

Low Carbon Fuel Standard Alternative Fuels Portal (AFP) User Guide

AFP Version v 3.4010

Document Released:

March 2021

CARB's Low Carbon Fuel Standard regulation, which appears at sections 95480 to 95503 of title 17, California Code of Regulations, is designed to reduce greenhouse gas emissions associated with the life cycle of transportation fuels used in California. Unlike the regulation itself, this user guide does not have the force of law. It is not intended to and cannot establish new mandatory requirements beyond those that are already in the LCFS regulation, nor supplant, replace or amend any of the legal requirements of the regulation. Conversely, any omission or truncation of regulatory requirements does not relieve entities of their legal obligation to fully comply with all requirements of the regulation.

Disclaimer: The California Air Resources Board makes every reasonable effort to provide accurate and up-to-date information in this user guide, but makes no warranties or representations as to the accuracy of the content and assumes no liability or responsibility for any error or omission. CARB reserves the right to make changes to this user guide and/or to the products described in this user guide, at any time without notice. We welcome and appreciate your feedback. Please send in your comments and suggestions, particularly if information in this guidance appears incorrect, misleading, or incomplete.

Step 1. Completing the "Account Administrator Designation Form"

The Alternative Fuels Portal (AFP) comprises the Alternative Fuel Registration Module (AFRM) and the Fuel Pathway Evaluation Module (FPEM). The AFRM supports the voluntary program created to assist regulated parties subject to the LCFS. The FPEM supports the LCFS alternative fuel pathway evaluation and certification process. The AFP is for use by any such alternative fuel producers to register alternative fuel production facilities for fuels that are being or can be sold, supplied, or offered for sale in California. Fuel producers who are seeking pathway certification and facility registration should also request an AFP account. The registration involves a series of four steps before an account can be approved. The information provided is reviewed by the ARB administrator for approval. Download the [AFP User Guide](#) for the Alternative Fuels Portal if you are new user.

Completing the "Account Administrator Designation Form"

The Account Administrator Designation Form is provided here for download. This form is to be used to certify the person as the designated administrator who has primary responsibility for all information provided as part of the registration process in the Alternative Fuels Portal (AFP). The Administrator is responsible for all data submitted by the registering company. A completed Account Administrator Designation Form is required to be uploaded in Step 2 of the AFP registration process

[Account Administrator Designation Form](#)

Step 2 Cancel

3. Complete the form, sign, and click Step 2 to upload the signed Designation form.

LOW CARBON FUEL STANDARD

AFP Account Administrator Designation Form

▶ Instructions:

Please complete this form to authorize an Account Administrator for your company. A designated Account Administrator has the ability to create and manage additional user accounts within the company, and to submit information on behalf of the company for fuel pathway evaluation and certification. This document must be signed by two (2) designated signatories and uploaded to the LCFS Alternative Fuel Portal (AFP) during initial account registration. **Only Owners, Officers or Managing Partners having authority to legally bind the company should complete and sign this form.**

Owner, Officer, or Managing Partner

By signing below, I authorize the named Account Administrator to create and manage user accounts, and to submit documents through the AFP on behalf of the company named below.

Company Legal Name:

U.S. EPA Company ID (if any):

4. Agree to the Use Condition and Disclaimer. Click on “Step 4”.

Step 3. AFP General Use Conditions & Disclaimer

Data Submittal

The accuracy of any information submitted through the Alternative Fuels Portal (AFP), including but not limited to any claimed CI values, and the verification of any such submitted information is the sole responsibility of the Alternative Fuel Producer that submitted the information. The ARB makes no warranties, expressed, implied, or otherwise, as to the validity, accuracy, marketability, merchantability, or any other aspect of any information submitted under this registration program or any information published by ARB as a result of or derived from this registration. No data, analysis, results, or other information that may be published by ARB as a result of registration shall constitute or be construed as instruments, securities, or any other form of property. Further, no LCFS credit derived from the registration data, analysis, results or other registration information published by ARB shall constitute or be construed as instruments, securities, or any other form of property.

