

EXECUTIVE ORDER D-234-14

Relating to Exemptions Under Section 27156
of the California Vehicle Code

JET Performance Products
JET Performance Programmer

Pursuant to the authority vested in the California Air Resources Board by Section 27156 of the Vehicle Code; and

Pursuant to the authority vested in the undersigned by Section 39515 and Section 39516 of the Health and Safety Code and Executive Order G-14-012;

IT IS ORDERED AND RESOLVED: That the installation of the JET Performance Programmer, manufactured and marketed by JET Performance Products, 2700 California Street, Torrance, California 90509-2936, has been found not to reduce the effectiveness of the applicable vehicle pollution control systems and, therefore, is exempt from the prohibitions of Section 27156 of the Vehicle Code for the following General Motors vehicles, as listed in Exhibit A.

The JET Performance Programmer is a hand held programmer designed to reprogram the FLASH memory chip located in the vehicle's ECU module. Emission-related data files cannot be modified by the end user. Performance gains are around 10 horsepower.

This Executive Order is valid provided that the installation instructions for the JET Performance Programmer will not recommend tuning the vehicle to specifications different from those of the vehicle manufacturer.

Changes made to the design or operating conditions of the JET Performance Programmer as exempt by the California Air Resources Board, which adversely affect the performance of the vehicle's pollution control system shall invalidate this Executive Order.

Marketing of the JET Performance Programmer using any identification other than that shown in this Executive Order or marketing of the JET Performance Programmer for an application other than those listed in this Executive Order shall be prohibited unless prior approval is obtained from the California Air Resources Board.

This Executive Order does not constitute any opinion as to the effect the use of the JET Performance Programmer may have on any warranty either expressed or implied by the vehicle manufacturer.

This exemption is issued based on submitted emissions test data, from the SEMA Garage, Diamond Bar, California, on a 2015 model year Chevrolet Camaro, equipped with a 6.2L engine and certified to the LEV II ULEV emission standards and tested using the Cold-Start CVS-75 Federal Test Procedure (FTP) test cycle and the Supplemental Federal Test Procedure (SFTP US06) test cycle.

	CVS-75 FTP			
	NMOG	CO	NOx	HCHO
Standards, UL	0.070	2.1	0.04	0.011
Device Test w/df, 2 test avg.	0.049	1.1	0.03	0.002

	US06	
	NMHC+NOx	CO
Standards 4k	0.14	8.0
Device	0.03	0.1

Comparable 0 to 60 times were reduced by 6.9%

Test results showed that the JET Performance Programmer when installed on the vehicle did not cause exhaust emissions to exceed the applicable emission levels during the FTP and SFTP test cycles. This Executive Order is also based on the On-Board Diagnostic II (OBD II) testing conducted on the same test vehicle. The JET Performance Programmer when installed on the test vehicle did not affect the vehicle's ability to perform its OBD II monitoring. Similar results would be expected when installed on the other vehicles listed.

The California Air Resources Board reserves the right in the future to review this Executive Order and the exemption provided herein to assure that the exempted add-on or modified part continues to meet the standards and procedures of Title 13, California Code of Regulations, Section 2222, et seq.

THIS EXECUTIVE ORDER DOES NOT CONSTITUTE A CERTIFICATION, ACCREDITATION, APPROVAL, OR ANY OTHER TYPE OF ENDORSEMENT BY THE CALIFORNIA AIR RESOURCES BOARD OF ANY CLAIMS OF THE APPLICANT CONCERNING ANTI-POLLUTION BENEFITS OR ANY ALLEGED BENEFITS OF THE JET PERFORMANCE PROGRAMMER.

No claim of any kind, such as "Approved by the California Air Resources Board", may be made with respect to the action taken herein in any advertising or other oral or written communication.

Violation of any of the above conditions shall be grounds for revocation of this order. The order may be revoked only after a ten-day written notice of intention to revoke the order, in which period the holder of the order may request in writing a hearing to contest the proposed revocation. If a hearing is requested, it shall be held within ten days of receipt of the request and the order may not be revoked until a determination is made after the hearing that grounds for revocation exist.

Executed at El Monte, California, this 19th day of April 2018.

for Annette Hebert, Chief
Emissions Compliance, Automotive Regulations and Science Division
