

Local Air Pollution Control District Locator

This list will help you locate the air pollution control district that can tell you what the specific regulatory requirements are for your diesel-fueled ag. engine. Using the zip code of the engine location, look up the zip code in the Zip Code column, then look across to the District column for the district name. Note that some zip codes are served by more than one district; please have more detailed engine location information (address or nearest cross streets, etc.) when contacting the listed districts to determine the correct one. Contact information for all districts is provided on the reverse side of this page.