Verification

ARB reserves the right to review and audit at any time any of the information submitted through this portal and, as a result, data, analysis, results, or other registration information published by ARB are subject to change.

Attestation Form Submittal

In order to register a fuel pathway or to submit a fuel pathway for evaluation you will be required to complete and submit the appropriate attestation form. There are separate attestation forms required for registering a fuel pathway and for submitting an application package for fuel pathway evaluation. The forms are provided in the portal.

I agree to these conditions.

Step 4 **Cancel**

5. Enter the company and contact information. If your company is registered with the EPA, select the EPA Company ID. Otherwise, check the box that indicates that you do not have an EPA Company ID. A CARB Company ID will be generated upon submission of your account information. Complete all information and submit the account activation application. Your account will be pending until activated by CARB.

E. Editing User Accounts

1. Each user can edit his own user account profile. Click on “Producer Profile” tab and “User Profiles” button.

The screenshot displays the 'Producer Profile' tab in a web application. The navigation bar at the top includes 'Home', 'Producer Profile' (highlighted with a red box), 'My Facilities', 'Registered Facilities', 'Reports', and 'Correspondence'. A welcome message reads 'Welcome: Christina Tillman for ARB Test2'. The main content area is titled 'LCFS Alternate Fuel Producer Registration' and contains three sections: 'Fuel Production Company Details', 'Profile Details: Company Owner/Officer/Exec. Mngr.', and 'User Profile Details: Executive User'. Each section contains various input fields for company and personal information. At the bottom, there are three buttons: 'Update', 'User Profiles' (highlighted with a red box), and 'Back'.

For Admin users, the following user profile functions are available to enable you to administrate your company’s user accounts.

User Locked – If a user has attempted to log in too many times without success, his account will be locked. You can unlock the account by unchecking the box.

User Active - You can activate or deactivate a user by checking this box. Inactivated users cannot log in to the system.

Password Reset Needed - You can set the account to require a password reset by checking this box. This will force the user to reset his password upon sign-in.

Security Question Reset Needed - You can set the account to require an update to security questions by checking this box. This will force the user to update his security questions upon sign-in.

Temp - Clicking this link will send a temporary password for a user. This is done if the user forgets his password or require a temporary password because he is unable to reset the password on his own.

¹ By default, the initial user registered in the AFP is an Admin. The Admin can be changed by submitting a new AFP Admin Designation form to CARB via Correspondence.

F. Creating a Facility

1. Go to “My Facilities” and click “Add Facility”.

Home | Producer Profile | FPC | **My Facilities** | Registered Facilities | Reports | Correspondence

Welcome: Christina Tillman for ARB Test2

Fuel Producer Company Facilities

Fuel Producer Company: ARB Test2
Company ID: C1002

- Click “Add Pathway” to add a pathway to the application. A Pathway Details pop-up window is shown. Enter the pathway details. If you have designated your application to have multiple pathways, you must add more than one pathway to continue. Click “Next” to continue.

The screenshot shows the 'LCFS Pathway Application' interface. At the top, there is a navigation menu with tabs: Home, Producer Profile, FPC, My Facilities, Registered Facilities, Reports, and Correspondence. Below the menu, a welcome message reads 'Welcome: Christina Tillman for ARB Test2'. The main content area is titled 'LCFS Pathway Application' and displays application details: Fuel Producer: ARB Test2, Company ID: C1002, Facility Name: Final Testing Facility, and Facility ID: F10009. Below this is a 'Tier 2 Pathway' section with an 'Application #' field. The 'Fuel Pathways' section contains a table with columns: Pathway Number, Fuel Type, FeedStock, Applied Pathway Description, Applied CI (gCO2e/MJ), Delete, and Details. A '+ Add Pathway' button is highlighted in red in the top right corner of the table. Below the table, there are 'Back' and 'Cancel' buttons. At the bottom of the page, there are links for 'LCFS AFP Home', 'Terms of Use', 'ARB LCFS Page', and 'Back to Top'.

