Meeting Topic Details
AB 32, the Global Warming Solutions Act of 2006, requires the California Air Resources
Board (ARB) to prepare a Scoping Plan for achieving the maximum technologically
feasible and cost-effective reductions in greenhouse gas emissions by 2020.
Development of the Scoping Plan will include an analysis of a variety of potential
emission reductions mechanism across all sectors. AB 32 also requires consideration
of environmental, air quality, public health, localized, and cumulative benefits and
impacts when preparing the Scoping Plan. The specific focus of this meeting will be
to discuss the framework for analysis of emissions, air quality, public health,
localized, and cumulative benefits and impacts related to AB 32 implementation.
The meeting will focus on the specific requirements of AB 32, and not the requirements
of the California Environmental Quality Act.
