TABLE OF CONTENTS

PROPOSITION 1B: GOODS MOVEMENT EMISSION REDUCTION PROGRAM

Executive Summary..... 1

December 2017 Semi-Annual Status Report 2

[this page intentionally left blank]

**Proposition 1B: Goods Movement
Emission Reduction Program**

[this page intentionally left blank]

EXECUTIVE SUMMARY

The \$1 billion Proposition 1B: Goods Movement Emission Reduction Program (Program) is being implemented in California's four priority trade corridors (Los Angeles/Inland Empire, Central Valley, Bay Area, and San Diego/Border), reducing freight pollution and the associated health risks in communities near seaports, railyards, freeways, and distribution centers. Health and Safety Code section 39625 et seq. established the Program and directed the California Air Resources Board (CARB) to maximize emission reduction benefits while achieving the earliest possible health risk reductions. This report describes the progress of the Program through September 2017, including a listing of each grant with the funding amount, location, the number of trucks or other equipment that has been or are being upgraded, the timeframe for completion, and the expected emission reductions.

Of the \$1 billion authorized, CARB has allocated \$980 million for local agency projects and CARB's administration costs (\$20 million is retained by other State agencies for bond issuance and oversight costs). Of this amount, CARB has received or been approved for \$951 million in cash. CARB will need to request the remaining \$29 million to cover projects and provide for CARB's administration costs over multiple years. CARB awards and oversees grants to local agencies that in turn offer competitive incentives to diesel equipment owners to upgrade to cleaner technologies ahead of, or beyond, regulatory requirements. To ensure accountability and effectiveness, all grants are awarded in an open, public process as required by CARB Program Guidelines.

The local agencies have completed the Year 1 through Year 4 projects with over 12,800 diesel trucks replaced or retrofitted and operating in the four primary trade corridors. Additionally, 25 upgraded locomotives are operating in the Central Valley and Los Angeles/Inland Empire; grid-based electrical power was installed at 37 ship berths at the Ports of Oakland, Los Angeles, Long Beach, and Hueneme; and 3 upgraded commercial harbor craft are operating in California waters. These projects will reduce over 4.5 million pounds of fine particulate matter (PM) and almost 149 million pounds of nitrogen oxides (NOx) over the term of the contracts.

The local agencies are currently implementing Year 5 truck, locomotive, ships at-berth, cargo handling equipment, transportation refrigeration unit, and commercial harbor craft projects to replace or upgrade approximately 3100 pieces of equipment and related electric charging infrastructure. CARB estimates these projects will reduce over 400,000 pounds of PM and 20 million pounds of NOx over the term of the contracts.

The report is available electronically at: <https://www.arb.ca.gov/mandrpts/mandrpts.htm>. To order a hard copy, please contact Mr. Jonathan Harmon at (916) 445-2191.

2018 Report to the Legislature

*Previously submitted to the Department of Finance as:
December 2017 Status Report to the Department of Finance*

This status report provides an update on implementation of the \$1 billion Proposition 1B: Goods Movement Emission Reduction Program (Program) to reduce emissions and health risk from freight operations in California's four priority trade corridors (Los Angeles/Inland Empire, Central Valley, Bay Area, and San Diego/Border). Consistent with State law, the Program Guidelines for Implementation (Guidelines) and related documents detail the grant/contract requirements for the California Air Resources Board (CARB or Board), participating local agencies, and equipment owners (see Program website at: <https://www.arb.ca.gov/gmbond>).

CARB adopts the Guidelines, then solicits, awards, funds, and oversees grants to local agencies like air districts and seaports. The local agencies offer grants or contracts, through a competitive process, to diesel equipment owners to co-fund the upgrade of diesel equipment to cleaner technologies ahead of or beyond regulatory requirements to do so.

To ensure accountability and effective use of these public funds, the local agencies: solicit for eligible projects, review applications, inspect the old equipment, provide data to rank competitively each piece of equipment based on emission reductions and cost-effectiveness, sign grants or contracts with equipment owners, inspect the upgraded equipment, make payment for the cleaner technology, and track/report on funded projects.

The information in this report is based on the local agencies' semi-annual project reports as of September 30, 2017, and supplemented with information in the Program's Goods Movement Online Database. The information is reported by year of funding, as defined below.

- Year 5: Awarded September 2015 Board Meeting.
- Year 4: Awarded July 2013 Board Meeting.
- Year 3: Awarded December 2011 Board Meeting - drayage truck projects only.
- Year 2: Awarded June 2010 and December 2011 Board Meetings.
- Year 1: Awarded May 2008 Board Meeting.

