and its also a time to see the big blue ocean and all the creatures you can only see out on a boat. Please make sure these trip continue to happen for the thousands who enjoy it. We also like to harvest what we catch as it is as fresh as one can get. A lot of the fish caught out in the ocean can not be found in local stores so those who love to eat fish rely on this as well. The fact that it would also kill many peoples way of life and shut down the businesses that go back 100 years. Please save our boats and let us fish.

Comment:

California Air Resources Board,

It is my opinion that this attack on the commercial boating businesses is an outright disgrace. I have fished all my life, it is one of the things I love to do. Right now the ticket prices are out of control because of the Pandemic. This is the worse time to make things worse. Do you have nothing else to attack other than the very small commercial boating industry. If you succeed in the collapse of the boating industry in regard to the sportfishing groups, people will just find another way to fill the need. Wouldn't it make more sense to attack big businesses that pollute the air or the big fishing boats that use large nets. This will add additional expense to tickets, licensing and equipment. It is truly a Newsome suck up to Dems who probably don't even fish. They are sticking their noses where they do not belong. Shame on you people.

Put my name on the list that will vote for someone else next year. This just puts a black mark on Newsome. Good luck!!

To Whom It may concern of the Members of the Board,

I have been sportfishing fanatic on the public sportfishing fleet in San Diego to Los Angeles County for 40 years. From the times spent with my Dad, Brothers, Friends, my children and future grand children I hope and pray you don't make any proposed passenger boat regulations to put 100 of fishing vessels out of business. This will destroy the future of our loved sportfishing industry for generations.

My group alone brings \$\$\$10's of thousands to the social fleet. If this hardship gets put on the boats and they raise prices we will find other opportunities in different states.

Comment:

Please consider these boats are needed. I take my sons fishing every year and this will stop that. Why are you doing this? It need to stop.

The boats do not effect the air like diesel trucks do. There are hundreds of boats while there are millions of trucks. Go after the trucks! Stop being foolish and common sense

### Comment:

I am 47 years old. Born and raised on the coast of Southern California. I grew up going to the beach, surfing and fishing. I have been Whale Watching and Fishing on the Whale Watching boats and fishing on the Sportfishing boats all along the California Coast from Santa Barbara down to San Diego. Fishing is not like what it used to be and it is getting harder and tougher for the Whale Watching and Sportfishing boats to survive. Especially with what the world is going through with Covid 19.

The new regulations proposed by the California Air Resources Board (CARB) in regards to the engine and emission control regulations will be costly and for the most part technically infeasible. Whale Watching and Sportfishing boats should be the least of the CARB's concern. What about commercial fishing boats, shipping cargo boats (can produce the same amount of pollution as 50 million cars) and the worst, run offs from land ! ! ! Why doesn't the CARB deal with these enormous polluters first.

Whale Watching and Sportfishing boats should be the least of CARB's concern when it comes to Ocean pollution. What about offshore drilling. We just had 126,000 gallons of crude oil spill into our waters off the shore of Huntington Beach, CA ! What about this. Offshore drilling for oil should never have happened in first place if CARB is concerned about Ocean pollution. Can offshore drilling guarantee 100% there will be no leaks or pollution ? Absolutely not.

Please do not hurt the Whale Watching and Sportfishing industry more than it is hurting right now. If you want them to change, what about funding it and making it easy and feasible for the industry. We can bail out Banks, lets bail out the Whale Watching and Sportfishing industry then.

The impact of the Whale Watching and Sportfishing industry is miniscule compared to what I have listed above. Why aren't you more concerned about the major polluters and do something about that first !

Thank you for your time and I hope you reconsider what you are about to do. These are people lively hood, and our recreation.

Subject: CHC2021 Save Our Boats

Comment:

To the board members of CARB. The Newsom Administration has proposed passenger boat regulations that require new engines and technology that is not feasible from a safety, financial or operational standpoint.

By the boards own own admission, the proposed regulations will likely remove passenger boats made of wood and fiberglass from service. This would apply to over 80% of all boats! If boat owners can't afford to spend millions of dollars for new metal boats or you can't or won't pay twice as much for boat tickets to pay for the new boats, boat owners will be forced out of business.

I am requesting board members to consider that as boats go out of business millions of Californians will be denied access to the open sea and significant economic harm will come to coastal communities that depend on outdoor tourism. Please know this means me and my family may not able to harvest your own food and to enjoy all the splendors of the sea!

Subject: New Offshore Sportfishing and Signseeing Boat Regulations

Comment:

I am totally against ANY of the proposed changes to the hull and engine requirements for offshore sportfishing and signseeing boats. The very marginal reduction in pollutants is far outweighed by the economic impact on the boat operations.

Please do not make honest, hardworking people lose their livelihoods in the name of an environmental utopia

Lyle Weaver,  
Woodside, CA

Subject: CHC2021 Save Our Boats

Comment:

I would like to take this opportunity to expose the flaws in the current proposal, authored by CARB and the Newsome Administration, that will require the sport fleet to re-engine their boats. I am a proponent for saving the planet but it must be done with science and common sense. That being said I would like to use math to prove my point, math never lies.

Per CARB, there are 352 commercial vessels and 3,153 Harbor Craft in CA affected by this proposal. Per the DMV there are a total of 669,191 vessels registered in CA. This figure does not include vessels documented by the Coast Guard. Placing Draconian overreaching regulations on 352 commercial vessels and 3,153 harbor Craft (3,505 total) equates to impacting just .005 or one half of one percent of the total vessels. The impact of drastically eliminating the polluting effects of one half of one percent of the total vessels will have almost zero impact on the perceived pollution problem. When you look at it from a national perspective, there are 11.88 million boats in the U.S. as of 2018 per Statista, impacting this small number of CA boats will only be .00029 or 2.9 hundredths of one percent of boats in the U.S., probably the equivalent impact on the national environment of asking a town of 3,500 people to stop barbequing. Does this nonexistent change to the environment warrant the severe economic impact to the livelihoods and recreational activities of millions of people because of this proposal? No sane person would answer that in the affirmative.

So we have to ask why would anyone propose something so nonsensical? I can only come up with two reasons, giving them the benefit of the doubt on understanding simple mathematics. First, the overall plan is to require all CA vessels, commercial and privately owned to re-engine. This would still only be a small drop in the pollution bucket for the nation and the world, especially when you add in cars, trucks, planes, trains, etc.. Second, and more disturbing, is that per his own words Gov. Gavin Newsome likes

CA to be the first in overbearing orders, i.e. Mask mandates, Vaccine mandates, etc. This may be yet another instance of that.

Instead of this proposal perhaps we can come up with something similar to the Biden Administration's edict to have all new cars sold be electric by 2035. I'm not in total agreement with that, but at least then we have 14 years to engineer suitable solutions in lieu of a requirement to significantly impact the sport fleet and others starting in 2023 with no acceptable and equitable engineering solution available.

Subject: Dont be foolish with over regulating

Comment:

If you are going to regulate, get the gross polluters. Get the CHinese cargo ships with leaks. Dont pick on the small boaters as a whole. Be Scientists! Regulate only what makes a measureable difference.

Comment:

This a huge and unnecessary reaction to the supposed carbon emmision problem.

The solution can not be to destroy the off shore fishing fleet and to destroy the livelihood of thousands of hard working californians

Subject: Fishing Boat Regulations

Comment:

The new fishing Boats regulations to support clean air by January 1st 2023 is quite harsh on the fishing Industry. Why are cars given so much time to change to clean air and boats are regulated to change so soon. Is it because it's not owned by big Corporations. Please stop this tyrannical bullying of family owned business.

Comment:

I applaud your concern for our wellbeing health. But your proposals are untimly and too costly.

What data are you using to support your proposals ?

update engine replacement to the new standards YES

New boat construction to steel ?

