Abrasive Blasting Program - Applications

The California Air Resources Board Compliance Division is accepting applications for certification of abrasives for permissible outdoor blasting. Although applications for certification of new abrasives are accepted at any time, submittal during the current renewal period for existing certifications may result in a lower certification fee. In order to ensure that your product will be tested with the products submitted for certification renewal, we will need to receive your abrasives by April 15, 1997.

The purpose of the abrasive certification program is to restrict the abrasive selected for permissible dry outdoor blasting operations in order to reduce the generation of fine particles, which are inhalable and contribute to reduced visibility. In order to be certified, the abrasive must contain not more than one percent, by weight, materials passing a #70 U.S. Standard sieve before blasting. After blasting the abrasive must contain not more than 1.8 percent, by weight, material 5 microns or smaller. The producer or manufacturer of an abrasive which fails the sieve test may choose to demonstrate that the abrasive meets a 20 percent opacity emission limit when blasted. The after-blast criteria must be met in either case. A copy of the regulations and a flowchart of the certification process are enclosed.

Each grade of the abrasive you wish to have certified for permissible outdoor blasting must be submitted separately. Also, if you produce an abrasive at more than one site a sample from each site must be submitted separately. Please complete and return the enclosed application form for all abrasives you wish to submit for recertification this year. Be sure you read the instructions carefully before you fill out the application and ship your product. Products submitted incorrectly will not be tested.

If you wish to have your distributors listed with your certification, you will need to provide a written request that each distributor be listed. The distributors will also need to request in writing that they be listed as distributors for your product.

An invoice for the cost of the test will be sent to you at the completion of the certification testing. Your results will be sent to you upon payment of the invoice. Non-payment of the invoice will result in decertification.

If you have any questions, please call Ms. Kathryn Gugeler at (916) 327-1521. All correspondence should be addressed to me at the post office box below.

Application for Certification of Abrasives
for Permissible Dry Outdoor Blasting

A. This application must be filled out completely. Please note that the Plant Location must be sufficient to find the facility. A street address is ideal. The Product Composition Declaration is only needed if you sell one product under several names.

B. Send completed application and a Material Safety Data Sheet (MSDS) for each sample to:

Kathryn M. Gugeler
California Air Resources Board
Compliance Division
P.O. Box 2815
Sacramento, California 95812 USA

If you have any questions, please call Kathryn Gugeler at (916) 327-1521

C. Shipping Instructions:

Ship a minimum 200 lb. sample of each grade of abrasive in five (5) gallon plastic shipping buckets with lids and handles. The contents of each shipping bucket must not weigh more than 40 lbs. Each plastic shipping bucket must be labeled on the outside with the following:

1. Company Name and address
2. Abrasive name
3. Plant location.

The above information must also be inserted with the sample inside of each bucket.

Important: SHIP ONLY IN 5 GALLON PLASTIC SHIPPING BUCKETS WITH LIDS AND HANDLES. NO OTHER TYPES OF CONTAINERS WILL BE ACCEPTED.

Important: MATERIAL MUST BE SHIPPED POSTAGE-PAID COD SHIPMENTS WILL NOT BE ACCEPTED.

Important: DAMAGED OR BROKEN CONTAINERS WILL NOT BE TESTED

Ship containers to:

Department of Transportation
Attention: Kathryn Gugeler/CARB
5900 Folsom Blvd.
Sacramento, California 95819 USA

D. At the completion of the abrasive certification testing, you will be billed for the cost of your testing. You will be sent your results upon payment of your invoice.

CALIFORNIA CODE OF REGULATIONS

TITLE 17

AIR RESOURCES BOARD

ABRASIVE BLASTING REGULATIONS

June 1, 1991
SUBCHAPTER 6. ABRASIVE BLASTING

92000. Definitions.

For the purposes of this subchapter:

(a) "Abrasive" means any material used in abrasive blasting operations including but not limited to sand, slag, steel shot, garnet, or walnut shells.

(b) "Abrasive blasting" means the operation of cleaning or preparing a surface by forcibly propelling a stream of abrasive material against the surface.

(c) "Abrasive blasting equipment" means any equipment utilized in abrasive blasting operations.

(d) "Air contaminant" includes smoke, charred paper, dust, soot, grime, carbon, fumes, gases, odors, particulate matter, acids, or any combination thereof.

(e) "Certified abrasive" means an abrasive which has been certified by the Air Resources Board (ARB) in accordance with Section 92530.

(f) "Cut-point for fineness" means the smallest United States standard sieve size through which no more than one percent by weight of abrasive material will pass before blasting when tested in accordance with California Test Method No. 202-S, dated July 1, 1982.

(g) "Hydroblasting" means any abrasive blasting using high pressure liquid as the propelling force.

(h) "Multiple nozzles" means more than one nozzle being used to abrasive blast the same surface in such close proximity that their separate plumes are indistinguishable.

(i) "Permanent building" means a building which is used, in whole or in part, for sandblasting operations.

(j) "Person" means any individual, firm, association, organization, partnership, business trust, corporation, company, contractor, supplier, installer, user or owner, or any State or local governmental agency or public district or any officer or employee thereof. "Person" also means the United States Government or its agencies to the extent authorized by federal law.

(k) "Sandblasting" means abrasive blasting.

