Including Cap-and-Trade in California’s portfolio of 2030 climate programs is the most cost effective way of achieving the SB 32 target and helps maintain California's economic strength while improving quality of life.

Cap-and-trade is 4X less costly
TO CALIFORNIA HOUSEHOLDS THAN ALTERNATIVE REGULATIONS
That could have been imposed

The Scoping Plan will lead to
PUBLIC HEALTH BENEFITS IN 2030 WILL LEAD TO $2 billion IN AVOIDED HEALTH IMPACTS VALUE

Cap-and-Trade helps California meet its carbon pollution reduction goals

The Scoping Plan with Cap-and-Trade is
MORE LIKELY TO ACHIEVE California’s 2030 GHG target compared to command-and-control only alternatives

If California is not on track to meet the target, additional regulatory actions would be needed.
Projects are underway in 98% of the state’s disadvantaged communities

Since 2014 $6.1 Billion appropriated

affordable housing  public transportation  renewable energy  zero-emission vehicles
environmental restoration  recycling  sustainable agriculture  and much more