Then apply your proposals to all ocean going vessels, pleasure, sails, fishing,

Mike

Comment:

Please reconsider passing this bill. The Ca sportfishing fleet is no way prepared to handle these changes especially after this pandemic. Most of these boat will not be able to be retrofitted and some of the technology doesn't even exist yet.

Subject: New Commercial Harbor Craft Regulations

Comment:

Board Members

My name is Kimberly Smith and I am an avid sports fisher. I take my family out on fishing boats around the Bay Area during salmon and crab season. It's an opportunity for my family to come together. We've finally found something that has generational appeal that brings our family together. That's hard to do in the era of ever expanding technology.

My understanding is that new regulations that require small passenger fishing boats to purchase expensive new equipment, will put these boats in immediate danger of closing.

I fish on these boats year round. The cost of operating is quite high and the return quite variable. Delayed salmon crab seasons and COVID restrictions , while necessary , caused tremendous financial harm to this industry that they have still not recovered from.

Sportsfishing is a viral industry. Please consider the thousands of families that will not have access to the ocean waters if this industry collapses due to these regulations.

While the call for cooperation from passenger sports fishing boats to the protection and safety of whales is necessary, imposing industry killing regulations might not be the most prudent course of action.

In consideration of the recent financial catastrophes that have befallen this industry, the Commission should consider an extension to the implementation of these regulations to allow the industry time to develop and afford the proposed solutions.

In the meantime whales and other sea life can be protected by

improving tracking of whale migration in order to prevent conflicts between whales and Sportsfishing Fish and Game can then open and close fishing seasons accordingly.

I urge the Board to delay the implementation of these industry killing regulations.

Thank you for your consideration.

Comment:

I am emailing to ask for a better stance moving forward with forcing fishing boats to comply with future emission restrictions. I want you think of it like this: your current job is changing but to remain employed and bringing money to your family you are required to go back to school. Not just a few courses, but for 2 years. While you're doing that, you don't get paid and your job with CARB ceases to exist. Oh and you have to pay for 100% of your courses, CARB will not help you pay. Oh another thing, when you complete school it's not guaranteed that your new job will be there. I think the future restrictions are thoughtful about the environment, but those rules don't think about helping the people in and around these communities. I'm not a fishing company, but I understand the rigors of owning and operating a company. Just think about the restaurants, hotels, and other businesses that benefit for our lovely coasts. I believe the state should think about aiding and assisting these fishing companies to rig up their boats per CARBs demands. If these fishing companies can't comply that's lost revenue to areas like San Diego. It's not just one area you are harming. Please pass this on abs at anything help these fishing companies with the costs to comply. Thank you!

This is just a shameless attempt to shut down Sportfishing.

Why does this. Or apply to commercial fishing boats?

Why would this industry only have 12 months to re-power their entire industry and operation?

Where are the studies that show this is necessary?

## Below is the comment you selected to display. Comment 810 for Proposed Amendments to Commercial Harbor Craft Regulation (chc2021) - 45 Day.

First Name: Kevin  
Last Name: Brown  
Email Address: kbrown460@outlook.com  
Affiliation:

Subject: Proposed Amendments to Commercial Harbor Craft Regulations

Comment:

California Air Resources Board -

I request that the proposed CARB regulation regarding Commercial Harbor Craft be changed so as not to have such a severely negative impact on Tourism and Sport Fishing boats. I support improving the air quality in California. But I think new measures should be subject to a cost benefit analysis. In this case I find it hard to believe that the proposed regulations, when implemented will have a significant impact. Especially with only a few hundred boats subject to the change. However the costs to ocean sport fishing in CA will be great. Most sport fishing operations are barely profitable. If owners are forced to build new boats most will simply go out of business.

810.1

If new boats are built the cost of a ticket will be way to high for the average CA citizen. In fact it will be too costly for all but the upper economic echelon.

810.2

Please don't kill this industry! Instead you should be focusing your energy on much larger sources of pollution.

- Kevin Brown

Subject: Passenger fishing boat restrictions

Comment:

Please look at the fleet of container ships off the Los Angeles/ Long Beach port complex and the daily amount of pollution these ships cause. Our sport fishing fleets state wide do not cause as much strain on our environment as do these ships. Long Beach is constantly smoggy where the prevailing winds blow due to these vessels running generators and engines day and night not to mention the type of fuels that the burn.

Please reconsider your stance on passenger fishing and whale watching vessels.

Sincerely  
Randy Miner

Comment:

Sportfishing is a needed hobby and business for So cal.  
Forcing such drastic changes is not only irresponsible but it's  
also not feasible. IF there are to be any changes it should be done  
much more gradually as the boats are retired due to old age not due  
to policy changes.

Subject: CHC2021 Save Our Boats

Comment:

We strongly support the sport fishing industry and their opposition to the proposed regulations for commercial harbor craft. The cost of compliance will be enormous and the benefit to the environment minimal. Once again CARB really needs to do a realistic cost/benefit analysis and must include this in their decision-making process. There are multiple other less expensive actions that could benefit the environment substantially. By burdening the marine industry and boaters before cost-effective technology is available will deprive all but the very rich access to our coast and marine recreation.

Comment:

To whine it may concern,

Everyone realizes that these proposed laws do not make sense for the state or the sport fishing industry. Many Californians including myself use these boats several times annually as it is the only financially responsible way to fish out local waters. Many families will lose their jobs and we will lose our ability to fish here in California. Please reconsider these proposed changes

Subject: CHC2021 Save Our Boats

Comment:

It would be devastating to so many people and families if the proposed regulations went through around boating and sports fishing. I truly hope that these regulations do not go through.

Respectfully,

Dr. Ryan Dunnigan

Comment:

Some of the worst policies are made with the best intentions. It is not too late to fix this. Government agencies are supposed to work for and with the people. If implemented these regulations would devastate the sport fishing fleet. You are about to put in place regulations that cannot be met. That is unreasonable by any standard. I am urging you to work with the sport fishing fleets to implement realistic goals that take into consideration the achievements already made and can be supported by those whose very livelihoods depend on it. Much of what is being proposed is not financially feasible and in some cases the technology is not available. How can arb in good faith make regulations that cannot be complied with? I am asking you to not implement the regulations as currently proposed. Thank you

Subject: Against Proposed Amendments to Craft Regulation

Comment:

Dear California Air Resources Board Members,  
I strongly oppose the proposed amendments to the Commercial Harbor Craft Regulations to require new engines and technology.

My family and I have enjoyed fishing and whale watching trips on small commercial boats. Your proposed regulations would almost certainly make many go out of business. One of the best ways to protect the coast and its waters in the long-run is to have people use and enjoy it in small boats. Your proposed regulations are counter to this important goal.

If you want to protect the air, use some of your funding for better forestry management to fight future wildfires, which have a huge impact on air quality, rather than putting small businesses out of work and preventing the use of the coast.

Sincerely,  
Alyson Huey-Weaver

Comment:

Please do not move forward on new passenger boat regulations that require new engines and technology that is not feasible from a safety, financial or operational standpoint.

This is a penny wise pound foolish approach to carbon neutrality, Instead of destroying the livelihoods of sport fishing boat business owners, protect and restore more eelgrass and wetlands! put solar on rooftops and in irrigation canals. Thank you,

Anna

## Below is the comment you selected to display. Comment 828 for Proposed Amendments to Commercial Harbor Craft Regulation (chc2021) - 45 Day.

First Name: Regina  
Last Name: Hsu  
Email Address: rhsu@earthjustice.org  
Affiliation: Earthjustice

Subject: Over 3,400 Californians in support of strong Commercial Harbor Craft rule

Comment:

Dear Chair Randolph and Members of the Board:

On behalf of Earthjustice, I submit the following letters from Earthjustice supporters encouraging the California Air Resources Board (CARB) to move forward on several life-saving regulations, like the Commercial Harbor Craft rule, to combat deadly diesel pollution (appended as "Attachment A").

