

CARB Air Toxics Regulatory Process and Community Input Virtual Listening Session

Ever wondered how air toxics regulations are developed?

Come join staff from the California Air Resources Board's (CARB) Air Toxics Program for an informational evening on the regulatory process. What is it? What must be collected to meet the requirements of State law? How can you get involved in this process?

We would like to hear from you. How can you voice your concerns during CARB's regulatory development? What are ways to be involved in the process? How would you like to get more information?

Meeting Information

The Air Toxics Regulatory Process and Community Input Listening Session is an opportunity to share with CARB staff your concerns, experiences, and/or suggestions on how to get involved in CARB's regulatory process.

Date: April 27, 2021

Time: 5:00 – 7:00pm

Conference code: 900977

Spanish Conference Call Info:

(866) 803-2146

Participant Code: 1083550

Background

CARB's Air Toxic Program aims to reduce exposures to air emissions of toxic chemicals for all Californians. There are several components to the program, including identification and control of air toxic substances, public notification of significant toxics exposures, and a process to reduce these risks. CARB's Air Toxics Program has developed a number of regulations, or Airborne Toxic Control Measures (ATCMs), to help reduce exposures to air toxics. Some of CARB's Air Toxic Program regulations include:

- [Chrome Plating ATCM](#)
- [Composite Wood Products ATCM](#)
- [Stationary Diesel ATCM](#)

CARB's goal is to ensure all voices are heard as we work to reduce community exposure to air toxics. Please come and share your experiences and concerns with the CARB Air Toxics team as we collaborate and create new ways for the community to participate in the regulatory process .

Visit CARB's [Air Toxics Program](#) page for more information.
