

Fiscal Year 2016-17 On-Road Advanced Technology Demonstration Project Selections

The following table lists project applications received by the California Air Resources Board (CARB or Board) on August 16, 2017, in response to the [On-Road Advanced Technology Demonstration Project Solicitation](#) released on May 19, 2017. Overall, CARB received five applications requesting a total of \$29.5 million in funding. \$12,076,079 was allocated to two selected projects. Project applications were scored in accordance to the criteria detailed in the solicitation.

Project Applicant	Project Title	Location	Funding Requested	Funding Approved
CALSTART	Opposed Piston Engine Class-8 Heavy-Duty On-Road Demonstration	Porterville, Riverside and Compton	\$6,994,601	\$6,994,601
Gas Technology Institute	Fast Track Fuel Cell Project	Ports of San Diego, Los Angeles and Long Beach	\$5,081,478	\$5,081,478
South Coast Air Quality Management District	Fuel Cell Drayage Truck and Intelligent Transportation Systems	Ports of Los Angeles and Long Beach	\$12,000,000	\$0
Gas Technology Institute	Isuzu-Westport Near-Zero, Optimized, Natural Gas Engine	Fontana	\$4,997,620	\$0
CALSTART	Intelligent Approaches to Reducing Trucking Congestion and Emissions from Port Congestion	Port of Oakland	\$742,760	\$0
		Totals	\$29,513,758	\$12,076,079
