This item may be considered at a two-day meeting of the Board, which will commence at 9:00 a.m., March 25, 2010. This item is scheduled to be heard on the Board's Consent Calendar. All items on the consent calendar will be voted on by the Board immediately after the start of the public meeting. BACKGROUND

The federal Clean Air Act (the Act) establishes planning requirements for those areas that routinely exceed the health-based National Ambient Air Quality Standards. These nonattainment areas must develop and implement a State Implementation Plan (SIP) that demonstrates how they will attain the standards by specified dates.

The District adopted the first PM10 attainment plan for the South Coast in 1991. The plan focused on fugitive dust control strategies for attaining the national 24-hour PM10 standard. In various plan revisions, the District adopted increasingly stringent dust measures. The 2003 plan revision added control measures to reduce emissions of particulate matter precursors. The concerted adoption of District controls resulted in the South Coast attaining the PM10 standard by the 2006 attainment date.

On January 8, 2010, the District adopted the PM10 Redesignation Request and Maintenance Plan for the South Coast. The plan officially requests that the South Coast be redesignated to attainment for the federal PM10 standard and charts the course for continued maintenance of the standard.

Shortly before plan adoption, the District developed revised transportation conformity budgets (budgets) for the Maintenance Plan based on U.S. EPA comments that the budgets only include emission reductions from adopted control measures. Because transportation conformity budgets are subject to a 30-day public notice requirement, ARB staff has posted the revised budgets to provide for the required public review period. ARB staff proposes adoption of the updated budgets for the South Coast.

PROPOSED ACTION

ARB staff has reviewed the District's Maintenance Plan for the South Coast and has concluded that it meets applicable federal requirements. ARB staff has also determined that the Maintenance Plan would ensure continued maintenance of the standard for the required ten years following redesignation. Staff is recommending that the Board approve the Maintenance Plan, as well as the corresponding transportation conformity budgets, emissions inventory, and maintenance demonstration as a revision to the California SIP. In addition, ARB staff is recommending that the Board approve the District's request that the South Coast be redesignated from nonattainment to attainment for the national PM10 standard.

AVAILABILITY OF DOCUMENTS

ARB staff has prepared a written Staff Report. Copies of the Staff Report may be obtained from ARB's Public Information Office, 1001 "I" Street, First Floor, Environmental Services Center, Sacramento, California 95814, (916) 322-2990.
