Re: RNG MOOVERS, LLC Tier 2 Pathway Application No. B0577; Response to David Perry, David Offen-Brown, and Dave Rhody

RNG MOOVERS LLC (“RNG Moovers”), a subsidiary of Archaea Energy Inc., writes to address comments received from individuals David Perry, David Offen-Brown, and Dave Rhody (collectively “the Individual Commenters”) regarding the Tier 2 Pathway Application (No. B0577) for the RNG MOOVERS COSTA VIEW facility.

RNG MOOVERS COSTA VIEW is an eligible project under the California Low Carbon Fuel Standard (“LCFS”) Biomethane from Anaerobic Digestion of Dairy and Swine Manure pathway. Additionally, §95488.7(d)(5)(A) of the LCFS regulation states “Only comments related to potential factual or methodological errors will require responses from the fuel pathway applicant.” Each commenter appears to be expressing an opinion directed to CARB in regard to the broader LCFS regulation and not the Tier 2 Pathway Application. The comments received from the Individual Commenters do not contain potential factual or methodological errors and, pursuant to §95488.7(d)(5)(A) and do not require response. Given no changes are suggested that would require revisions to the Tier 2 Pathway Application, RNG Moovers respectfully requests CARB proceed with certification.

Sincerely,

DocuSigned by:
