

## APPENDIX

### **Revisions to Appendix A of the State Strategy for California's 2007 State Implementation Plan.**

Listed in the tables that follow are updates to the on-road emission inventories that were contained in Appendix A to the State Strategy that was released on May 7, 2007. These revisions reflect the latest transportation activity data that was submitted by the Southern California Association of Governments and the Kern County Association of Governments in January 2008. Also in each table are the revised baseline adjustments. These baseline adjustments are applied to the on-road emissions inventory to reflect the reductions of measures that have been adopted but not included in EMFAC2007, the on-road emissions model. Note that there are no revisions for the Coachella Valley.

#### REVISIONS TO JANUARY 29, 2008 RELEASE

After these plans were posted on January 29, 2008, ARB staff discovered that some of the input data used by the on-road emissions estimation model, EMFAC, had been corrupted. This resulted in errors in emissions calculations affecting the inventories and transportation conformity budgets for Antelope Valley – Western Mojave Desert and Eastern Kern County. The table entries for these areas on the following pages reflect the corrected numbers.