Last year, more than 3,400 Californians submitted letters advocating for CARB to adopt strong regulations to control pollution from commercial harbor craft and other sources of diesel pollution as quickly as possible. This overwhelming support for these regulations indicates that Californians are eager for agencies, including CARB, to take bold action to reduce emissions from significant sources of air pollution in the State.

CARB's proposed amendments to the Commercial Harbor Craft rule is a critical step towards reducing pollution from harbor craft, one of the top three sources of diesel pollution at the San Pedro Bay Ports and the Port of Oakland. This rule will provide significant health benefits, particularly to portside communities that bear disproportionate pollution burdens from this industry.

We appreciate your consideration of these letters, and we look forward to working with the Air Resources Board to clean up harmful pollution from the freight industry.

Sincerely,

Regina Hsu  
Earthjustice

-- Sent from **M .** to **California Air Resources Board** on Jun 12, 2020 --

Dear Chair Nichols and Members of the Board:

My name is M ., and I live in San Francisco.

I write to request strengthening regulations to clean up harmful air pollution from the freight industry. For decades, this industry has harmed our lungs and our climate. Cleaning up ships, which burn some of the dirtiest fuels in the world while they are at berth, is a critical strategy to protect us from harmful air pollution. In addition, moving swiftly to adopt life-saving regulations to clean up transportation refrigeration units and commercial harbor craft is critical to providing cleaner air to all Californians. As we seek to clean up the air and clean up climate pollution, these three regulations are amongst the most critical - especially because they provide greater protections for the disproportionately harmed Californians living near our major freight ports and warehouses.

It has come to my attention that industry lobbyists are fighting hard to prevent your agency from adopting these life-saving and common-sense regulations. We ask that you have the courage to defend our lungs and public health by adopting these regulations, even in the face of these powerful interests. With your leadership, we can make California's skies cleaner and defeat harmful climate pollution.

Regards,  
M .

My name is Mike Abler, and I live in Santa Cruz.

I write to request strengthening regulations to clean up harmful air pollution from the freight industry. For decades, this industry has harmed our lungs and our climate. Cleaning up ships, which burn some of the dirtiest fuels in the world while they are at berth, is a critical strategy to protect us from harmful air pollution. In addition, moving swiftly to adopt life-saving regulations to clean up transportation refrigeration units and commercial harbor craft is critical to providing cleaner air to all Californians. As we seek to clean up the air and clean up climate pollution, these three regulations are amongst the most critical - especially because they provide greater protections for the disproportionately harmed Californians living near our major freight ports and warehouses.

It has come to my attention that industry lobbyists are fighting hard to prevent your agency from adopting these life-saving and common-sense regulations. We ask that you have the courage to defend our lungs and public health by adopting these regulations, even in the face of these powerful interests. With your leadership, we can make California's skies cleaner and defeat harmful climate pollution.

Regards,  
Mike Abler  
99 Frederick St  
Santa Cruz, CA 95062

My name is Linda Alamprese and I live in Malibu and write to request strengthening regulations to clean up harmful air pollution from the freight industry. For decades, this industry has harmed our lungs and our climate. Cleaning up ships, which burn some of the dirtiest fuels in the world while they are at berth, is a critical strategy to protect us from harmful air pollution. In addition, moving swiftly to adopt life-saving regulations to clean up transportation refrigeration units and commercial harbor craft is critical to providing cleaner air to all Californians. As we seek to clean up the air and clean up climate pollution, these three regulations are amongst the most critical - especially because they provide greater protections for the disproportionately harmed Californians living near our major freight ports and warehouses.

It has come to my attention that industry lobbyists are fighting hard to prevent your agency from adopting these life-saving and common-sense regulations. We ask that you have the courage to defend our lungs and public health by adopting these regulations, even in the face of these powerful interests. With your leadership, we can make California's skies cleaner and defeat harmful climate pollution.

Regards,  
Linda Alamprese

Cleaning up ships, which burn some of the dirtiest fuels in the world while they are at berth, is a critical strategy to protect us from harmful air pollution. In addition, moving swiftly to adopt life-saving regulations to clean up transportation refrigeration units and commercial harbor craft is critical to providing cleaner air to all Californians. As we seek to clean up the air and clean up climate pollution, these three regulations are amongst the most critical - especially because they provide greater protections for the disproportionately harmed Californians living near our major freight ports and warehouses.

It has come to my attention that industry lobbyists are fighting hard to prevent your agency from adopting these life-saving and common-sense regulations. We ask that you have the courage to defend our lungs and public health by adopting these regulations, even in the face of these powerful interests. With your leadership, we can make California's skies cleaner and defeat harmful climate pollution.

-- Sent from **Gail Allison** to **California Air Resources Board** on Jun 11, 2020 --

Dear Chair Nichols and Members of the Board:

My name is Gail Allison, and I live in Sacramento. These industries negatively effect our air quality and our ocean's health. Too often the profit motive trumps safety and environmental protection efforts in a short term focus that does not address climate change or the mass extinction of animal species but exacerbates both.

I write to request strengthening regulations to clean up harmful air pollution from the freight industry. For decades, this industry has harmed our lungs and our climate. Cleaning up ships, which burn some of the dirtiest fuels in the world while they are at berth, is a critical strategy to protect us from harmful air pollution. In addition, moving swiftly to adopt life-saving regulations to clean up transportation refrigeration units and commercial harbor craft is critical to providing cleaner air to all Californians. As we seek to clean up the air and clean up climate pollution, these three regulations are amongst the most critical - especially because they provide greater protections for the disproportionately harmed Californians living near our major freight ports and warehouses.

Dear Chair Nichols and Members of the Board:

My name is Judith Anderson, and I live in Long Beach. because in the LA area Black people and POC ar the most affected.

I write to request strengthening regulations to clean up harmful air pollution from the freight industry. For decades, this industry has harmed our lungs and our climate. Cleaning up ships, which burn some of the dirtiest fuels in the world while they are at berth, is a critical strategy to protect us from harmful air pollution. In addition, moving swiftly to adopt life-saving regulations to clean up transportation refrigeration units and commercial harbor craft is critical to providing cleaner air to all Californians. As we seek to clean up the air and clean up climate pollution, these three regulations are amongst the most critical - especially because they provide greater protections for the disproportionately harmed Californians living near our major freight ports and warehouses.

It has come to my attention that industry lobbyists are fighting hard to prevent your agency from adopting these life-saving and common-sense regulations. We ask that you have the courage to defend our lungs and public health by adopting these regulations, even in the face of these powerful interests. With your leadership, we can make California's skies cleaner and defeat harmful climate pollution.

Regards,  
Judith Anderson  
3621 Gundry Ave  
Long Beach, CA 90807

Cleaning up ships, which burn some of the dirtiest fuels in the world while they are at berth, is a critical strategy to protect us from harmful air pollution. In addition, moving swiftly to adopt life-saving regulations to clean up transportation refrigeration units and commercial harbor craft is critical to providing cleaner air to all Californians. As we seek to clean up the air and clean up climate pollution, these three regulations are amongst the most critical - especially because they provide greater protections for the disproportionately harmed Californians living near our major freight ports and warehouses.

It has come to my attention that industry lobbyists are fighting hard to prevent your agency from adopting these life-saving and common-sense regulations. We ask that you have the courage to defend our lungs and public health by adopting these regulations, even in the face of these powerful interests. With your leadership, we can make California's skies cleaner and defeat harmful climate pollution.

Regards,  
Carlos Arnold

My name is Zahir Aziz, and I live in Fremont.

I write to request strengthening regulations to clean up harmful air pollution from the freight industry. For decades, this industry has harmed our lungs and our climate. Cleaning up ships, which burn some of the dirtiest fuels in the world while they are at berth, is a critical strategy to protect us from harmful air pollution. In addition, moving swiftly to adopt life-saving regulations to clean up transportation refrigeration units and commercial harbor craft is critical to providing cleaner air to all Californians. As we seek to clean up the air and clean up climate pollution, these three regulations are amongst the most critical - especially because they provide greater protections for the disproportionately harmed Californians living near our major freight ports and warehouses.

