(1) **SB 1402 Statement**

Senate Bill 1402 (Dutton, chapter 413, statutes of 2010) requires ARB to provide information on the basis for the penalties it seeks (see H&SC section 39619.7). This information, which is provided throughout this settlement agreement, is summarized here.

The manner in which the penalty amount was determined, including a per unit or per vehicle penalty.

Penalties must be set at levels sufficient to discourage violations. The penalties in this matter were determined in consideration of all relevant circumstances, including the eight factors specified in H&SC section 43024 (H&SC § 43024). The per vehicle penalty in this case is a maximum of \$5000.00 per unit per strict liability violation. The penalty obtained in this case is approximately \$1,000.00 per vehicle for twenty vehicles, for a total of \$20,000.00. The penalty was significantly reduced because this is an innocent, first violation, ZAP fully cooperated with the investigation and is experiencing financial hardships.

The provision of law the penalty is being assessed under and why that provision is most appropriate for that violation.

The penalty provision being applied in this case is § 43154 because ZAP brought into commerce uncertified electric vehicles into California, in violation of H&SC §§ 43151-43153 and Vehicle Code section 24007 described above.

Is the penalty being assessed under a provision of law that prohibits the emission of pollution at a specified level, and, if so a quantification of excess emissions, if it is practicable to do so.

The provisions cited above do not prohibit emissions above a specified level.

- (2) ZAP acknowledges that ARB has complied with SB 1402 in prosecuting and settling this case. Specifically, ARB has considered all relevant facts, including those listed at H&SC § 43024, has explained the manner in which the penalty amount was calculated, has identified the provision of law under which the penalty is being assessed, and has considered and determined that this penalty is not being assessed under a provision of law that prohibits the emission of pollutants at a specified level.
- (3) Penalties were determined based on the unique circumstances of this matter, considered together with the need to remove any economic benefit from noncompliance, the goal of deterring future violations and obtaining swift compliance, the consideration of past penalties in similar cases, and the potential costs and risk associated with litigating these particular violations. Penalties in future cases might be smaller or larger on a per unit basis.

- (4) The penalty was also based on confidential business information provided by ZAP that is not retained by ARB in the ordinary course of business. The penalty was also based on confidential settlement communications between ARB and ZAP that ARB does not retain in the ordinary course of business either. The penalty is the product of an arms length negotiation between ARB and ZAP and reflects ARB's assessment of the relative strength of its case against ZAP, the desire to avoid the uncertainty, burden, and expense of litigation, to obtain swift compliance with the law, and to remove any unfair advantage that ZAP may have secured from its actions.
- (5) ZAP represents that it understands the legal requirements applicable to introducing non-California certified vehicles into California.