- Pathway Details pop-up window. Add pathway details such as fuel, feedstock, pathway description, and the CI for which you are applying. For Temporary and Lookup Table pathways, the CI and pathway descriptions are pre-defined. For Tier 1, Tier 2, and Design-Based pathways, you must enter the CI and pathway description.

The screenshot shows the 'Pathway Details' pop-up window. It contains the following fields and controls:

- Fuel Type:** A dropdown menu with 'Select...' as the current value.
- Feedstock:** A dropdown menu with 'Select...' as the current value.
- Pathway Description:** A text input field with a red asterisk indicating it is required. A '(Max:500)' label is positioned to the right of the field.
- Applied CI Value:** A section containing three input fields:
 - Direct Emission (CI) (gCO2e/MJ):** A required field with a red asterisk.
 - Indirect Emission (CI)(if any) (gCO2e/MJ):** An optional field.
 - Total CI Value:** A field that likely auto-calculates the sum of the other two.

 At the bottom of the window, there are 'Cancel' and 'Add Pathway' buttons. A red asterisk and the word 'REQUIRED' are located at the bottom left of the form area.

- Add supporting documents. Click “Add File” to upload the required supporting documents. The required documents denoted by * are the baseline minimum requirements for AFP submission only. They do not include all required documents for your pathway. Please contact CARB if you have any questions about required documents per LCFS regulation section 95488.

H. Reviewing Pathway Details

1. Go to the facility under which the application was submitted. Click “View Pathways”. For the application of interest, you can expand the application details window on the left to see the joint applicant(s), if any, specific pathway(s) details, and documents submitted. You can also select “View” under the Details column to open the application to view the details. For applications that are ‘Saved’ and have not been submitted, you can continue to edit the application. For applications that are ‘Submitted’ or are being processed by CARB, the application will open in read-only mode and cannot be edited.

8000502	Biodiesel	Palm Fatty Acid Distillate (PFAD)	tret	Direct Emission : 45 Land Use or Other Indirect Effect : 0 Total CI Value : 45	Details

I. View Certified Pathway Details

- For application submitted on or after January 8, 2019, full detailed certification information for each certified pathway is available and displayed with history tracking. Under each application number, open the additional information by clicking on the expansion triangle. Click the certification “Details” link for a pathway to view the certification information.

Note. In some cases, a pathway may not have a certification “Details” link. This occurs when a) the application is in review and is not yet certified; b) the application is certified but a pathway (part of a multi-pathway package) is not certified or c) the application is rejected. Please contact CARB if you have questions regarding the certification details of your application.

2. View Certification Details for Tier 1 (A) and Tier 2 (B) Pathways.

For AB class of applications, the “Certified Pathways” page shows all certified information including historical certification details. The original applied pathway information (user-proposed fuel, feedstock, pathway description, and CI) is shown in the top section and the corresponding information for all certified pathway(s) is displayed underneath. Each time a pathway is certified (such as from provisional status to regular), a new FPC is generated and added to the table, with the latest certified value shown first.

Note. Certified FPC statuses are shown as “Active” or “Inactive”. To allow for reporting and credit generation, the FPC status will remain “Active” even if the effective time period for a FPC has expired. For instance, a FPC showing an End Date of 4/30/2019 will remain active for reporting purposes.

J. Providing Additional Information for an Application

1. A CARB Application Analyst may require additional information about your application. If this is the case, you will receive an AFP notification by email with a request for information similar to the following:

“AFP Applicant,

A Request for Information for B0005 has been entered and submitted.

Specific details of the Request for Information are contained in the comments field of the application. To access the application, log into the Alt. Fuel Portal (AFP).

AFP System”

2. Log into the AFP to retrieve the specific application by going to “My Facilities” then “View Pathways”. Open the application by clicking “View” under Details column. A note from CARB will indicate the additional requirements. The document upload function in the application also becomes available so that you can provide additional documents. Click “Add File” to upload any additional documents. Click “Resubmit” when done. Enter an optional message and click “Submit”.