It has come to my attention that industry lobbyists are fighting hard to prevent your agency from adopting these life-saving and common-sense regulations. We ask that you have the courage to defend our lungs and public health by adopting these regulations, even in the face of these powerful interests. With your leadership, we can make California's skies cleaner and defeat harmful climate pollution.

Regards,  
Zahir Aziz

I write to request strengthening regulations to clean up harmful air pollution from the freight industry. For decades, this industry has harmed our lungs and our climate. Cleaning up ships, which burn some of the dirtiest fuels in the world while they are at berth, is a critical strategy to protect us from harmful air pollution. In addition, moving swiftly to adopt life-saving regulations to clean up transportation refrigeration units and commercial harbor craft is critical to providing cleaner air to all Californians. As we seek to clean up the air and clean up climate pollution, these three regulations are amongst the most critical - especially because they provide greater protections for the disproportionately harmed Californians living near our major freight ports and warehouses.

It has come to my attention that industry lobbyists are fighting hard to prevent your agency from adopting these life-saving and common-sense regulations. We ask that you have the courage to defend our lungs and public health by adopting these regulations, even in the face of these powerful interests. With your leadership, we can make California's skies cleaner and defeat harmful climate pollution.

I write to request strengthening regulations to clean up harmful air pollution from the freight industry. For decades, this industry has harmed our lungs and our climate. Cleaning up ships, which burn some of the dirtiest fuels in the world while they are at berth, is a critical strategy to protect us from harmful air pollution. In addition, moving swiftly to adopt life-saving regulations to clean up transportation refrigeration units and commercial harbor craft is critical to providing cleaner air to all Californians. As we seek to clean up the air and clean up climate pollution, these three regulations are amongst the most critical - especially because they provide greater protections for the disproportionately harmed Californians living near our major freight ports and warehouses.

It has come to my attention that industry lobbyists are fighting hard to prevent your agency from adopting these life-saving and common-sense regulations. We ask that you have the courage to defend our lungs and public health by adopting these regulations, even in the face of these powerful interests. With your leadership, we can make California's skies cleaner and defeat harmful climate pollution.

Regards,  
Lori Bates  
109 Camarillo Ave  
Oxnard, CA 93035

I write to request strengthening regulations to clean up harmful air pollution from the freight industry. For decades, this industry has harmed our lungs and our climate. Cleaning up ships, which burn some of the dirtiest fuels in the world while they are at berth, is a critical strategy to protect us from harmful air pollution. In addition, moving swiftly to adopt life-saving regulations to clean up transportation refrigeration units and commercial harbor craft is critical to providing cleaner air to all Californians. As we seek to clean up the air and clean up climate pollution, these three regulations are amongst the most critical - especially because they provide greater protections for the disproportionately harmed Californians living near our major freight ports and warehouses.

It has come to my attention that industry lobbyists are fighting hard to prevent your agency from adopting these life-saving and common-sense regulations. We ask that you have the courage to defend our lungs and public health by adopting these regulations, even in the face of these powerful interests. With your leadership, we can make California's skies cleaner and defeat harmful climate pollution.

Regards,  
Diane Beglin

-- Sent from **clark bell** to **California Air Resources Board** on Jun 12, 2020 --

Dear Chair Nichols and Members of the Board:

My name is clark bell, and I live in South San Francisco.

I'm writing to request strengthening three regulations that will clean up harmful air pollution from the freight industry. This industry has harmed our lungs and our climate for decades. One is for cleaning up ships, which burn some of the dirtiest fuels in the world while they are at berth. The second and third are regulations to clean up transportation refrigeration units and commercial harbor craft--both critical to providing cleaner air to all Californians. As we seek to clean up the air and clean up climate pollution, these three regulations are amongst the most critical - especially because they provide greater protections for the disproportionately harmed Californians living near our major freight ports and warehouses.

I've become aware that industry lobbyists are fighting hard to prevent your agency from adopting these life-saving and common-sense regulations. Please, I urge you to have the courage to defend our lungs and public health by adopting these regulations in the face of these powerful interests. With your leadership, we can make California's skies cleaner and defeat harmful climate pollution.

My name is Victoria Bennett, and I live in San Diego.

I write to request strengthening regulations to clean up harmful air pollution from the freight industry. For decades, this industry has harmed our lungs and our climate. Cleaning up ships, which burn some of the dirtiest fuels in the world while they are at berth, is a critical strategy to protect us from harmful air pollution. In addition, moving swiftly to adopt life-saving regulations to clean up transportation refrigeration units and commercial harbor craft is critical to providing cleaner air to all Californians. As we seek to clean up the air and clean up climate pollution, these three regulations are amongst the most critical - especially because they provide greater protections for the disproportionately harmed Californians living near our major freight ports and warehouses.

It has come to my attention that industry lobbyists are fighting hard to prevent your agency from adopting these life-saving and common-sense regulations. We ask that you have the courage to defend our lungs and public health by adopting these regulations, even in the face of these powerful interests. With your leadership, we can make California's skies cleaner and defeat harmful climate pollution.

Regards,  
Victoria Bennett

-- Sent from **Blaze Bhence** to **California Air Resources Board** on Jun 11, 2020 --

Dear Chair Nichols and Members of the Board:

My name is Blaze Bhence, and I live in Cypress.

I write to request strengthening regulations to clean up harmful air pollution from the freight industry. For decades, this industry has harmed our lungs and our climate. Cleaning up ships, which burn some of the dirtiest fuels in the world while they are at berth, is a critical strategy to protect us from harmful air pollution. In addition, moving swiftly to adopt life-saving regulations to clean up transportation refrigeration units and commercial harbor craft is critical to providing cleaner air to all Californians. As we seek to clean up the air and clean up climate pollution, these three regulations are amongst the most critical - especially because they provide greater protections for the disproportionately harmed Californians living near our major freight ports and warehouses.

It has come to my attention that industry lobbyists are fighting hard to prevent your agency from adopting these life-saving and common-sense regulations. We ask that you have the courage to defend our lungs and public health by adopting these regulations, even in the face of these powerful interests. With your leadership, we can make California's skies cleaner and defeat harmful climate pollution.

Regards,  
Blaze Bhence

Cleaning up ships, which burn some of the dirtiest fuels in the world while they are at berth, is a critical strategy to protect us from harmful air pollution. In addition, moving swiftly to adopt life-saving regulations to clean up transportation refrigeration units and commercial harbor craft is critical to providing cleaner air to all Californians. As we seek to clean up the air and clean up climate pollution, these three regulations are amongst the most critical - especially because they provide greater protections for the disproportionately harmed Californians living near our major freight ports and warehouses.

It has come to my attention that industry lobbyists are fighting hard to prevent your agency from adopting these life-saving and common-sense regulations. We ask that you have the courage to defend our lungs and public health by adopting these regulations, even in the face of these powerful interests. With your leadership, we can make California's skies cleaner and defeat harmful climate pollution.

-- Sent from **Kate Bolton** to **California Air Resources Board** on Jun 11, 2020 --

Dear Chair Nichols and Members of the Board:

My name is Kate Bolton, and I live in Petaluma. It's not only clean air and social justice - the microscopic soot released by diesel engines is often carried to the snowy mountains where it traps the heat of the sun and causes the snowpack to melt sooner. With climate change producing warmer CA winters, the soot deposits have a magnified effect on a reduced snowpack, resulting in reduced water storage and, consequently, less summer water runoff for human use.

I write to request strengthening regulations to clean up harmful air pollution from the freight industry. For decades, this industry has harmed our lungs and our climate. Cleaning up ships, which burn some of the dirtiest fuels in the world while they are at berth, is a critical strategy to protect us from harmful air pollution. My name is Scott Borden, and I live in San Diego.