(l) "Source" means the impact surface from any single abrasive blasting nozzle.

(m) "Steel or iron shot/grit" means abrasives which meet either the Society of Automotive Engineers (SAE) recommended practices J827 and J444 or Steel Founders' Society of America Standards 21-68 or 20T-66, as those practices and standards existed on 2-24-84.

(n) "Sweep abrasive blasting" means a method of cleanup performed in order to achieve surface uniformity or impurity removal after wet blasting, hydroblasting, or vacuum blasting operations.

(o) "Vacuum blasting" means any abrasive blasting in which the spent abrasive, surface material, and dust are immediately collected by a vacuum device.

(p) "Wet abrasive blasting" means any abrasive blasting using compressed air as the propelling force, which in the judgment of the air pollution control officer uses an amount of water adequate to minimize the plume to comply with the requirements of Section 92200.

92100. Scope and Policy.

These standards in this subchapter are not intended to prohibit air pollution control districts from enforcing their permit regulations as they apply to abrasive blasting equipment.

Article 2. Prohibitions

(a) No person shall discharge into the atmosphere from any abrasive blasting which is conducted outside a permanent building any air contaminant for a period or periods aggregating more than three minutes in any one hour which is:

(1) As dark or darker in shade as that designated as No. 2 on the Ringelmann Chart, as published by the United States Bureau of Mines, or

(2) Of such opacity as to obscure an observer's view to a degree equal to or greater than does smoke described in subdivision (a)(1).
(3) The surface being blasted is situated at its permanent location or no further away from its permanent location than is necessary to allow the surface to be blasted.

(c) Except for testing conducted in accordance with Section 92530 (b)(1)(B) and as otherwise provided in Sections 92510 or 92520, any abrasive blasting operation conducted in accordance with subsections (b)(2) and (b)(3) outside a permanent building must use exclusively:

1) Wet abrasive blasting;

2) Hydroblasting;

3) Vacuum blasting; or

4) Abrasives certified for permissible dry outdoor blasting.

92510. Pavement Marking.

Surface preparation for raised traffic delineating markers and pavement (marking removal) using abrasive blasting shall comply with at least one of the following performance standards:

(a) Wet abrasive blasting, hydroblasting, or vacuum blasting shall be used;

(b) Dry abrasive blasting for removal or surface preparation for immediate application of pavement markings of less than 1,000 square feet or for surface preparation for raised traffic delineating markers shall use certified abrasives.

92520. Stucco and Concrete.

Abrasive blasting of stucco and concrete shall be performed by wet blasting, hydroblasting, or vacuum blasting with the following exceptions:

Dry blasting with a certified abrasive may be used for

(a) Window and door returns and frames;

(b) Aves, overhangs, and ceilings;

(c) Sweep abrasive blasting except for stucco surfaces;

(d) Completely shrouded structures blast areas that effectively control emissions;

(e) Abrasive cleaning operations, other than aggregate exposure or paint removal related to new concrete construction or repair activity, if such operations are performed onsite.

92530. Certified Abrasives.

(a) The ARB shall certify abrasives which comply with the performance standards set forth in subdivision (b) below. Any person who desires certification of an abrasive shall furnish to the ARB an adequate test sample, together with fees to defray the cost of testing. Each certification of an abrasive shall include the ARB’s determination of the original cut-point for fineness of the abrasive. The ARB shall maintain an up-to-date list of certified abrasives. Certification shall not be effective for more than two years. Abrasive materials which are certified on the effective date of this section shall remain certified until September 1, 1992.

(b) Performance Standards.

(1) (A) Before blasting the abrasive shall not contain more than one percent by weight material passing 1 170 U.S. Standard sieve when tested in accordance with “Method of Test for Abrasive Media Evaluation,” Test Method No. California 371-A, dated May 15, 1975.

(B) If the abrasive does not meet the requirements of subdivision (b)(1)(A), the person who desires certification of the abrasive may as an alternative demonstrate within the State of California to the satisfaction of the ARB that the abrasive meets a 20 percent opacity emission limit when tested in accordance with the “Visible Emission Evaluation Test Method for Selected Abrasives Used in Permissible Dry Outdoor Blasting,” as adopted by the ARB on November 8, 1990 and incorporated herein by reference. The person who desires certification of the abrasive shall be solely responsible for conducting the demonstration.

(2) After blasting, the abrasive shall not contain more than 1.8 percent by weight material 6 microns or smaller when tested in accordance with “Method of Test for Abrasive Media Evaluation,” Test Method No. California 371-A, dated May 15, 1975.
(c) A used certified abrasive shall not be considered certified for reuse unless the abrasive conforms to its original grit-point for fineness.

(d) A blend of certified abrasives shall be considered certified for purposes of Section 92630(a), unless found not to meet the requirements of Section 92630(b) pursuant to testing initiated by the ARB.

(e) All manufacturers and suppliers of certified abrasives shall legibly and permanently label the invoice, bill of lading and abrasive packaging or container with each of the following:

(1) The manufacturer's name or identification trade name;

(2) The grade, weight proportion of components in abrasive blends, brand name of the abrasive or brand names and grades of components of abrasive blends; and

(3) The statement "ARB certified for permissible dry outdoor blasting." This subsection shall become effective six months after November 8, 1990.
