**— AGENDA —**

**1. Continuation of the Panel’s review of “Tertiary-Butyl Acetate Inhalation Cancer Unit Risk Factor” - SRP Review Draft (November 2017)**

*In December 2016 the Office of Environmental Health Hazard Assessment (OEHHA) staff presented to the Panel a draft technical support document summarizing the carcinogenicity and derivation of an inhalation cancer unit risk for tertiary-butyl acetate (TBAC). In this meeting the Panel will discuss a revised technical support document (November 2017).*

*OEHHA is required to develop guidelines for conducting health risk assessments under the Air Toxics Hot Spots Program (Health and Safety Code Section 44360(b)(2)). The TBAC inhalation unit risk was developed using the most recent “Air Toxics Hot Spots Program Technical Support Document for Cancer Potency Factors” finalized by OEHHA in 2009. After the Panel’s review the document will be finalized and when adopted by the OEHHA Director the document will be included in Appendix B of the Air Toxics Hot Spots Program Technical Support Document for Cancer Potency Factors.*

**2. Overview of the draft report “Draft Evaluation of Chlorpyrifos as a Toxic Air Contaminant: Risk Characterization of Spray Drift, Dietary, and Aggregate Exposures to Residential Bystanders” (December 2017)**

*Department of Pesticide Regulation (DPR) staff will present an introductory briefing on the draft DPR report proposing to identify and list chlorpyrifos as a toxic air contaminant. The briefing is intended to provide background for the Panel's review of the report which will continue at the Panel's January 23, 2018 meeting. The draft DPR report will be posted in early December 2017 to the following DPR web site under the Risk Assessment Documents tab: [http://www.cdpr.ca.gov/docs/whs/active\\_ingredient/chlorpyrifos.htm](http://www.cdpr.ca.gov/docs/whs/active_ingredient/chlorpyrifos.htm)*

### **3. Consideration of administrative matters.**

*The Panel may discuss various administrative matters and scheduling of future meetings.*

THE AGENDA ITEMS LISTED ABOVE MAY BE CONSIDERED IN A DIFFERENT ORDER AT THE MEETING

## **INFORMATION ABOUT THE SCIENTIFIC REVIEW PANEL**

The Scientific Review Panel (Panel) is charged with evaluating the risk assessments of substances proposed for identification as toxic air contaminants by the Air Resources Board (ARB), the Office of Environmental Health Hazard Assessment (OEHHA) and the Department of Pesticide Regulation (DPR), and the review of guidelines prepared by OEHHA. In carrying out this responsibility, the Panel reviews the exposure and health assessment reports, and the underlying scientific data on which the reports are based, which are prepared by the ARB, DPR, and OEHHA pursuant to Health and Safety Code sections 39660-39661, 39669.5 and 44360, and Food and Agricultural Code sections 14022-14023. These reports are prepared for the purpose of determining whether a substance or pesticide should be identified as a toxic air contaminant, or as guidelines to be used in preparing health risk assessments.

The Panel welcomes written comments or submissions from all parties regarding a report, but does not accept oral comments from the public at its meetings. Although written comments are accepted up to the day of a scheduled meeting, to assure adequate review the Panel requests that written comments and information be submitted to the Panel Liaison (contact information below), preferably no later than two weeks prior to a scheduled meeting.

Transcripts to previously held Panel meetings and other information about the Panel can be found through the ARB web site at: <http://www.arb.ca.gov/srp/srp.htm>.
