

August 8, 2019

Mr. Peter Guzman
Manager, Customer Service
Rypos Incorporated
40 Kenwood Circle
Franklin, Massachusetts 02038

Dear Mr. Guzman:

As requested in your June 21, 2019 email to me, I have updated the Rypos HDPF/C™ stationary verification and the Rypos ActiveDPF/C3+™ rubber tired gantry crane verification engine family lists. The recently signed Executive Orders for the Rypos HDPF/C™ and Rypos ActiveDPF/C3+™ verifications associated with the recent engine family updates are enclosed.

As a reminder, Rypos has sold 281 HDPF/C™ units according to the 2018 warranty report. Within 90 days of selling the 300th unit in California, an in-use compliance emissions testing plan must be submitted to California Air Resources Board staff. Rypos has sold approximately 75 ActiveDPF/C3+™ units, but with very low sales volume over the last few years in California. Within 90 days of selling the 100th unit in California, an in-use compliance field testing plan must be submitted to California Air Resources Board staff.

Should you have any questions or comments, please contact me at (916) 327-5975 or via email at john.lee@arb.ca.gov.

Sincerely,

John Lee
Air Resources Engineer
