The Board's ICAT program co-funds demonstrations of new technologies that can improve air quality in California and support ARB programs while helping to stimulate the state's economy. The ARB staff will recommend that the Board approve co-funding for four projects that were received in response to a public solicitation. These projects were selected because they address important ARB program needs, are technically sound, can reduce emissions, and can succeed commercially within a few years. The Board will consider proposed resolutions to approve co-funding for these projects at its meeting.

The ARB staff will provide an oral presentation at the meeting. The projects to be considered are the following:

"SunCache Solar Water Heating System Demonstration," submitted by the Davis Energy Group, for a total amount not to exceed \$235,000.

"High Accuracy Mobile Emissions Laboratory," submitted by Los Gatos Research, for a total not to exceed \$77,996.

"Field Demonstration of an Advanced Composite Particulate Filter," submitted by Geo2 Technologies, Inc., for an amount not to exceed \$185,000.

Interested members of the public may present comments orally or in writing at the meeting and in writing or by email before the meeting. To be considered by the Board,

written submissions not physically submitted at the meeting must be received no later than **12:00 noon, January 23, 2008**, and be addressed to the following.
