## List of Public Workshops, Meetings, Conference Calls, Video Conferences, and Site Visits Supporting the Public Process for Development of the Proposed Regulation

As of August 2022, staff have conducted more than 250 meetings with members of impacted communities, environmental justice advocates, air districts, industry stakeholders, and other interested parties. Meeting formats included public workshops, community meetings, informal meetings, phone calls, webcasts, and site visits with individual stakeholders.

These meetings were held at various locations, including at the California Environmental Protection Agency (Cal/EPA) headquarters building in Sacramento, California, site visits to facilities, conference calls, and video conferences. At these meetings, staff discussed draft concepts and solicited input from affected stakeholders. Table 1 provides a list of the public workshops, community meetings, informal meetings, conference calls, video conferences, and site visits conducted during the development process for the Proposed Regulation.