Tier 2 Pathway Application # B0005

INSTRUCTIONS

- This application contains joint applicants
- This application contains multiple pathways
- This is a provisional application.
(If application contains multiple pathways, each pathway will be provisional)

If the Comments field does not show the full message, enlarge the field by dragging on the lower right corner.

K. Accepting/Declining Staff Summary for an Application

1. When Staff Summary is ready for review, you will be notified by email with a message similar to the following:

“Fuel Producer: ARB Test2 (C1002) Facility Name: Final Testing Facility (F10009)

AFP Applicant,

The evaluation of your fuel pathway application "B0005" has been completed. The resulting "Staff Summary" has been posted in your application for review. To access the application, log into the Alt. Fuel Portal (AFP). Access the Staff Summary in the AFP by selecting the pathway application from the "Submitted Applications" and then selecting the View link in the details column for this application.”

2. Go to “My Facilities”, “View Pathways”, and select the specific application. Download a copy of the Staff Summary by clicking the download arrow. (A Staff Summary can be either an Excel CI Summary or a Word Pathway Summary document, depending on whether the pathway is Tier 1 or Tier 2). After reviewing the Staff Summary, accept or decline the Summary by clicking on the designated button.

L. Reviewing Application Returned by Verification Body

1. If additional information is required, the VB will return the application for your review. The application status will change to “Revision Requested” and the History will show the progress to-date. You can also see the specific VB that has requested the information (“Modified By”) and when the application was returned (“Last Modified”).

M. Submitting an Annual Report

The following is supplemental guidance for the 2021 Annual Report submission for entities with certified CA-GREET3.0 Tier 1, Tier 2, and Look-up Table pathways in 2019 to 2020. For full guidance, please see the [Annual Reporting and Verification User Guide](#) released on March 16, 2021.

1. Go to the Annual Fuel Pathway Report tab in the upper navigation bar.

The screenshot shows the top navigation bar of the LCFS Alternative Fuels Portal. The navigation tabs are: Home, Producer Profile, FPC, My Facilities, Annual Fuel Pathway Report (highlighted with a red box), Registered Facilities, Reports, and Correspondence. Below the navigation bar, the page title is "LCFS ALTERNATIVE FUELS PORTAL". The main content area contains the following text:

This is the LCFS Alternative Fuels Portal (AFP) for official reporting of fuel production facility information. The data uploaded to and contained within this system are regarded by CARB as business confidential pursuant to California law.

Important Note to AFP Designated Administrators

The Alternative Fuels Portal created to assist regulated parties subject to the Low Carbon Fuel Standard (LCFS) Regulation. This registration is for use by alternative fuel producers to register facilities which produce alternative fuel that are sold, supplied, or offered for sale in California.

Alternative fuel producers can register Fuel Pathway Codes (FPCs) for their facilities in the Alternative Fuels Portal (AFP), which then enables reporting parties to report fuel transactions for fuels produced at these facilities.

2. The Annual Report submission screen requires you to:
 - a. Upload a Pathway Calculator (Simplified CI Calculator or CAGREET 3.0), Attestation Letter, and Supporting Documents, and
 - b. Add operational CI data.

Click "+Add File" to begin file upload for Annual Report documents.

INSTRUCTIONS

Click on "Add File" link to upload Annual Fuel Pathway Report for T1 , T2 Pathway applications and upload utilize RECs for zero-CI Electricity Lookup Table pathways (ELC037L00072019, ELC048L00072019, ELC049L00072019) and invoices or metering demonstrating for Hydrogen Lookup Table pathways (HYG025L00072019, HYG031L00072019 ,HYL025L00072019, HYL031L00072019, HYG037L00072019, HYG039L00072019) using "Supporting Document" in document type.

Click on "Add Operational CI" link to submit T1 and T2 Fuel Pathway Operational CI for 2020 and click submit button to submit Annual Fuel Pathway Report to the CARB.