I write to request strengthening regulations to clean up harmful air pollution from the freight industry. For decades, this industry has harmed our lungs and our climate. Cleaning up ships, which burn some of the dirtiest fuels in the world while they are at berth, is a critical strategy to protect us from harmful air pollution. In addition, moving swiftly to adopt life-saving regulations to clean up transportation refrigeration units and commercial harbor craft is critical to providing cleaner air to all Californians. As we seek to clean up the air and clean up climate pollution, these three regulations are amongst the most critical - especially because they provide greater protections for the disproportionately harmed Californians living near our major freight ports and warehouses.

It has come to my attention that industry lobbyists are fighting hard to prevent your agency from adopting these life-saving and common-sense regulations. We ask that you have the courage to defend our lungs and public health by adopting these regulations, even in the face of these powerful interests. With your leadership, we can make California's skies cleaner and defeat harmful climate pollution.

Regards,  
Scott Borden

I write to request strengthening regulations to clean up harmful air pollution from the freight industry.

For decades, this industry has harmed our lungs and our climate.

Cleaning up ships, which burn some of the dirtiest fuels in the world while they are at berth, is a critical strategy to protect us from harmful air pollution.

In addition, moving swiftly to adopt life-saving regulations to clean up transportation refrigeration units and commercial harbor craft is critical to providing cleaner air to all Californians.

As we seek to clean up the air and clean up climate pollution, these three regulations are amongst the most critical - especially because they provide greater protections for the disproportionately harmed Californians living near our major freight ports and warehouses.

It has come to my attention that industry lobbyists are fighting hard to prevent your agency from adopting these life-saving and common-sense regulations.

We ask that you have the courage to defend our lungs and public health by adopting these regulations, even in the face of these powerful interests.

With your leadership, we can make California's skies cleaner and defeat harmful climate pollution.

Regards,  
Henry Boyle

Dear Chair Nichols and Members of the Board:

My name is Isis Brenner-Ward, and I live in Ukiah. preservve our oceans! The oceans keep all on earth alive.

I write to request strengthening regulations to clean up harmful air pollution from the freight industry. For decades, this industry has harmed our lungs and our climate. Cleaning up ships, which burn some of the dirtiest fuels in the world while they are at berth, is a critical strategy to protect us from harmful air pollution. In addition, moving swiftly to adopt life-saving regulations to clean up transportation refrigeration units and commercial harbor craft is critical to providing cleaner air to all Californians. As we seek to clean up the air and clean up climate pollution, these three regulations are amongst the most critical - especially because they provide greater protections for the disproportionately harmed Californians living near our major freight ports and warehouses.

It has come to my attention that industry lobbyists are fighting hard to prevent your agency from adopting these life-saving and common-sense regulations. We ask that you have the courage to defend our lungs and public health by adopting these regulations, even in the face of these powerful interests. With your leadership, we can make California's skies cleaner and defeat harmful climate pollution.

Regards,  
Isis Brenner-Ward  
1027 N Pine St  
Ukiah, CA 95482

-- Sent from **Christopher Brown** to **California Air Resources Board** on Jun 11, 2020

--

Dear Chair Nichols and Members of the Board:

My name is Christopher Brown, and I live in Oakland.

I write to request strengthening regulations to clean up harmful air pollution from the freight industry. For decades, this industry has harmed our lungs and our climate. Cleaning up ships, which burn some of the dirtiest fuels in the world while they are at berth, is a critical strategy to protect us from harmful air pollution. In addition, moving swiftly to adopt life-saving regulations to clean up transportation refrigeration units and commercial harbor craft is critical to providing cleaner air to all Californians. As we seek to clean up the air and clean up climate pollution, these three regulations are amongst the most critical - especially because they provide greater protections for the disproportionately harmed Californians living near our major freight ports and warehouses.

It has come to my attention that industry lobbyists are fighting hard to prevent your agency from adopting these life-saving and common-sense regulations. We ask that you have the courage to defend our lungs and public health by adopting these regulations, even in the face of these powerful interests. With your leadership, we can make California's skies cleaner and defeat harmful climate pollution.

-- Sent from **tammy bullock** to **California Air Resources Board** on Jun 11, 2020 --

Dear Chair Nichols and Members of the Board:

My name is tammy bullock, and I live in El Cajon.

I write to request strengthening regulations to clean up harmful air pollution from the freight industry. For decades, this industry has harmed our lungs and our climate. Cleaning up ships, which burn some of the dirtiest fuels in the world while they are at berth, is a critical strategy to protect us from harmful air pollution. In addition, moving swiftly to adopt life-saving regulations to clean up transportation refrigeration units and commercial harbor craft is critical to providing cleaner air to all Californians. As we seek to clean up the air and clean up climate pollution, these three regulations are amongst the most critical - especially because they provide greater protections for the disproportionately harmed Californians living near our major freight ports and warehouses.

It has come to my attention that industry lobbyists are fighting hard to prevent your agency from adopting these life-saving and common-sense regulations. We ask that you have the courage to defend our lungs and public health by adopting these regulations, even in the face of these powerful interests. With your leadership, we can make California's skies cleaner and defeat harmful climate pollution.

Regards,  
tammy bullock

My name is Diana Butler, and I live in Santa Rosa. It's gotten out of hand and our resources aren't finite.

I write to request strengthening regulations to clean up harmful air pollution from the freight industry. For decades, this industry has harmed our lungs and our climate. Cleaning up ships, which burn some of the dirtiest fuels in the world while they are at berth, is a critical strategy to protect us from harmful air pollution. In addition, moving swiftly to adopt life-saving regulations to clean up transportation refrigeration units and commercial harbor craft is critical to providing cleaner air to all Californians. As we seek to clean up the air and clean up climate pollution, these three regulations are amongst the most critical - especially because they provide greater protections for the disproportionately harmed Californians living near our major freight ports and warehouses.

It has come to my attention that industry lobbyists are fighting hard to prevent your agency from adopting these life-saving and common-sense regulations. We ask that you have the courage to defend our lungs and public health by adopting these regulations, even in the face of these powerful interests. With your leadership, we can make California's skies cleaner and defeat harmful climate pollution.

Regards,  
Diana Butler

My name is Meredith Caplin, and I live in Piedmont. Climate change is a more pressing issue than COVID-19. We must act now before it's too late.

I write to request strengthening regulations to clean up harmful air pollution from the freight industry. For decades, this industry has harmed our lungs and our climate. Cleaning up ships, which burn some of the dirtiest fuels in the world while they are at berth, is a critical strategy to protect us from harmful air pollution. In addition, moving swiftly to adopt life-saving regulations to clean up transportation refrigeration units and commercial harbor craft is critical to providing cleaner air to all Californians. As we seek to clean up the air and clean up climate pollution, these three regulations are amongst the most critical - especially because they provide greater protections for the disproportionately harmed Californians living near our major freight ports and warehouses.

It has come to my attention that industry lobbyists are fighting hard to prevent your agency from adopting these life-saving and common-sense regulations. We ask that you have the courage to defend our lungs and public health by adopting these regulations, even in the face of these powerful interests. With your leadership, we can make California's skies cleaner and defeat harmful climate pollution.

Regards,  
Meredith Caplin

I write to request strengthening regulations to clean up harmful air pollution from the freight industry. For decades, this industry has harmed our lungs and our climate. Cleaning up ships, which burn some of the dirtiest fuels in the world while they are at berth, is a critical strategy to protect us from harmful air pollution. In addition, moving swiftly to adopt life-saving regulations to clean up transportation refrigeration units and commercial harbor craft is critical to providing cleaner air to all Californians. As we seek to clean up the air and clean up climate pollution, these three regulations are amongst the most critical - especially because they provide greater protections for the disproportionately harmed Californians living near our major freight ports and warehouses.

