

Market Readiness Indicators Survey

www.SurveyMonkey.com/r/MRIsurveyCARB

Please provide feedback on which factors you consider most important to indicate how “market ready” a technology is. Market readiness indicators help determine, beyond technology readiness, how a given technology will advance in commercialization.

Rank the factors in each category with 1 being most important.

Complete the survey now during today’s meeting, and we’ll report preliminary results. The survey will remain open until 4/23/20.
