Including Cap-and-Trade in California’s portfolio of 2030 climate programs is the most cost effective way of achieving the SB 32 target and helps maintain California's economic strength while improving quality of life.

Cap-and-trade is 4X less costly compared to command-and-control only alternatives.

The Scoping Plan will lead to $2 billion in avoided health impacts value in 2030.

Cap-and-Trade helps California meet its carbon pollution reduction goals.

The Scoping Plan with Cap-and-Trade is 35% more likely to achieve California’s 2030 GHG target compared to command-and-control only alternatives.

If California is not on track to meet the target, additional regulatory actions would be needed.
Cap and Trade generates revenue to invest in disadvantaged communities & clean technology

Projects are underway in 98% of the state’s disadvantaged communities

Since 2014 $6.1 Billion appropriated

- Affordable housing
