AIR RESOURCES BOARD

NOTICE OF CANCELLATION

**NOTICE OF PUBLIC HEARING TO CONSIDER AMENDMENTS TO THE CLEAN
FUELS OUTLET REGULATION**

BY NOTICE dated February 5, 2013, and published in the February 15, 2013, California Regulatory Notice Register, Register 2013, No. 7-Z, the Air Resources Board (Board or ARB) announced it would conduct a public hearing to consider amendments to the Clean Fuels Outlet regulation that would have required the installation of hydrogen fueling stations once the number of zero-emission hydrogen fuel cell vehicles reached a certain threshold. The hearing was scheduled for September 26, 2013, at 9:00 a.m.

PLEASE BE ADVISED that the proposed hearing to consider amendments to the Clean Fuels Outlet regulation has been **CANCELLED**. The reason for this cancellation is the Legislature's passage of Assembly Bill 8 (AB 8) which includes dedicated funding for hydrogen fueling infrastructure to support market launch of hydrogen fuel cell vehicles.