Available Funding and Expenditures

Each budget appropriation authorizes CARB to use a specific amount of funding for the Program, within statutory timeframes. However, the appropriation does not provide any cash for this purpose. Therefore, the Program depends on the receipt of proceeds from State bond sales or other mechanisms to fund new projects.

The entire \$1 billion has been appropriated in State budgets (over multiple years), with \$980 million to CARB for this Program and \$20 million set aside by the control agencies to cover bond issuance and oversight costs.

2018 Report to the Legislature

*Previously submitted to the Department of Finance as:
December 2017 Status Report to the Department of Finance*

CARB has allocated \$980 million including \$938 million for local agency projects and about \$42 million for CARB's administration costs over multiple years. CARB has paid about \$830 million to local agencies and for CARB's administration costs through September 2017.

Local Agency Awarded Funds

Year 5. In September 2015, the Board awarded approximately \$220 million for truck, locomotive, ships at-berth/cargo handling equipment, transport refrigeration unit (TRU), and commercial harbor craft projects throughout the State. The award also included \$1 million for the truck filter substrate replacement program. CARB has approved the local agencies' request that funds not utilized from prior year grants due to project fallout be made available for Year 5 truck projects.

Year 4. In July 2013, the Board awarded approximately \$143 million for truck projects throughout the State, including funds for loan assistance. In addition, over \$6 million was awarded for a truck filter substrate replacement project and nearly \$1 million for harbor craft projects. Any funds not utilized for projects were reallocated to Year 5 truck projects.

Year 2 and Year 3. CARB received funds for these projects in 2010 and 2011 from multiple bond sales. In June 2010, the Board awarded \$200 million in available cash primarily for truck projects and ships at-berth/cargo handling equipment projects, with smaller grants for locomotive and harbor craft projects. In December 2011, the Board awarded and allocated approximately \$122 million from bond sales and funds redirected from CARB's administration costs for truck projects. Any funds not utilized for projects were reallocated to Year 4 truck projects.

Year 1. The first year funds of approximately \$246 million were used for projects to upgrade trucks, locomotives, and ships at-berth. All of these projects were suspended for 6 to 14 months due to the December 2008 "stop work" order on bond-funded programs, which resulted in an extended delay from time of application to contract. This led to some funds being unused by the local agencies; grant agreements were amended to transfer funds from undersubscribed grants to oversubscribed grants.

2018 Report to the Legislature

*Previously submitted to the Department of Finance as:
December 2017 Status Report to the Department of Finance*

Project Results

The Program bond monies have leveraged substantial match funding from private, local, and federal sources – more than one match dollar for every Program dollar invested.

Year 5. The local agencies held multiple solicitations for all source categories beginning in Fall 2015 through Fall 2017. They received applications for over 7,000 pieces of equipment including over 3,600 trucks and 3,200 TRUs and electric plugs, 128 cargo handling equipment, 59 locomotives, 6 commercial harbor craft, and 3 ships at-berth. The local agencies are continuing to implement the projects, which includes evaluating applications, inspecting the old and new equipment, signing contracts, and processing payments. Not all of the applications meet the Program eligibility requirements and some applicants decide not to complete their project resulting in project fallout. Approximately 2,900 pieces of equipment are in process with 198 trucks and 5 locomotives operational.

Year 4 and 5. The Sacramento District was the implementing local agency for the Filter Substrate Replacement project. The project is complete with the replacement of 505 filter substrates.

Years 1 to 4. These projects are complete and all equipment is operational. The following information is by source category.

Trucks: More than 12,800 cleaner trucks are operating in the four priority trade corridors. The upgraded equipment includes approximately 1,600 trucks retrofitted with diesel soot filters and the replacement of over 480 trucks with new cleaner natural gas trucks. Small truck fleets (1 to 3 trucks) have received funding to upgrade about 5,400 trucks.

Ships At-Berth: The Bay Area District's early grant project to install grid-based electrical power for three berths at the Port of Oakland has been operational since 2011. Under Year 2 grant projects, the installation of grid-based electrical power was completed in late 2013 for 9 berths at the Port of Oakland and 25 berths at the Ports of Long Beach, Los Angeles, and Hueneme. The funded berths were ready for ships to begin to plug into the grid in early 2014.

Locomotives and Commercial Harbor Craft: The Sacramento and South Coast Districts completed the upgrade of 25 locomotives that are operating in the Central Valley and the Los Angeles/Inland Empire trade corridors. In addition, the San Diego District has completed 3 harbor craft upgrades.