It has come to my attention that industry lobbyists are fighting hard to prevent your agency from adopting these life-saving and common-sense regulations. We ask that you have the courage to defend our lungs and public health by adopting these regulations, even in the face of these powerful interests. With your leadership, we can make California's skies cleaner and defeat harmful climate pollution.

Regards,  
Laurie Carr

Dear Chair Nichols and Members of the Board:

My name is Shelley Cerasaro, and I live in Redding. I can't breathe - toxic air

I write to request strengthening regulations to clean up harmful air pollution from the freight industry. For decades, this industry has harmed our lungs and our climate. Cleaning up ships, which burn some of the dirtiest fuels in the world while they are at berth, is a critical strategy to protect us from harmful air pollution. In addition, moving swiftly to adopt life-saving regulations to clean up transportation refrigeration units and commercial harbor craft is critical to providing cleaner air to all Californians. As we seek to clean up the air and clean up climate pollution, these three regulations are amongst the most critical - especially because they provide greater protections for the disproportionately harmed Californians living near our major freight ports and warehouses.

It has come to my attention that industry lobbyists are fighting hard to prevent your agency from adopting these life-saving and common-sense regulations. We ask that you have the courage to defend our lungs and public health by adopting these regulations, even in the face of these powerful interests. With your leadership, we can make California's skies cleaner and defeat harmful climate pollution.

Regards,  
Shelley Cerasaro  
2250 Terrace St  
Redding, CA 96001

I write to request strengthening regulations to clean up harmful air pollution from the freight industry. For decades, this industry has harmed our lungs and our climate. Cleaning up ships, which burn some of the dirtiest fuels in the world while they are at berth, is a critical strategy to protect us from harmful air pollution. In addition, moving swiftly to adopt life-saving regulations to clean up transportation refrigeration units and commercial harbor craft is critical to providing cleaner air to all Californians. As we seek to clean up the air and clean up climate pollution, these three regulations are amongst the most critical - especially because they provide greater protections for the disproportionately harmed Californians living near our major freight ports and warehouses.

It has come to my attention that industry lobbyists are fighting hard to prevent your agency from adopting these life-saving and common-sense regulations. We ask that you have the courage to defend our lungs and public health by adopting these regulations, even in the face of these powerful interests. With your leadership, we can make California's skies cleaner and defeat harmful climate pollution.

I write to request strengthening regulations to clean up harmful air pollution from the freight industry. For decades, this industry has harmed our lungs and our climate. Cleaning up ships, which burn some of the dirtiest fuels in the world while they are at berth, is a critical strategy to protect us from harmful air pollution. In addition, moving swiftly to adopt life-saving regulations to clean up transportation refrigeration units and commercial harbor craft is critical to providing cleaner air to all Californians. As we seek to clean up the air and clean up climate pollution, these three regulations are amongst the most critical - especially because they provide greater protections for the disproportionately harmed Californians living near our major freight ports and warehouses.

It has come to my attention that industry lobbyists are fighting hard to prevent your agency from adopting these life-saving and common-sense regulations. We ask that you have the courage to defend our lungs and public health by adopting these regulations, even in the face of these powerful interests. With your leadership, we can make California's skies cleaner and defeat harmful climate pollution.

--

Dear Chair Nichols and Members of the Board:

My name is Elizabeth Claman and I live in an area hard hit by toxic fumes and chemicals.

I am writing to request that you strengthen the regulations in order to clean up harmful air pollution from the freight industry. For decades, this industry has harmed our lungs and our climate. Cleaning up ships, which burn some of the dirtiest fuels in the world while they are at berth, is a critical strategy to protect us from harmful air pollution. In addition, moving swiftly to adopt life-saving regulations to clean up transportation refrigeration units and commercial harbor craft is critical to providing cleaner air to all Californians. As we seek to clean up the air and clean up climate pollution, these three regulations are amongst the most critical - especially because they provide greater protections for the disproportionately harmed Californians living near our major freight ports and warehouses.

I have recently become aware that industry lobbyists are fighting hard to prevent your agency from adopting these life-saving, common-sense regulations. I therefore strongly urge you to have the courage to defend our lungs and public health by adopting these regulations, even in the face of powerful interests. With your leadership, we can make California's skies cleaner and defeat harmful climate pollution.

Regards,  
Elizabeth Claman

-- Sent from **Diana Coe** to **California Air Resources Board** on Jun 23, 2020 --

Dear Chair Nichols and Members of the Board:

My name is Diana Coe, and I live in Brentwood. To have a pristine environment for my grandchildren.

I write to request strengthening regulations to clean up harmful air pollution from the freight industry. For decades, this industry has harmed our lungs and our climate. Cleaning up ships, which burn some of the dirtiest fuels in the world while they are at berth, is a critical strategy to protect us from harmful air pollution. In addition, moving swiftly to adopt life-saving regulations to clean up transportation refrigeration units and commercial harbor craft is critical to providing cleaner air to all Californians. As we seek to clean up the air and clean up climate pollution, these three regulations are amongst the most critical - especially because they provide greater protections for the disproportionately harmed Californians living near our major freight ports and warehouses.

It has come to my attention that industry lobbyists are fighting hard to prevent your agency from adopting these life-saving and common-sense regulations. We ask that you have the courage to defend our lungs and public health by adopting these regulations, even in the face of these powerful interests. With your leadership, we can make California's skies cleaner and defeat harmful climate pollution.

-- Sent from **Ellea Concha-Leafequus** to **California Air Resources Board** on Jun 23, 2020 --

Dear Chair Nichols and Members of the Board:

My name is Ellea Concha-Leafequus, and I live in Richmond. I've visited the port of OAKLAND several times since I moved to OAKLAND in 2008. Most recently this week, June 2020.

The air and water pollution are increasing all around the port. I train sniffer dogs for enforcement of anti-poaching laws- we have detected contraband in containers brought into that busy port. There is no way now, with COVID slowdowns, that any agency or private consultants like mine can work there - we can't breathe well enough, with or without masks, in the increasing smog of countless diesel smoking trucks. The bilges dumped nearshore while tugs and barges also burn oil are killing the entire bay- estuary nesting/breeding/feeding critical habitats for many species of shorebirds are ruined, creating more endangered species and disallowing any recovery. There are now endangered mammals and herons added to the growing list of birds- and we should have been improving habitat restoration by now. Not dredging the fragile Bay for more oil-bilge-dumping traffic. We need to limit all cargo ships and trucks to only electric now, phase in the automated electric vehicles that Tesla has perfected here. We are investing now in solar et al renewable energy which will soon take over the infrastructure of this model port- we should be by now the cleanest and most automated- working with increasing humans trained in green-collar jobs- the Green New Deal will save our jobs AND the environment. After we finish implementing it now, we can soon return to new work - more efficient import/ export/ recycling, no more polluting here and we will be again an international example. I will return to enforcement of CITES & ILOS as soon as we stop killing OAKLAND and all this unique Bay's lovely wildlife sanctuary around a clean exemplary efficient port.

Thank U for implementing and enforcing all cleaner electric vehicle requirements.

I write to request strengthening regulations to clean up harmful air pollution from the freight industry. For decades, this industry has harmed our lungs and our climate. Cleaning up ships, which burn some of the dirtiest fuels in the world while they are at berth, is a critical strategy to protect us from harmful air pollution. In addition, moving swiftly to adopt life-saving regulations to clean up transportation refrigeration units and commercial harbor craft is critical to providing cleaner air to all Californians. As we seek to clean up the air and clean up climate pollution, these three regulations are amongst the most critical - especially because they provide greater protections for the disproportionately harmed Californians living near our major freight ports and warehouses.

It has come to my attention that industry lobbyists are fighting hard to prevent your agency from adopting these life-saving and common-sense regulations. We ask that you have the courage to defend our lungs and public health by adopting these regulations, even in the face of these powerful interests. With your leadership, we can make California's skies cleaner and defeat harmful climate pollution.

