TO: ALL INTERESTED PARTIES

TOPIC: SECOND PUBLIC WORKSHOP TO DISCUSS PROPOSED
AMENDMENTS TO THE STATIONARY COMPRESSION IGNITION
ENGINE AIR TOXIC CONTROL MEASURE

Staff of the Air Resources Board (ARB or Board) invites you to participate in the second public workshop to discuss potential amendments to the Stationary Compression Ignition Engine Air Toxic Control Measure (ATCM). ARB staff has investigated the feasibility and costs associated with the existing provisions in the ATCM that requires new emergency standby engines to meet the Tier 4 emission standards as specified in the Off-Road Compression Ignition Engine Standards (title 13, California Code of Regulation (CCR), section 2423).

The purpose of this workshop is to discuss proposed amendments to the ATCM that will be considered by the Board later this year. ARB staff will describe the amendments and present their cost analysis data and updated emission inventory data including the impact of the current recession on emissions estimates. A draft agenda is attached to this notice.

The meeting will be held at the following time and location:

Date: June 21, 2010
Time: 1:30 p.m. - 3:00 p.m.
Location: Byron Sher Auditorium
Address: Cal/EPA Headquarters Building
1001 I Street
Sacramento, California 95814

Directions to Cal/EPA headquarters and public transit can be found at the California Environmental Protection Agency's website at
<http://www.calepa.ca.gov/epabldg/location.htm>.

The energy challenge facing California is real. Every Californian needs to take immediate action to reduce energy consumption. For a list of simple ways you can reduce demand and cut your energy costs, see our website: <http://www.arb.ca.gov>.

California Environmental Protection Agency

Webcast and Handout Information

This meeting will be webcast for those unable to attend in person. The broadcast can be accessed on the day of the workshop at <http://www.calepa.ca.gov/broadcast/>. Information on submitting questions or comments will be provided during the webcast for remote participants. Staff's presentation and any handouts will be posted at <http://www.arb.ca.gov/diesel/statport.htm>.

Background

In 2004, ARB adopted the Stationary Compression Ignition Engine Air Toxic Control Measure (title 17, CCR section 93115). The ATCM established emission controls on stationary diesel-fueled compression ignition (CI) engines that were greater than 50 brake horsepower. For new emergency standby engines, the ATCM requires these engines to meet a 0.15 grams per brake horsepower-hour particulate matter (PM) emission limit or the Off-Road Compression Ignition Engine Standard (title 13, CCR, section 2423), whichever is more stringent. In California, the Off-Road Standards will become more stringent than the ATCM requirements beginning with Tier 4 engines. The Tier 4 emissions limits will most likely require engine manufacturers to install a diesel particulate filter (DPF) and a selective catalytic reduction (SCR) system on their engines to meet the PM and oxides of nitrogen (NOx) standards.

Effective July 11, 2006, the United States Environmental Protection Agency promulgated Standards of Performance for Stationary Compression-Ignition Internal Combustion Engines (NSPS). However, the NSPS final rule does not require manufacturers of stationary emergency standby diesel-fueled CI engines to meet the Tier 4 emission standards if add-on controls must be installed. Representatives from the Engine Manufacturers Association have requested that ARB staff consider harmonizing the requirements for new emergency standby engines in the ATCM with those in the NSPS. In response, ARB staff agreed to investigate the need for amendments to the ATCM to address concerns raised regarding feasibility and costs of aftertreatment controls on new emergency standby engines.

At the first workshop on March 1, 2010, ARB staff shared their preliminary findings and initial concepts for amendments. At this workshop, ARB staff will share proposed amendments to the regulation in strike-out underline format and present an updated cost analysis and emission inventory that reflects the impacts of the current recession.

Special Accommodations and Language Assistance

If you require special accommodations or language needs, please contact Ms. Linda Keifer at (916) 327-1505 or lkeifer@arb.ca.gov as soon as possible but no later than ten business days before the scheduled meeting. TTY/TDD/Speech to Speech users may dial 711 for the California Relay Service.

If you have questions regarding the workshop, please contact either Ms. Peggy Taricco, Manager at (916) 323-4882 or ptaricco@arb.ca.gov or Mr. Ryan Huft, Air Resources Engineer at (916) 327-5784 or rhuft@arb.ca.gov. We welcome and appreciate your participation in this workshop.

Sincerely,

/s/

Daniel E. Donohoue, Chief
Emissions Assessment Branch

Public Workshop to Discuss Potential Stationary Compression Ignition Engine ATCM Amendments

**Monday, June 21, 2010
Time: 1:30PM to 3:00PM
Room: Byron Sher Auditorium**

**Cal/EPA Headquarters Building
1001 I Street
Sacramento, California 95814**

To participate by Webcast, go to www.calepa.ca.gov/broadcast/

Final Agenda

- I. Introduction
- II. Background
- III. Proposed Amendments to the Stationary Engine Air Toxic Control Measure
- IV. Open Discussion and Next Steps