2018 Report to the Legislature

*Previously submitted to the Department of Finance as:
December 2017 Status Report to the Department of Finance*

Project Benefits – Years 1 to 5

When fully implemented, the Program expects projects included in this report will reduce approximately 5 million pounds, or 2,500 tons, of particulate matter (PM 2.5), plus approximately 170 million pounds, or 85,000 tons, of NOx. Emission reductions for projects funded with Year 1 through Year 3 grants are calculated over the life of their grant term (e.g., 2 to 5 years for trucks and 10 years for ships at-berth). Emission reductions for the Year 4 and Year 5 grants take into consideration CARB's regulations and include only the portion of the emission reductions that are early or extra to these regulations. Additionally, emission reductions are based on completed projects and estimates for Year 5 projects.

Project Status

The tables on the following pages present the information by trade corridor (Table 1), source category (Table 2), and by grant agreement (Tables 3 through 8), and are based on the September 30, 2017 local agency reports and supplemented with additional information from the Districts. The number of equipment and emission reductions for Year 5 projects are estimates and will continue to be updated in subsequent reports as additional solicitations are held, equipment becomes operational, and grants are completed.

TABLE 3A LOS ANGELES/INLAND EMPIRE TRADE CORRIDOR – South Coast AQMD

			Emission Reductions (pounds)		Current Project Status
			PM 2.5	NOx	
Year 5					
Other Trucks	Replace old dirty trucks with newer clean models. GMB14-L1/13GML01	\$103,546,688	1,000	4,313,000	District has signed contracts for 545 trucks and 62 trucks have been scrapped and replaced with much cleaner trucks. District is in the process of signing contracts for approximately 400 trucks.
Ships At-Berth/ Cargo Handling Equipment	Eliminate or reduce emissions from ships at-berth, and replace old dirty cargo handling equipment with newer clean models. GMB14-L1	\$14,500,000	19,000	1,774,000	District is in the process of signing contracts for approximately 100 pieces of equipment.
Locomotives	Replace old dirty locomotives with newer clean models. GMB14-L1	\$22,500,000	94,000	2,493,000	District has signed contracts for 10 locomotives and 5 are operational.
Transportation Refrigeration Units	Replace old dirty TRUs with newer clean models. GMB14-L1	\$1,500,000	6,000	317,000	District is in the process of signing contracts for approximately 400 TRUs and electric power plugs.
Year 4					
Other Trucks	Replace old dirty trucks with newer clean models. 13GML01/G11GMLT1	\$79,480,170	180,000	13,407,000	Grant complete. 1,823 old trucks have been scrapped and replaced with much cleaner trucks.
Year 3					
Priority Drayage Trucks	Replace old dirty trucks with newer clean models serving ports and railyards. G11GMPL1	\$3,302,250	1,000	973,000	Grant complete. 104 old trucks have been scrapped and replaced with much cleaner trucks.

			Emission Reductions (pounds)		Current Project Status
			PM 2.5	NOx	
Year 2					
Other Trucks	Retrofit trucks with soot filters and replace old dirty trucks with newer clean models. G11GMLT1/G08GMLT1	\$88,111,486	488,000	14,522,000	Grant complete. 1,522 old trucks have been scrapped and replaced with much cleaner trucks, including 2 natural gas. 386 trucks have been retrofitted with soot filters. 1 truck stop/distribution center electrification project has been completed.
Ships At-Berth	Eliminate or reduce emissions from ships at-berth. G08GMLS1	\$58,641,886	343,000	21,841,000	Grant complete. Installation of shore power equipment for 25 berths (12 at Port of Long Beach, 10 at Port of Los Angeles, 3 at Port of Hueneme) is complete with ships plugging into the grid starting in January 2014.
Locomotives	Replace old dirty locomotives with newer clean models. G08GMLL1	\$4,635,000	27,000	315,000	Grant complete. 6 locomotives have been repowered with much cleaner engines.
Year 1					
Drayage Trucks	Replace old dirty trucks serving the Ports of Los Angeles and Long Beach with newer clean models. G07GMPL1	\$6,930,000	66,000	1,104,000	Grant complete. 132 old trucks have been scrapped and replaced with much cleaner natural gas trucks.
	Retrofit trucks with soot filters and replace old dirty trucks with newer clean models serving the rail yards. G07GMPL2	\$2,625,000	31,000	577,000	Grant complete. 50 old trucks have been scrapped and replaced with much cleaner trucks. 2 trucks have been retrofitted with soot filters.