-- Sent from **Cecelia Conover** to **California Air Resources Board** on Jun 11, 2020

--

Dear Chair Nichols and Members of the Board:

My name is Cecelia Conover, and I live in San Diego.

I write to request strengthening regulations to clean up harmful air pollution from the freight industry. For decades, this industry has harmed our lungs and our climate. Cleaning up ships, which burn some of the dirtiest fuels in the world while they are at berth, is a critical strategy to protect us from harmful air pollution. In addition, moving swiftly to adopt life-saving regulations to clean up transportation refrigeration units and commercial harbor craft is critical to providing cleaner air to all Californians. As we seek to clean up the air and clean up climate pollution, these three regulations are amongst the most critical - especially because they provide greater protections for the disproportionately harmed Californians living near our major freight ports and warehouses.

It has come to my attention that industry lobbyists are fighting hard to prevent your agency from adopting these life-saving and common-sense regulations. We ask that you have the courage to defend our lungs and public health by adopting these regulations, even in the face of these powerful interests. With your leadership, we can make California's skies cleaner and defeat harmful climate pollution.

I write to request strengthening regulations to clean up harmful air pollution from the freight industry. For decades, this industry has harmed our lungs and our climate. Cleaning up ships, which burn some of the dirtiest fuels in the world while they are at berth, is a critical strategy to protect us from harmful air pollution. In addition, moving swiftly to adopt life-saving regulations to clean up transportation refrigeration units and commercial harbor craft is critical to providing cleaner air to all Californians. As we seek to clean up the air and clean up climate pollution, these three regulations are amongst the most critical - especially because they provide greater protections for the disproportionately harmed Californians living near our major freight ports and warehouses.

It has come to my attention that industry lobbyists are fighting hard to prevent your agency from adopting these life-saving and common-sense regulations. We ask that you have the courage to defend our lungs and public health by adopting these regulations, even in the face of these powerful interests. With your leadership, we can make California's skies cleaner and defeat harmful climate pollution.

Regards,  
gail costa

Dear Chair Nichols and Members of the Board:

My name is TERRY CROWNOVER, and I live in Rough And Ready. We must transition away from the burning of fossil fuels.

I write to request strengthening regulations to clean up harmful air pollution from the freight industry. For decades, this industry has harmed our lungs and our climate. Cleaning up ships, which burn some of the dirtiest fuels in the world while they are at berth, is a critical strategy to protect us from harmful air pollution. In addition, moving swiftly to adopt life-saving regulations to clean up transportation refrigeration units and commercial harbor craft is critical to providing cleaner air to all Californians. As we seek to clean up the air and clean up climate pollution, these three regulations are amongst the most critical - especially because they provide greater protections for the disproportionately harmed Californians living near our major freight ports and warehouses.

It has come to my attention that industry lobbyists are fighting hard to prevent your agency from adopting these life-saving and common-sense regulations. We ask that you have the courage to defend our lungs and public health by adopting these regulations, even in the face of these powerful interests. With your leadership, we can make California's skies cleaner and defeat harmful climate pollution.

Regards,  
TERRY CROWNOVER

-- Sent from **Douglas Daetz** to **California Air Resources Board** on Jun 15, 2020 --

Dear Chair Nichols and Members of the Board:

My name is Douglas Daetz, and I live in Sunnyvale. Clean air is healthier for all, but it is especially important to clean up the air for the people who live near the ports who often are lower-income people and people of color.

I write to request strengthening regulations to clean up harmful air pollution from the freight industry. For decades, this industry has harmed our lungs and our climate. Cleaning up ships, which burn some of the dirtiest fuels in the world while they are at berth, is a critical strategy to protect us from harmful air pollution. In addition, moving swiftly to adopt life-saving regulations to clean up transportation refrigeration units and commercial harbor craft is critical to providing cleaner air to all Californians. As we seek to clean up the air and clean up climate pollution, these three regulations are amongst the most critical - especially because they provide greater protections for the disproportionately harmed Californians living near our major freight ports and warehouses.

It has come to my attention that industry lobbyists are fighting hard to prevent your agency from adopting these life-saving and common-sense regulations. We ask that you have the courage to defend our lungs and public health by adopting these regulations, even in the face of these powerful interests. With your leadership, we can make California's skies cleaner and defeat harmful climate pollution.

Regards,  
Douglas Daetz  
1744 Karamenos Dr  
Sunnyvale, CA 94087

-- Sent from **Carmel Dagan** to **California Air Resources Board** on Jun 11, 2020 --

-- Sent from **Ramona Davis** to **California Air Resources Board** on Jun 11, 2020 --

Dear Chair Nichols and Members of the Board:

My name is Ramona Davis, and I live in Moraga.

I write to request strengthening regulations to clean up harmful air pollution from the freight industry. For decades, this industry has harmed our lungs and our climate. Cleaning up ships, which burn some of the dirtiest fuels in the world while they are at berth, is a critical strategy to protect us from harmful air pollution. In addition, moving swiftly to adopt life-saving regulations to clean up transportation refrigeration units and commercial harbor craft is critical to providing cleaner air to all Californians. As we seek to clean up the air and clean up climate pollution, these three regulations are amongst the most critical - especially because they provide greater protections for the disproportionately harmed Californians living near our major freight ports and warehouses.

It has come to my attention that industry lobbyists are fighting hard to prevent your agency from adopting these life-saving and common-sense regulations. We ask that you have the courage to defend our lungs and public health by adopting these regulations, even in the face of these powerful interests. With your leadership, we can make California's skies cleaner and defeat harmful climate pollution.

Regards,  
Ramona Davis

-- Sent from **Shellee Davis** to **California Air Resources Board** on Jun 12, 2020 --

Dear Chair Nichols and Members of the Board:

My name is Shellee Davis, and I live in Cotati. It is an outrage and a crime that right now toxic diesel pollution from oil, shipping and freight industries is allowed. This must stop because it poisons communities, creating cancer clusters and other debilitating diseases. Citizens should not have endure poisoning, illness and death to ensure profits for these polluting industries.

I write to request strengthening regulations to clean up harmful air pollution from the freight industry. For decades, this industry has harmed our lungs and our climate. Cleaning up ships, which burn some of the dirtiest fuels in the world while they are at berth, is a critical strategy to protect us from harmful air pollution. -- Sent from **Terri Decker** to **California Air Resources Board** on Jun 11, 2020 --

Dear Chair Nichols and Members of the Board:

My name is Terri Decker, and I live in Redding.

I write to request strengthening regulations to clean up harmful air pollution from the freight industry. For decades, this industry has harmed our lungs and our climate. Cleaning up ships, which burn some of the dirtiest fuels in the world while they are at berth, is a critical strategy to protect us from harmful air pollution. In addition, moving swiftly to adopt life-saving regulations to clean up transportation refrigeration units and commercial harbor craft is critical to providing cleaner air to all Californians. As we seek to clean up the air and clean up climate pollution, these three regulations are amongst the most critical - especially because they provide greater protections for the disproportionately harmed Californians living near our major freight ports and warehouses.

It has come to my attention that industry lobbyists are fighting hard to prevent your agency from adopting these life-saving and common-sense regulations. We ask that you have the courage to defend our lungs and public health by adopting these regulations, even in the face of these powerful interests. With your leadership, we can make California's skies cleaner and defeat harmful climate pollution.

Cleaning up ships, which burn some of the dirtiest fuels in the world while they are at berth, is a critical strategy to protect us from harmful air pollution. In addition, moving swiftly to adopt life-saving regulations to clean up transportation refrigeration units and commercial harbor craft is critical to providing cleaner air to all Californians. As we seek to clean up the air and clean up climate pollution, these three regulations are amongst the most critical - especially because they provide greater protections for the disproportionately harmed Californians living near our major freight ports and warehouses.

