

**State of California  
AIR RESOURCES BOARD**

**EXECUTIVE ORDER DE-09-004-06**

Pursuant to the authority vested in the Air Resources Board (ARB) by Health and Safety Code, Division 26, Part 5, Chapter 2; and pursuant to the authority vested in the undersigned by Health and Safety Code Sections 39515 and 39516 and Executive Order G-02-003;

Relating to Exemptions under Section 27156 of the Vehicle Code, and Verification under Sections 2700 through 2711 of Title 13 of the California Code of Regulations (CCR)

Johnson Matthey, Incorporated  
Advanced Catalyzed Continuously Regenerating Technology (A<sub>dv</sub>CCRT™) System

ARB has reviewed Johnson Matthey, Incorporated's request for verification of the A<sub>dv</sub>CCRT™ system. Based on an evaluation of the data provided, and pursuant to the terms and conditions specified below, the Executive Officer of ARB hereby finds that the A<sub>dv</sub>CCRT™ system reduces emissions of diesel particulate matter (PM) consistent with a Level 3 Plus device (greater than or equal to an 85 percent reduction and meets the 2009 nitrogen dioxide emissions limit) (Title 13, CCR, Sections 2702 and 2708). Accordingly, the Executive Officer determines that the system merits verification and, subject to the terms and conditions specified below, classifies the A<sub>dv</sub>CCRT™ as a Level 3 Plus system for heavy-duty on-road vehicles. Engines for which the A<sub>dv</sub>CCRT™ system is verified, the verified parts list, the verified labels, swapping and re-designation information, and other product information can be found here:

<http://www.arb.ca.gov/diesel/verdev/companies/jm/advccrt.htm>.

The aforementioned verification is subject to the following terms and conditions:

- The engine must meet all the terms and specifications of this Executive Order and belong to the engine family listed in

<http://www.arb.ca.gov/diesel/verdev/companies/jm/advccrt.htm>.

- The engine must be model year 2002 through 2006 and have an engine family name listed in <http://www.arb.ca.gov/diesel/verdev/companies/jm/advccrt.htm>. Some engines within an approved engine family may not meet the horsepower requirements. Such engines are not included in this Executive Order.
- Only one system may be installed per engine, and it must be installed in the verified configuration.
- Each A<sub>dv</sub>CCRT™ system can only be used to treat the exhaust of one engine.
- The engine must be certified for on-road applications.

- The engine must be certified to a PM emission level of at most 0.1 grams per brake horsepower-hour (g/bhp-hr) and greater than 0.01 g/bhp-hr.
- The engine must be certified to either an oxides of nitrogen (NO<sub>x</sub>) or NO<sub>x</sub> plus non-methane hydrocarbons emission level of at most 2.8 g/bhp-hr and at least 2.0 g/bhp-hr.
- The application must have a duty cycle with an average temperature profile:
  - Greater than 230 degrees Celsius for 40 percent of the operating cycle, or
  - Greater than 300 degrees Celsius for 10 percent of the operating cycle.
- The engine must be used by an on-road motor vehicle with a manufacturer's Gross Vehicle Weight Rating of over 14,000 pounds.
- The engine must be rated to no more than 500 horsepower and at least 150 horsepower.
- The engine must have a displacement of no more than 15 liters and at least 5.9 liters.
- The engine may or may not have exhaust gas recirculation.
- The engine must not have a pre-existing original equipment manufacturer (OEM) diesel particulate filter (DPF).
- The engine may or may not have a pre-existing OEM oxidation catalyst.
- The engine must remain in its original certified configuration, except that if an OEM oxidation catalyst is present, it may be removed if the A<sub>dv</sub>CCRT™ system is installed. Should the A<sub>dv</sub>CCRT™ system be removed, the OEM oxidation catalyst must be re-installed, returning the engine to its original certified configuration.
- The engine must have a four-stroke combustion cycle.
- The engine must be turbocharged.
- The engine must be electronically controlled.
- The engine must be operated on fuel that has a sulfur content of no more than 15 parts per million by weight.
- The engine must be well maintained and not consume lubricating oil at a rate greater than that specified by the engine manufacturer.
- Lube oil, or other oil, must not be mixed with the fuel.
- The product must not be operated with a fuel additive, as defined in Title 13, CCR, Section 2701, unless explicitly verified for use with the fuel additive.

- The product must not be used with any other systems or engine modifications without ARB and manufacturer approval.
- Swapping of the filter or re-designation of the system is permitted.
- The other terms and conditions are specified below.

IT IS ALSO ORDERED AND RESOLVED: That installation of the A<sub>dv</sub>CCRT™ system, manufactured by Johnson Matthey, Incorporated, of 456 Devon Park Drive, Wayne, Pennsylvania 19087, has been found not to reduce the effectiveness of the applicable vehicle pollution control system, and therefore the A<sub>dv</sub>CCRT™ system is exempt from the prohibitions in Section 27156 of the Vehicle Code for installation on heavy-duty on-road vehicles using engines listed in

<http://www.arb.ca.gov/diesel/verdev/companies/jm/advccrt.htm>.

This exemption is only valid provided the engines meet the aforementioned conditions.

The A<sub>dv</sub>CCRT™ system must be installed as designed and consists of the following major components listed in order from exhaust inlet to outlet as they are arranged within the exhaust system of the vehicle: one inlet head, one backpressure sensor, one thermocouple, one diesel oxidation catalyst, one catalyzed cordierite wall-flow diesel particulate filter, one mixing module and dosing nozzle, one thermocouple, one decomposition catalyst module, one outlet head, and one thermocouple. The system also includes a fuel injection system and a backpressure monitor. The backpressure monitor must include a display in the cabin that notifies the operator when the backpressure limit has been reached. The notification must occur and be clearly visible to the operator while the vehicle or equipment is in use. The major components of A<sub>dv</sub>CCRT™ system and schematics of the approved product and engine labels are identified and shown, respectively, at

<http://www.arb.ca.gov/diesel/verdev/companies/jm/advccrt.htm>.

