Carbon Dioxide (CO₂) Emissions and Co-Pollutant Health Impacts from California Petroleum Refineries and Cement Plants

Emissions of CO₂ equivalents were estimated based on the CARB Greenhouse Gas emissions inventory for 2004.

Health Risks were estimated based on 2005 data for Nitrogen Oxide (NOx) and Particulate Matter (PM), from CARB.

For more information on methods, see: NRDC, Boosting the Benefits: Improving Air Quality and Health by Reducing Global Warming Pollution in California.

Natural Resources Defense Council, June 2008
