**Re: Public Comment Letter Response  
Berry Petroleum Company, LLC  
Innovative Crude Oil Application**

LCFS Program:

This letter is written in response to the public comment letter received on December 12, 2023, during the open public comment period for Berry Petroleum Company's ("Berry's") Innovative Crude Oil Application under LCFS. It is Berry's belief that no revision to the submitted Innovative Crude Oil Application is warranted in response to the public comment letter received.

Pursuant to LCFS Regulation, Section 95489(c)(3)(B), Application Approval Process, "Only comments related to potential factual or methodological errors may be considered." Furthermore, Berry's project type (e.g., solar electricity generation) is eligible as specified in Section 95489(c)(1)(A)3, and the comment letter provided is not relevant to Berry's project and does not include project-specific "potential factual or methodological errors".

Please contact me at (661) 204-9236 or by email if any additional information is needed.

Sincerely,

A handwritten signature in blue ink that reads "Raymond Rodriguez". The signature is fluid and cursive, with a long, sweeping tail on the "y".

Raymond Rodriguez