The A<sub>dv</sub>CCRT™ includes one wall-flow DPF designed to filter the exhaust from a single engine. A<sub>dv</sub>CCRT™ systems with multiple DPFs, including designs with two or more filter components canned together or multiple individually-canned filter components in parallel or in series (or any combination thereof), are not valid under this Executive Order. Channeling exhaust from a single engine through multiple A<sub>dv</sub>CCRT™ systems, deployed in parallel or in series or any combination thereof, is also not valid under this Executive Order.

This Executive Order is valid provided that installation instructions for the A<sub>dv</sub>CCRT™ system do not recommend tuning the vehicle to specifications different from those of the vehicle manufacturer.

Changes made to the design or operating conditions of the A<sub>dv</sub>CCRT™ system, as exempted by ARB, which adversely affect the performance of the vehicle's pollution control system shall invalidate this Executive Order.

No changes are permitted to the device. ARB must be notified, in writing, of any changes to any part of the A<sub>dv</sub>CCRT™ system. Any changes to the device must be

evaluated and approved in writing by ARB. Failure to do so shall invalidate this Executive Order.

Johnson Matthey, Incorporated, must ensure that the installation of the AdvCCRT™ system conforms to all applicable industrial safety requirements.

Marketing of the AdvCCRT™ system using identification other than that shown in this Executive Order or for an application other than that listed in this Executive Order is prohibited, unless prior written approval is obtained from ARB.

Identification must include both device and engine labels consistent with the requirements of Title 13, CCR, Section 2706, and Attachment 3 of this Executive Order. Changes or modifications to the label or label placement are prohibited without prior written approval from ARB.

This Executive Order does not apply to any AdvCCRT™ system advertised, offered for sale, offered for lease, sold with, leased with, or installed on a motor vehicle prior to or concurrent with transfer to an ultimate purchaser.

As specified in the Diesel Emission Control Strategy (DECS) Verification Procedure (Title 13, CCR, Section 2706 (j)), ARB assigns each DECS a family name. The designated family name for the verification as outlined above is:

#### **CA/JMI/2009/PM3+/N00/ON/DPF01**

Johnson Matthey, Incorporated, their distributors, or installers shall review actual operating conditions prior to retrofitting an engine with the AdvCCRT™ system to ensure compliance with the terms and conditions of this Executive Order.

As stated in the Procedure, Johnson Matthey, Incorporated, is responsible for complying with recordkeeping requirements (Section 2702) honoring the required warranty (Section 2707), and conducting in-use compliance testing (Section 2709).

This Executive Order is valid provided that the diesel fuel used in conjunction with the device complies with Title 13, CCR, Sections 2281 and 2282, and if biodiesel is used, the biodiesel blend shall be 5 percent or less subject to the following conditions:

- The biodiesel portion of the blend complies with the American Society for Testing and Materials specification D6751 applicable for 15 parts per million sulfur content; and
- The diesel fuel portion of the blend complies with Title 13, CCR, Sections 2281 and 2282.

Other alternative diesel fuels such as, but not limited to, ethanol diesel blends and water emulsified diesel fuel are excluded from this Executive Order.

Proper engine maintenance is critical for the proper functioning of DECS. The owner and/or operator of the vehicle on which DECS is installed, is strongly advised to adhere to all good engine maintenance practices. Failure to document proper engine

maintenance, including keeping records of the engine's oil consumption, may be grounds for denial of a warranty claim.

Use of system parts or replacement parts not authorized by Johnson Matthey, Incorporated, may be grounds for denial of a warranty claim.

The AdvCCRT™ system must not be located over any occupied space (e.g., driver or passenger compartments), or installed in a way which would result in noncompliance with any applicable safety standards including but not limited to Federal Motor Carrier Safety Administration, Subpart G, Miscellaneous Parts and Accessories, Section 393.83 Exhaust Systems, and any other location deemed unacceptable by Johnson Matthey, Incorporated.

The terms and conditions of this verification must be satisfied regardless of where the system is sold in order for the system to be considered verified.

Systems sold as verified, or which carry an ARB-approved label, must satisfy all the terms and conditions of this verification.

A copy of this Executive Order must be provided to the ultimate purchaser at the time of sale.

In addition to the foregoing, ARB reserves the right in the future to review this Executive Order and the exemption and verification provided herein to assure that the exempted and verified add-on or modified part continues to meet the standards and procedures of Title 13 CCR, Section 2222, et seq, and Title 13 CCR, Sections 2700 through 2711.

Systems verified under this Executive Order shall conform to all applicable California emissions regulations.

This Executive Order does not release Johnson Matthey, Incorporated, from complying with all other applicable regulations.

Violation of any of the above conditions shall be grounds for revocation of this Executive Order.

This Executive Order supersedes Executive Order DE-09-004-05, dated December 9, 2011; Executive Order DE-09-004-04, dated June 28, 2011; Executive Order DE-09-004-03, dated October 6, 2010; Executive Order DE-09-004-02, dated May 13, 2010; Executive Order DE-09-004-01, dated October 23, 2009; and Executive Order DE-09-004, dated April 9, 2009, for this DECS.

Executed at El Monte, California, and effective this 31<sup>st</sup> day of October, 2012.

Robert H. Cross, M.S.M.E, P.E.  
Chief, Mobile Source Control Division
