Component Swapping: Component swapping means the movement of a designated component of a diesel emission control strategy (DECS) between different vehicles or equipment which utilizes the same DECS.

IMPCO Technologies Canada Incorporated (IMPCO) does not permit component swapping for any part of the CLEARSKY Diesel Particulate Filter (CLEARSKY DPF) system.

Re-designation: Re-designation means the movement of a used verified DECS from an appropriate engine/application and installation onto another engine/application meeting the terms and conditions of the DECS Executive Order within the same common ownership fleet as defined in the Verification Procedure, Warranty, and In-Use Compliance Requirements for In-Use Strategies to Control Emissions from Diesel Engines in Section 2701, Title 13, California Code of Regulations.

IMPCO does not permit re-designation of the CLEARSKY DPF system.