It has come to my attention that industry lobbyists are fighting hard to prevent your agency from adopting these life-saving and common-sense regulations. We ask that you have the courage to defend our lungs and public health by adopting these regulations, even in the face of these powerful interests. With your leadership, we can make California's skies cleaner and defeat harmful climate pollution.

-- Sent from **Jamie Dobbs** to **California Air Resources Board** on Jun 11, 2020 --

Dear Chair Nichols and Members of the Board:

My name is Jamie Dobbs, and I live in Oakland. As a resident of Oakland, and a worker in San Francisco, I see freight coming into our bay multiple times a day. I breathe this air, and I clean the soot off my window sills. We know there is cleaner, safer technology. Let's use it. Please. For the sake of my lungs, and the health of my community. I feel privileged to work indoors, but I know those working at these port have to breathe in the exhaust and dirty air daily.

I write to request strengthening regulations to clean up harmful air pollution from the freight industry. For decades, this industry has harmed our lungs and our climate. Cleaning up ships, which burn some of the dirtiest fuels in the world while they are at berth, is a critical strategy to protect us from harmful air pollution. In addition, moving swiftly to adopt life-saving regulations to clean up transportation refrigeration units and commercial harbor craft is critical to providing cleaner air to all Californians. As we seek to clean up the air and clean up climate pollution, these three regulations are amongst the most critical - especially because they provide greater protections for the disproportionately harmed Californians living near our major freight ports and warehouses.

It has come to my attention that industry lobbyists are fighting hard to prevent your agency from adopting these life-saving and common-sense regulations. We ask that you have the courage to defend our lungs and public health by adopting these regulations, even in the face of these powerful interests. With your leadership, we can make California's skies cleaner and defeat harmful climate pollution.

Regards,  
Jamie Dobbs

Cleaning up ships, which burn some of the dirtiest fuels in the world while they are at berth, is a critical strategy to protect us from harmful air pollution. In addition, moving swiftly to adopt life-saving regulations to clean up transportation refrigeration units and commercial harbor craft is critical to providing cleaner air to all Californians. As we seek to clean up the air and clean up climate pollution, these three regulations are amongst the most critical - especially because they provide greater protections for the disproportionately harmed Californians living near our major freight ports and warehouses.

It has come to my attention that industry lobbyists are fighting hard to prevent your agency from adopting these life-saving and common-sense regulations. We ask that you have the courage to defend our lungs and public health by adopting these regulations, even in the face of these powerful interests. With your leadership, we can make California's skies cleaner and defeat harmful climate pollution.

Regards,  
Steve Downing

Cleaning up ships, which burn some of the dirtiest fuels in the world while they are at berth, is a critical strategy to protect us from harmful air pollution. In addition, moving swiftly to adopt life-saving regulations to clean up transportation refrigeration units and commercial harbor craft is critical to providing cleaner air to all Californians. As we seek to clean up the air and clean up climate pollution, these three regulations are amongst the most critical - especially because they provide greater protections for the disproportionately harmed Californians living near our major freight ports and warehouses.

It has come to my attention that industry lobbyists are fighting hard to prevent your agency from adopting these life-saving and common-sense regulations. We ask that you have the courage to defend our lungs and public health by adopting these regulations, even in the face of these powerful interests. With your leadership, we can make California's skies cleaner and defeat harmful climate pollution.

I write to request strengthening regulations to clean up harmful air pollution from the freight industry. For decades, this industry has harmed our lungs and our climate. Cleaning up ships, which burn some of the dirtiest fuels in the world while they are at berth, is a critical strategy to protect us from harmful air pollution. In addition, moving swiftly to adopt life-saving regulations to clean up transportation refrigeration units and commercial harbor craft is critical to providing cleaner air to all Californians. As we seek to clean up the air and clean up climate pollution, these three regulations are amongst the most critical - especially because they provide greater protections for the disproportionately harmed Californians living near our major freight ports and warehouses.

It has come to my attention that industry lobbyists are fighting hard to prevent your agency from adopting these life-saving and common-sense regulations. We ask that you have the courage to defend our lungs and public health by adopting these regulations, even in the face of these powerful interests. With your leadership, we can make California's skies cleaner and defeat harmful climate pollution.

Regards,  
Joel Eisenberg

I write to request strengthening regulations to clean up harmful air pollution from the freight industry. For decades, this industry has harmed our lungs and our climate. Cleaning up ships, which burn some of the dirtiest fuels in the world while they are at berth, is a critical strategy to protect us from harmful air pollution. In addition, moving swiftly to adopt life-saving regulations to clean up transportation refrigeration units and commercial harbor craft is critical to providing cleaner air to all Californians. As we seek to clean up the air and clean up climate pollution, these three regulations are amongst the most critical - especially because they provide greater protections for the disproportionately harmed Californians living near our major freight ports and warehouses.

It has come to my attention that industry lobbyists are fighting hard to prevent your agency from adopting these life-saving and common-sense regulations. We ask that you have the courage to defend our lungs and public health by adopting these regulations, even in the face of these powerful interests. With your leadership, we can make California's skies cleaner and defeat harmful climate pollution.

Regards,  
C Emerson

-- Sent from **M. Epstein** to **California Air Resources Board** on Jun 11, 2020 --

Dear Chair Nichols and Members of the Board:

My name is M. Epstein, and I live in Los Angeles. I am a resident of CA. Being an asthmatic, I know too well the constant struggle for air and the abject terror of suffocation. I know the long term effects of air pollution first hand. My asthma appeared when I moved to Los Angeles as an adult. Human callousness and vane greed allows this continual source of environmental devastation, a devastation which, in the long run, exacts a cost far greater than its profits. Human intellect and creativity also provides for solutions- alternative energy supplies to continue business, continue profit, but in a way that eliminates existential harm to all - shippers, state residents, the environment upon which all survive.

I write to request strengthening regulations to clean up harmful air pollution from the freight industry. For decades, this industry has harmed our lungs and our climate. Cleaning up ships, which burn some of the dirtiest fuels in the world while they are at berth, is a critical strategy to protect us from harmful air pollution. Cleaning up ships, which burn some of the dirtiest fuels in the world while they are at berth, is a critical strategy to protect us from harmful air pollution. In addition, moving swiftly to adopt life-saving regulations to clean up transportation refrigeration units and commercial harbor craft is critical to providing cleaner air to all Californians. As we seek to clean up the air and clean up climate pollution, these three regulations are amongst the most critical - especially because they provide greater protections for the disproportionately harmed Californians living near our major freight ports and warehouses.

It has come to my attention that industry lobbyists are fighting hard to prevent your agency from adopting these life-saving and common-sense regulations. We ask that you have the courage to defend our lungs and public health by adopting these regulations, even in the face of these powerful interests. With your leadership, we can make California's skies cleaner and defeat harmful climate pollution.

Dear Chair Nichols and Members of the Board:

My name is MS Fassbinder, and I live in Shingletown. I BELIEVE I PERSONALLY PAY MORE ON FUEL RATES IN CALIFORNIA, AND AUTO INSURANCE RATES EPA STANDARDS POLLUTION TAXES, DUE TO TOXIC AIR QUALITY CREATED BY DIESEL FUEL USED MOSTLY 99% IN THE TRUCKING TRANSPORTATION BUSINESS, LEAVING US ON THE EARTH, AND IN CALIFORNIA TOXIC AIR TO BREATHE. HIGHER MEDICAL ISSUES, ESPECIALLY FOR CHILDREN, HIGHER LUNG DISEASE REQUIRING HIGHER MEDICAL COST TO ALL.

I write to request strengthening regulations to clean up harmful air pollution from the freight industry. For decades, this industry has harmed our lungs and our climate. Cleaning up ships, which burn some of the dirtiest fuels in the world while they are at berth, is a critical strategy to protect us from harmful air pollution.
