OFCI / SSIE / LSIE

2006 EMA Certification Workshop
April 18, 2006
Off-Road Compression Ignition (OFICI) Engines
Flexibility Engine
Executive Order Request

• Needed for all Flex Engines (except <37 kw) beginning 1/1/2007
• Flex Engines must be the same as previously certified engines
• No test data is needed
• Letter requesting certification is required
Flexibility Engine Certification Request Letter

- Engine/Equipment manufacturers’ corporate names
- Original Engine family name
- Original ARB Executive Order (EO) number
- Production Model year
- Equipment models
- Projected sales: U.S. and CA
- Copy of Labels
- Contact information—name, e-mail address and phone number
Flexibility Engine Label

Starting January 1st, 2007, the following statement of compliance applies:

“THIS ENGINE COMPLIES WITH CALIFORNIA EMISSION REQUIREMENTS UNDER 13 CCR 2423(d). SELLING OR INSTALLING THIS ENGINE FOR ANY PURPOSE OTHER THAN FOR THE EQUIPMENT FLEXIBILITY PROVISIONS CITED MAY BE A VIOLATION OF STATE LAW SUBJECT TO CIVIL PENALTY.” [Insert Engine Family Name]
Flexibility Engine Label

For flexibility engines < 37 kW and not subject to emission requirements under the Tier 2/3 program, the following statement of compliance applies:

“THIS ENGINE QUALIFIES FOR USE IN EQUIPMENT RATED BELOW 37 KW BY PROVISION OF 13 CCR 2423(d). SELLING OR INSTALLING THIS ENGINE FOR ANY PURPOSE OTHER THAN FOR THE EQUIPMENT FLEXIBILITY PROVISIONS CITED MAY BE A VIOLATION OF CALIFORNIA LAW SUBJECT TO CIVIL PENALTY.”
Tier 4 Flexibility Engine Equipment Label

- EMISSION CONTROL INFORMATION
- Equipment manufacturer’s corporate name
- Production year of the Equipment
- Contact information—name, e-mail address, phone number
- The statement:

  “THIS EQUIPMENT [or identify the type of equipment] HAS AN ENGINE THAT MEETS CALIFORNIA EMISSION STANDARDS UNDER 13 CCR 2423(d).”
Starting January 1\textsuperscript{st}, 2007, for the rebuilder:

- Keep original label if engine is rebuilt to the original emission configuration
- Replace label with a more accurate one if rebuilt to a more stringent configuration
- If original label is damaged, the label may be replaced by rebuilder
  - The rebuilder shall retain documentation for eight years
  - Provide documentation upon request of Executive Officer
- Incomplete engines need to be labeled
Confirmatory Test Requirement

ARB will require manufacturers to conduct confirmatory testing for Tier 2/3 engines if:

- The NMHC+NOx certification level is within 0.2 g/kW-hr of the standard
- The CO certification level is within 0.5 g/kW-hr
- The PM certification level is within 0.05 g/kW-hr
Small Spark-Ignition Engines (SSIE)
## SSIE EXECUTIVE ORDERS

If the Equipment MFR. Assembles the Aftertreatment for the Engine MFR

- Manufacturer of Record (MOC) submits certification application and receives executive order.
- MOC produces engines without aftertreatment system and sends them to equipment MFR.
- Equipment MFR. assembles aftertreatment system and engine per MOC’s instructions.
- MOC responsible for warranty, PLT, labeling, and other certification requirements.
MANUFACTURER OF RECORD (MOC) RANDOMLY SELECTS PLT ENGINES (WITHOUT AFTERTREATMENT)

MOC PROCURES RANDOMLY SELECTED AFTERMARKET SYSTEM TO GO WITH SELECTED PLT ENGINES

MOC ASSEMBLES AFTERTREATMENT SYSTEM WITH PLT ENGINE (no master or slave components allowed)

MOC PROVIDES PLT RESULTS TO ARB

MOC SHIPS PLT ENGINE ALONG WITH AFTERTREATMENT SYSTEM TO EQUIPMENT MFR.
Engine and Equipment Model-Year Matching

ARB POLICY

1. ARB will certify equipment of a given model-year with an engine from the same model-year.
Engine and Equipment Model-Year Matching (con’t)

2. ARB will certify equipment with engines up to one model-year immediately preceding the model year of the equipment.
Engine and Equipment Model-Year Matching (con’t)

3. ARB will certify equipment with previous model-year engines, without a time frame limitation, as long as the emission requirements the engine meets are valid for the model-year of the equipment.
EPA Small SI Compliance Program

- No changes anticipated in certification program
- Received tips of noncompliance
- CISD is reviewing compliance of Small SI Industry
  - Coordination with ARB and OECA
Nonroad Engine Certification Contacts

- **Small SI**
  - Mike Wolfe, wolfe.michael@epa.gov
  - Joe Hresko, hresko.joe@epa.gov

- **Marine SI**
  - Nydia Reyes-Morales, reyes-morales.nydia@epa.gov
Large Spark-Ignition Engines (LSIE)
2007 and Later LSIE Test Procedures & Regulations

- Proposal
  - Harmonizes with U.S EPA 2.0 gram standard for 2007-2009
  - Provides for more stringent 0.6 gram standard for 2010 and beyond

- Board Hearing May 25-26, 2006

Please check the LSI Program page for updates
http://arb.ca.gov/msprog/offroad/orspark/orspark.htm
LSIE ≤1 liter Issues

- Currently the HC+NO\textsubscript{x} standard is 12.0g/kW-hr for 2002 and later.
- No changes to the standards for the 2007-2009 Model Years
- Continue to use current LSIE regulations and procedures
2007 LSI Durability Plans

- ARB is currently accepting (and welcomes) 2007 durability plans
- A complete application is required before review
- Staff generally reviews durability plans within 30 days
- If there are questions or problems, the manufacturer will be notified.
EPA MY2007 LSI Requirements

- Transient and Steady State Testing
- Field Testing
- Evaporative Emissions (by design or testing)
- Diagnostic Systems
- Torque Broadcasting
- AECD Reporting
- EPA Selected In Use Testing
- Deterioration Factors
  - Durability plans approved by ARB will be accepted by EPA
EPA Certification Contacts

• LSI and Snowmobile

Question and Answer
Tier 4 Flexibility Engine Certification

- Applies to equipment for the 2008 and later model year test procedure
- The flexibility must be used within seven years
