

Appendix A-2

Final Regulation Order

Amendments to the Advanced Clean Fleets and Low Carbon Fuel Standard Regulations

[Note: This version of the Proposed Regulation Order complies with Government Code section 11346.2 subdivision (a)(3). The proposed amendments are shown in underline to indicate additions and strikethrough to indicate deletions from the existing regulatory text. For ease of readability, CARB has also provided a version of the proposed amendments that can toggle between amendments in strikeout/underline and a "clean" version with amendments incorporated into the regulatory text, which can be found in Appendix A-2.1]. Subsections with which no amendments were proposed in this rulemaking are indicated with [No change] or "****."

Chapter 1. Air Resources Board

Subchapter 10. Climate Change

Article 4. Regulations to Achieve Greenhouse Gas Emission Reductions

Subarticle 7. Low Carbon Fuel Standard

Section 95486.3. Generating and Calculating Credits for ZEV Fueling Infrastructure
Pathways for Light- and Medium-Duty Vehicles

Final Regulation Order

Title 17, California Code of Regulations

Amend Section 95486.3 of title 17, California Code of Regulations, to read as follows:

§ 95486.3. Generating and Calculating Credits for ZEV Fueling Infrastructure Pathways for Light- and Medium-Duty Vehicles.

(a) ****

(2) ****

- (F) The LMD-HRI refueling capacity for a LMD-HRI station is calculated using the following equation:

$$Cap_{HRI}^i = F_{LMD}^{station} \times RF_{HRI}^i$$

where:

Cap_{HRI}^i is the HRI refueling capacity (kg/day) for the LMD-HRI station; and

$F_{LMD}^{station}$ is the factor applied to the station based on LMD-HRI site type:

- For a public LMD-HRI station, ~~62.5~~100%
- For a private LMD-HRI station, ~~31.5~~50%

RF_{HRI}^i is the nameplate refueling capacity for the LMD-HRI station determined in subsection (E) above or 1,200 kg/day, whichever is less.

(G) ****
